INTRODUCTION

Background: Ruled by the Al Thani family since the mid-1800s, Qatar transformed itself from a poor British protectorate noted mainly for pearling into an independent state with significant oil and natural gas revenues. During the late 1980s and early 1990s, the Qatari economy was crippled by a continuous siphoning off of petroleum revenues by the Amir, who had ruled the country since 1972. His son, the current Amir HAMAD bin Khalifa Al Thani, overthrew him in a bloodless coup in 1995. In 2001, Qatar resolved its longstanding border disputes with both Bahrain and Saudi Arabia. As of 2007, oil and natural gas revenues had enabled Qatar to attain the highest per capita income in the world. Qatar has not experienced the level of unrest or violence seen in other Near Eastern and North African countries in 2010–11, due in part to its immense wealth. Qatar's international image is bolstered in part by the Doha-based Al Jazeera news network, which has provided comprehensive coverage of the Near East and North African Arab revolutions. Additionally, Qatar played a significant role in the Libyan revolution by pressing the Gulf Cooperation Council and the Arab League to assist the Libyan rebel movement.

Flag description: maroon with a broad white serrated band (nine white points) on the hoist side; maroon represents the blood shed in Qatari wars, white stands for peace; the nine-pointed serrated edge signifies Qatar as the ninth member of the "reconciled emirates" in the wake of the Qatari-British treaty of 1916 **note:** the other eight emirates are the seven that compose the UAE and Bahrain; according to some sources, the dominant color was formerly red, but this darkened to maroon upon exposure to the sun and the new shade was eventually adopted

National anthem: name: "Al-Salam Al-Amiri" (The Peace for the Anthem)
lyrics/music: Sheikh MUBARAK bin Saif al-Thani/Abdul Aziz Nasser OBAIDAN
note: adopted 1996; the anthem was first performed that year at a meeting of the Gulf Cooperative Council hosted by Qatar

ECONOMY

Economy—overview: Qatar has prospered in the last several years with continued high real GDP growth in 2011. Qatari authorities throughout the financial crisis sought to protect the local banking sector with direct investments into domestic banks. GDP rebounded in 2010 largely due to the increase in oil prices and 2011's growth was supported by Qatar's investment in expanding its gas sector. Economic policy is focused on developing Qatar's nonassociated natural gas reserves and increasing private and foreign investment in non-energy sectors, but oil and gas still account for more than 50% of GDP, roughly 85% of export earnings, and 70% of government revenues. Oil and gas likely have made Qatar the highest per-capita income country-ahead of Liechtenstein—and the country with the lowest unemployment. Proved oil reserves in excess of 25 billion barrels should enable continued output at current levels for 57 years. Qatar's proved reserves of natural gas exceed 25 trillion cubic meters, more than 13% of the world total and third largest in the world. Qatar's successful 2022 world cup bid will likely accelerate large-scale infrastructure projects such as Qatar's metro system and the Qatar-Bahrain causeway.

TRANSNATIONAL ISSUES

Disputes—International: none

Trafficking in persons: *current situation:*

Qatar is a destination country for men and women subjected to forced labor and, to a much lesser extent, forced prostitution; men and women from Nepal, India, Pakistan, Bangladesh, the Philippines, Indonesia, Vietnam, Sri Lanka, Ethiopia, Sudan, Thailand, Egypt, Syria, Jordan, and China voluntarily migrate to Qatar as low-skilled laborers and domestic servants, but some subsequently face conditions indicative of involuntary servitude as domestic workers and laborers, and, to a lesser extent, commercial sexual exploitation

tier rating: Tier 2 Watch List—the Government of Qatar does not fully comply with the minimum standards for the elimination of trafficking; it did not demonstrate evidence of significant efforts to punish traffickers or proactively identify victims; however, the government has a written plan that, if implemented, would largely bring the country into compliance with the minimum standards for the elimination of trafficking; it is devoting sufficient resources to implementing the plan (2009)

ROMANIA

INTRODUCTION

Background: The principalities of Wallachia and Moldavia—for centuries under the suzerainty of the Turkish Ottoman Empire—secured their autonomy in 1856; they were de facto linked in 1859 and formally united in 1862 under the new name of Romania. The country gained recognition of its independence in 1878. It joined the Allied Powers in World War I and acquired new territories—most notably Transylvania—following the conflict. In 1940, Romania allied with the Axis powers and participated in the 1941 German invasion of the USSR. Three years later, overrun by the Soviets, Romania signed an armistice. The post-war Soviet occupation led to the formation of a Communist “people’s republic” in 1947 and the abdication of the king. The decades-long rule of dictator Nicolae CEAUSESCU, who took power in 1965, and his Securitate police state became increasingly oppressive and draconian through the 1980s. CEAUSESCU was overthrown and executed in late 1989. Former Communists dominated the government until 1996 when they were swept from power. Romania joined NATO in 2004 and the EU in 2007.

ECONOMY

Economy—overview: Romania, which joined the European Union on 1 January 2007, began the transition from Communism in 1989 with a largely obsolete industrial base and a pattern of output unsuited to the country's needs. The country emerged in 2000 from a punishing three-year

recession thanks to strong demand in EU export markets. Domestic consumption and investment fueled strong GDP growth, but led to large current account imbalances. Romania's macroeconomic gains have only recently started to spur creation of a middle class and to address Romania's widespread poverty. Corruption and red tape continue to permeate its business environment. Inflation rose in 2007–08, driven by strong consumer demand and high wage growth, rising energy costs, a nation-wide drought, and a relaxation of fiscal discipline. As a result of the global financial crisis, Romania's GDP fell more than 7% in 2009, prompting Bucharest to seek a \$26 billion emergency assistance package from the IMF, the EU, and other international lenders. Drastic austerity measures, as part of Romania's IMF-led agreement, led to a 1.3% GDP contraction in 2010. The economy returned to positive growth in 2011 due to a strong export performance, but in a deflationary environment caused by bountiful crops and weak domestic demand. In March 2011, Romania and the IMF/EC/World Bank signed a 24-month precautionary stand-by agreement, worth \$4.9 billion, to promote compliance with fiscal targets, progress on structural reforms, and financial sector stability. The Romanian authorities have announced that they do not intend to draw funds from the facility.

TRANSNATIONAL ISSUES

Disputes—International: the ICJ ruled largely in favor of Romania in its dispute submitted in 2004 over Ukrainian-administered Zmiynyy/Serpilor (Snake) Island and Black Sea maritime boundary delimitation; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Illicit drugs: major transshipment point for Southwest Asian heroin transiting the Balkan route and small amounts of Latin American cocaine bound for Western Europe; although not a significant financial center, role as a narcotics conduit leaves it vulnerable to laundering, which occurs via the banking system, currency exchange houses, and casinos

RUSSIA

INTRODUCTION

Background: Founded in the 12th century, the Principality of Muscovy, was able to emerge from over 200 years of Mongol domination (13th-15th centuries) and to gradually conquer and absorb surrounding principalities. In the early 17th century, a new Romanov Dynasty continued this policy of expansion across Siberia to the Pacific. Under PETER I (ruled 1682-1725), hegemony was extended to the Baltic Sea and the country was renamed the Russian Empire. During the 19th century, more territorial acquisitions were made in Europe and Asia. Defeat in the Russo-Japanese War of 1904-05 contributed to the Revolution of 1905, which resulted in the formation of a parliament and other reforms. Repeated devastating defeats of the Russian army in World War I led to widespread rioting in the major cities of the Russian Empire and to the overthrow in 1917 of the imperial household. The Communists under Vladimir LENIN seized power soon after and formed the USSR. The brutal rule of Iosif STALIN (1928-53) strengthened Communist rule and Russian dominance of the Soviet Union at a cost of tens of millions of lives. The Soviet economy and society stagnated in the following decades until General Secretary Mikhail GORBACHEV (1985-91) introduced glasnost (openness) and perestroika (restructuring) in an attempt to modernize Communism, but his initiatives inadvertently released forces that by December 1991 splintered the USSR into Russia and 14 other independent republics. Since then, Russia has shifted its post-Soviet democratic ambitions in favor of a centralized semi-authoritarian state in which the leadership seeks to legitimize its rule through managed national elections, populist appeals by former President PUTIN, and continued economic growth. Russia has severely disabled a Chechen rebel movement, although violence still occurs throughout the North Caucasus.

Natural hazards: permafrost over much of Siberia is a major impediment to development; volcanic activity in the Kuril Islands; volcanoes and earthquakes on the Kamchatka Peninsula; spring floods and summer/autumn forest fires throughout Siberia and parts of European Russia **volcanism:** significant volcanic activity on the Kamchatka Peninsula and Kuril Islands; the peninsula alone is home to some 29 historically active volcanoes, with dozens more in the Kuril Islands; Kiliuchevskoi (elev. 4,835 m), which erupted in 2007 and 2010, is Kamchatka's most active volcano; Avachinsky and Koryaksky volcanoes, which pose a threat to the city of Petropavlovsk-Kamchatskiy, have been deemed "Decade Volcanoes" by the International Association of Volcanology and Chemistry of the Earth's Interior, worthy of study due to their explosive history and close proximity to human populations; other notable historically active volcanoes include Bezymianny, Chikurachki, Ebeko, Gorely, Grozny, Karymsky, Ketoi, Kronotsky, Ksudach, Medvezhia, Mutnovsky, Sarychev Peak, Shiveluch, Tiatia, Tolbachik, and Zheltovsky

Environment—current issues: air pollution from heavy industry, emissions of coal-fired electric plants, and transportation in major cities; industrial, municipal, and agricultural pollution of inland waterways and seacoasts; deforestation; soil erosion; soil contamination from improper application of agricultural chemicals; scattered areas of sometimes intense radioactive contamination; groundwater contamination from toxic waste; urban solid waste management; abandoned stocks of obsolete pesticides

Environment—international agreements: party to: Air Pollution, Air Pollution-Nitrogen Oxides, Air Pollution-Sulfur 85, Antarctic-Environmental Protocol, Antarctic-Marine Living Resources, Antarctic Seals, Antarctic Treaty, Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Endangered Species, Environmental Modification, Hazardous Wastes, Law of the Sea, Marine Dumping, Ozone Layer Protection, Ship Pollution, Tropical Timber 83, Wetlands, Whaling signed, but not ratified: Air Pollution-Sulfur 94

Geography—note: largest country in the world in terms of area but unfavorably located in relation to major sea lanes of the world; despite its size, much of the country lacks proper soils and climates (either too cold or too dry) for agriculture; Mount El'brus is Europe's tallest peak

Flag description: three equal horizontal bands of white (top), blue, and red
note: the colors may have been based on those of the Dutch flag; despite many popular interpretations, there is no official meaning assigned to the colors of the Russian flag; this flag inspired other Slav countries to adopt horizontal tricolors of the same colors but in different arrangements, and so red, blue, and white became the Pan-Slav colors

National symbol(s):

bear; double-headed eagle

National anthem: *name:* "Gimn Rossiyskoy Federatsii" (National Anthem of the Russian Federation)

lyrics/music: Sergei Vladimirovich MIKHALKOV/Alexandr Vasilievich ALEXANDROV

note: in 2000, Russia adopted the tune of the anthem of the former Soviet Union (composed in 1939); the lyrics, also adopted in 2000, were written by the same person who authored the Soviet lyrics in 1943

ECONOMY

Economy—overview: Russia has undergone significant changes since the collapse of the Soviet Union, moving from a globally-isolated, centrally-planned economy to a more market-based and globally-integrated economy. Economic reforms in the 1990s privatized most industry, with notable exceptions in the energy and defense-related sectors. The protection of property rights is still weak and the private sector remains subject to heavy state interference. Russian industry is primarily split between globally-competitive commodity producers. In 2011, Russia became the world's leading oil producer, surpassing Saudi Arabia; Russia is the second-largest producer of natural gas; Russia holds the world's largest natural gas reserves, the second-largest coal reserves, and the eighth-largest crude oil reserves. Russia is the third-largest exporter of both steel and primary aluminum. Other less competitive heavy industries remain dependent on the Russian domestic market. Russia's reliance on commodity exports makes it vulnerable to boom and bust cycles that follow the highly volatile swings in global commodity prices. The government since 2007 has embarked on an ambitious program to reduce this dependency and build up the country's high technology sectors, but with few results so far. The economy had averaged 7% growth in the decade following the 1998 Russian financial crisis, resulting in a doubling of real disposable incomes and the emergence of a middle class. The Russian economy, however, was one of the hardest hit by the 2008–09 global economic crisis as oil prices plummeted and the foreign credits that Russian banks and firms relied on dried up. According to the World Bank the government's anti-crisis package in 2008–09 amounted to roughly 6.7% of GDP. The Central Bank of Russia spent one-third of its \$600 billion international reserves, the world's third largest, in late 2008 to slow the devaluation of the

ruble. The government also devoted \$200 billion in a rescue plan to increase liquidity in the banking sector and aid Russian firms unable to roll over large foreign debts coming due. The economic decline bottomed out in mid-2009 and the economy began to grow in the third quarter of 2009. However, a severe drought and fires in central Russia reduced agricultural output, prompting a ban on grain exports for part of the year, and slowed growth in other sectors such as manufacturing and retail trade. High oil prices buoyed Russian growth in 2011 and helped Russia reduce the budget deficit inherited from the lean years of 2008–09. Russia has reduced unemployment since 2009 and has made progress on reducing inflation since 2010. Russia's long-term challenges include a shrinking workforce, a high level of corruption, difficulty in accessing capital for smaller, non-energy companies, and poor infrastructure in need of large investments.

country comparison to the world: 4

Telephones—mobile cellular:

238 million (2009)

country comparison to the world: 4

Telephone system: *general assessment:* the telephone system is experiencing significant changes; there are more than 1,000 companies licensed to offer communication services; access to digital lines has improved, particularly in urban centers; Internet and e-mail services are improving; Russia has made progress toward building the telecommunications infrastructure necessary for a market economy; the estimated number of mobile subscribers jumped from fewer than 1 million in 1998 to nearly 240 million by the end of 2010; a large demand for fixed line service remains unsatisfied

domestic: cross-country digital trunk lines run from Saint Petersburg to Khabarovsk, and from Moscow to Novorossiysk; the telephone systems in 60 regional capitals have modern digital infrastructures; cellular services, both analog and digital, are available in many areas; in rural areas, the telephone services are still outdated, inadequate, and low density

international: country code—7; Russia is connected internationally by undersea fiber optic cables; digital switches in several cities provide more than 50,000 lines for international calls; satellite earth stations provide access to Intelsat, Intersputnik, Eutelsat, Inmarsat, and Orbita systems (2008)

Broadcast media: 6 national TV stations with the federal government owning 1 and holding a controlling interest in a second; state-owned Gazprom maintains a controlling interest in a third national channel; government-affiliated Bank Rossiya owns controlling interest in a fourth and fifth, while the sixth national channel is owned by the Moscow city administration; roughly 3,300 national, regional, and local TV stations with over two-thirds completely or partially controlled by the federal or local governments; satellite TV services are available; 2 state-run national radio networks with a third majority-owned by Gazprom; roughly 2,400 public and commercial radio stations (2007)

TRANSNATIONAL ISSUES

Disputes—International: Russia remains concerned about the smuggling of poppy derivatives from Afghanistan through Central Asian countries; China and Russia have demarcated the once disputed islands at the Amur and Ussuri confluence and in the Argun River in accordance with the 2004 Agreement, ending their centuries-long border disputes; the sovereignty dispute over the islands of Etorofu, Kunashiri, Shikotan, and the Habomai group, known in Japan as the “Northern Territories” and in Russia as the “Southern Kurils,” occupied by the Soviet Union in 1945, now administered by Russia, and claimed by Japan, remains the primary sticking point to signing a peace treaty formally ending World War II hostilities; Russia’s military support and subsequent recognition of Abkhazia and South Ossetia independence in 2008 continue to sour relations with Georgia; Azerbaijan, Kazakhstan, and Russia ratified

Caspian seabed delimitation treaties based on equidistance, while Iran continues to insist on a one-fifth slice of the sea; Norway and Russia signed a comprehensive maritime boundary agreement in 2010; various groups in Finland advocate restoration of Karelia (Kareliya) and other areas ceded to the Soviet Union following World War II but the Finnish Government asserts no territorial demands; in May 2005, Russia recalled its signatures to the 1996 border agreements with Estonia (1996) and Latvia (1997), when the two Baltic states announced issuance of unilateral declarations referencing Soviet occupation and ensuing territorial losses; Russia demands better treatment of ethnic Russians in Estonia and Latvia; Estonian citizen groups continue to press for realignment of the boundary based on the 1920 Tartu Peace Treaty that would bring the now divided ethnic Setu people and parts of the Narva region within Estonia; Lithuania and Russia committed to demarcating their boundary in 2006 in accordance with the land and maritime treaty ratified by Russia in May 2003 and by Lithuania in 1999; Lithuania operates a simplified transit regime for Russian nationals traveling from the Kaliningrad coastal exclave into Russia, while still conforming, as an EU member state

with an EU external border, where strict Schengen border rules apply; preparations for the demarcation delimitation of land boundary with Ukraine have commenced; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov remains unresolved despite a December 2003 framework agreement and on-going expert-level discussions; Kazakhstan and Russia boundary delimitation was ratified on November 2005 and field demarcation should commence in 2007; Russian Duma has not yet ratified 1990 Bering Sea Maritime Boundary Agreement with the US; Denmark (Greenland) and Norway have made submissions to the Commission on the Limits of the Continental shelf (CLCS) and Russia is collecting additional data to augment its 2001 CLCS submission

Refugees and internally displaced persons: IDPs: 18,000–160,000 (displacement from Chechnya and North Ossetia) (2007)

Trafficking in persons: *current situation:* Russia is a source, transit, and destination country for men, women, and children trafficked for various purposes; people from Russia and other countries, including Belarus, Tajikistan, and Uzbekistan, are subjected to conditions of forced labor

in Russia; children are subjected to prostitution in large Russian cities and to forced begging; Russian women were reported to be victims of sex trafficking in many countries, including in Northeast Asia, Europe, and throughout the Middle East

tier rating: Tier 2 Watch List—Russia failed to show evidence of increased efforts to combat trafficking; victim protection in Russia remains very weak, as the government allocated scant funding for victim shelters and little funding for anti-trafficking efforts by governmental or non-governmental organizations; the government did not make discernible efforts to fund a national awareness campaign, although some local efforts were assisted by local government funding (2008)

Illicit drugs: limited cultivation of illicit cannabis and opium poppy and producer of methamphetamine, mostly for domestic consumption; government has active illicit crop eradication program; used as transshipment point for Asian opiates, cannabis, and Latin American cocaine bound for growing domestic markets, to a lesser extent Western and Central Europe, and occasionally to the US; major source of heroin precursor chemicals; corruption and organized crime are key concerns; major consumer of opiates

RWANDA

INTRODUCTION

Background: In 1959, three years before independence from Belgium, the majority ethnic group, the Hutus, overthrew the ruling Tutsi king. Over the next several years, thousands of Tutsis were killed, and some 150,000 driven into exile in neighboring countries. The children of these exiles later formed a rebel group, the Rwandan Patriotic Front (RPF), and began a civil war in 1990. The war, along with several political and economic upheavals, exacerbated ethnic tensions, culminating in April 1994

in a state-orchestrated genocide, in which Rwandans killed up to a million of their fellow citizens, including approximately three-quarters of the Tutsi population. The genocide ended later that same year when the predominantly Tutsi RPF, operating out of Uganda and northern Rwanda, defeated the national army and Hutu militias, and established an RPF-led government of national unity. Approximately 2 million Hutu refugees—many fearing Tutsi retribution—fled to neighboring Burundi, Tanzania, Uganda, and Zaire. Since then, most of the refugees have returned to Rwanda, but several thousand remained in the neighboring Democratic Republic of the Congo (DRC, the former Zaire) and formed an extremist insurgency bent on retaking Rwanda, much as the RPF tried in 1990. Rwanda held its first local elections in 1999 and its first post-genocide presidential and legislative elections in 2003. Rwanda in 2009 staged a joint military operation with the Congolese Army in DRC to rout out the Hutu extremist insurgency there and Kigali and Kinshasa restored diplomatic relations. Rwanda also joined the Commonwealth in late 2009.

ECONOMY

Economy—overview: Rwanda is a poor rural country with about 90% of the population engaged in (mainly subsistence) agriculture and some mineral and agro-processing. Tourism, minerals, coffee and tea are Rwanda's main sources of foreign exchange. Minerals exports declined 40% in 2009–10 due to the global economic downturn. The 1994 genocide decimated Rwanda's fragile economic base, severely impoverished the population, particularly women, and temporarily stalled the country's ability to attract private and external investment. However, Rwanda has made substantial progress in stabilizing and rehabilitating its economy to pre-1994 levels. GDP has rebounded with an average annual growth of 7%–8% since 2003 and inflation has been reduced to single digits. Nonetheless, a significant percent of the population still live below the official poverty line. Despite Rwanda's fertile ecosystem, food production often does not keep pace with demand, requiring food imports. Rwanda continues to receive substantial aid money and obtained IMF-World Bank Heavily Indebted Poor Country (HIPC) initiative debt relief in 2005–06. In recognition of Rwanda's successful management of its macro economy, in 2010, the IMF graduated Rwanda to a Policy Support Instrument (PSI). Rwanda also received a Millennium Challenge Threshold Program in 2008. Africa's most densely populated country is trying to overcome the limitations of its small, landlocked economy by leveraging regional trade. Rwanda joined the East African Community and is aligning its budget, trade, and immigration policies with its regional partners. The government has embraced an expansionary fiscal policy to reduce poverty by improving education, infrastructure, and foreign and domestic investment and pursuing market-oriented reforms. Energy shortages, instability in neighboring states, and lack of adequate transportation linkages to other countries continue to handicap private sector growth. The Rwandan government is seeking to become regional leader in information and communication technologies. In 2010, Rwanda neared completion of the first modern Special Economic Zone (SEZ) in Kigali. The SEZ seeks to attract investment in all sectors, but specifically in agribusiness, information and communications technologies, trade and logistics, mining, and construction. The global downturn hurt export demand and tourism, but economic growth is recovering, driven in large part by the services sector, and inflation has been contained. On the back of this growth, government is gradually ending its fiscal stimulus policy while protecting aid to the poor. In 2011 rises in global food and fuel prices increased inflation in Rwanda from 1% in January to more than 7% in October.

TRANSNATIONAL ISSUES**Disputes—international:**

Burundi and Rwanda dispute two sq km (0.8 sq mi) of Sabanerwa, a farmed area in the Rukurazi Valley where the Akanyaru/Kanyaru River shifted its course southward after heavy rains in 1965; fighting among ethnic groups—loosely associated political rebels, armed gangs, and various government forces in Great Lakes region transcending the boundaries of Burundi, Democratic Republic of the Congo (DROC), Rwanda, and Uganda—abated substantially from a decade ago due largely to UN peacekeeping, international mediation, and efforts by local governments to create civil societies; nonetheless, 57,000 Rwandan refugees still reside in 21 African states, including Zambia, Gabon, and 20,000 who fled to Burundi in 2005 and 2006 to escape drought and recriminations from traditional courts investigating the 1994 massacres; the 2005 DROC and Rwanda border verification mechanism to stem rebel actions on both sides of the border remains in place

Refugees and internally displaced persons:

refugees (*country of origin*): 46,272 (Democratic Republic of the Congo); 4,400 (Burundi) (2007)

domestic: direct dial capability with both fixed and wireless systems

international: country code-590; undersea fiber-optic cable provides voice and data connectivity to Puerto Rico and Guadeloupe

SAINT HELENA, ASCENSION, AND TRISTAN DA CUNHA

INTRODUCTION

Background: Saint Helena is a British Overseas Territory consisting of Saint Helena and Ascension Islands, and the island group of Tristan da Cunha.

Saint Helena: Uninhabited when first discovered by the Portuguese in 1502, Saint Helena was garrisoned by the British during the 17th century. It acquired fame as the place of Napoleon BONAPARTE's exile from 1815 until his death in 1821, but its importance as a port of call declined after the opening of the Suez Canal in 1869. During the Anglo-Boer War in South Africa, several thousand Boer prisoners were confined on the island between 1900 and 1903.

Ascension Island: This barren and uninhabited island was discovered and named by the Portuguese in 1503. The British garrisoned the island in 1815 to prevent a rescue of Napoleon from Saint Helena. It served as a provisioning station for the Royal Navy's West Africa Squadron on anti-slavery patrol. The island remained under Admiralty control until 1922, when it became a dependency of Saint Helena. During World War II, the UK permitted the US to construct an airfield on Ascension in support of trans-Atlantic flights to Africa and anti-submarine operations in the South Atlantic. In the 1960s the island became an important space tracking station for the US. In 1982, Ascension was an essential staging area for British forces during the Falklands War. It remains a critical refueling point in the air-bridge from the UK to the South Atlantic.

Tristan da Cunha: The island group consists of the islands of Tristan da Cunha, Nightingale, Inaccessible, and Gough. Tristan da Cunha is named after its Portuguese discoverer (1506); it was garrisoned by the British in 1816 to prevent any attempt to rescue Napoleon from Saint Helena. Gough and Inaccessible Islands have been designated World Heritage Sites. South Africa leases a site for a meteorological station on Gough Island.

GEOGRAPHY

Location: islands in the South Atlantic Ocean, about midway between South America and Africa; Ascension Island lies 700 nm northwest of Saint Helena; Tristan da Cunha lies 2,300 nm southwest of Saint Helena

Geographic coordinates:

Saint Helena: 15 57 S, 5 42 W

Ascension Island: 7 57 S, 14 22 W

Tristan da Cunha island group: 37 15 S, 12 30 W

Climate: *Saint Helena:* tropical marine; mild, tempered by trade winds

Ascension Island: tropical marine; mild, semi-arid

Tristan da Cunha: temperate marine; mild, tempered by trade winds (tends to be cooler than Saint Helena)

Terrain: the islands of this group result from volcanic activity associated with the Atlantic Mid-Ocean Ridge

Saint Helena: rugged, volcanic; small scattered plateaus and plains

Ascension: surface covered by lava flows and cinder cones of 44 dormant volcanoes; ground rises to the east

Tristan da Cunha: sheer cliffs line the coastline of the nearly circular island; the flanks of the central volcanic peak are deeply dissected; narrow coastal plain lies between The Peak and the coastal cliffs

Elevation extremes:

lowest point: Atlantic Ocean 0 m

highest point: Queen Mary's Peak on Tristan da Cunha 2,060 m; Green Mountain on Ascension Island 859 m; Mount Actaeon on Saint Helena Island 818 m

Natural resources: fish, lobster

Land use: *arable land:* 12.9%

permanent crops: 0%

other: 87.1% (2005)

Irrigated land: NA

Natural hazards: active volcanism on Tristan da Cunha

volcanism: the island volcanoes of Tristan da Cunha (elev. 2,060 m) and Nightingale Island (elev. 365 m) experience volcanic activity; Tristan da Cunha erupted in 1962 and Nightingale in 2004

Environment—current issues: NA

Geography—note: Saint Helena harbors at least 40 species of plants unknown elsewhere in the world; Ascension is a breeding ground for sea turtles and sooty terns; Queen Mary's

Peak on Tristan da Cunha is the highest island mountain in the South Atlantic and a prominent landmark on the sea lanes around southern Africa

SAINT KITTS AND NEVIS

INTRODUCTION

Background: Carib Indians occupied the islands for hundreds of years before the British began settlement in 1623. The islands became an associated state of the UK with full internal autonomy in 1967. The island of Anguilla rebelled and was allowed to secede in 1971. Saint Kitts and Nevis achieved independence in 1983. In 1998, a vote in Nevis on a referendum to separate from Saint Kitts fell short of the two-thirds majority needed. Nevis continues in its efforts to separate from Saint Kitts.

ECONOMY

Economy—overview: The economy of Saint Kitts and Nevis depends on tourism; since the 1970s tourism has replaced sugar as the traditional mainstay of the economy. Following the 2005 harvest, the government closed the sugar industry, after several decades of losses. To compensate for lost jobs, the government has embarked on a program to diversify the agricultural sector and to stimulate other sectors of the economy, such as export-oriented manufacturing and offshore banking. Roughly 200,000 tourists visited the islands in 2009, but reduced tourism arrivals and foreign investment led to an economic contraction in 2009 and 2010. Like other tourist destinations in the Caribbean, St. Kitts and Nevis is vulnerable to damage from natural disasters and shifts in tourism demand. A mild

recovery began in 2011. The current government is constrained by one of the world's highest public debt burdens -equivalent to roughly 200% of GDP in 2011—largely attributable to public enterprise losses.

SAINT LUCIA

INTRODUCTION

Background: The island, with its fine natural harbor at Castries, was contested between England and France throughout the 17th and early 18th centuries (changing possession 14 times); it was finally ceded to the UK in 1814. Even after the abolition of slavery on its plantations in 1834, Saint Lucia remained an agricultural island, dedicated to producing tropical commodity

crops. Self-government was granted in 1967 and independence in 1979.

ECONOMY

Economy—overview: The island nation has been able to attract foreign business and investment, especially in its offshore banking and tourism industries, with a surge in foreign direct investment in 2006, attributed to the construction of several tourism projects. Although crops such as bananas, mangos, and avocados continue to be grown for export, tourism provides Saint Lucia's main source of income and the industry is the island's biggest employer. Tourism is the main source of foreign exchange, although tourism sector revenues declined with the global economic downturn as US and European travel dropped in 2009. The manufacturing sector is the most diverse in the Eastern Caribbean area, and the government is trying to revitalize the banana industry, although recent hurricanes have caused exports to contract. Saint Lucia is vulnerable to a variety of external shocks including volatile tourism receipts, natural disasters, and dependence on foreign oil. High public debt and high debt servicing obligations constrain the ANTHONY administration's ability to respond to adverse external shocks. Economic fundamentals remain solid, even though unemployment needs to be reduced.

SAINT MARTIN

INTRODUCTION

Background: Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island in 1631 and set about exploiting its salt deposits. The Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished Saint Martin to the French and Dutch, who divided it between themselves in 1648. Friction between the two sides caused the border to frequently fluctuate over the next two centuries, with the French eventually holding the greater portion of the island (about 57%). The cultivation of sugar cane introduced slavery to the island in the late 18th century; the practice was not abolished until 1848. The island became a free port in 1939; the tourism industry was dramatically expanded during the 1970s and 1980s. In 2003, the populace of Saint Martin voted to secede from Guadeloupe and in 2007, the northern portion of the island became a French overseas collectiv-

ity. In 2010, the Dutch portion of the island became an independent nation within the Kingdom of the Netherlands.

GEOGRAPHY

National anthem: *note:* as a collectivity of France, "La Marseillaise" is official (see France)

ECONOMY

Economy—overview: The inhabitants have traditionally earned their livelihood by fishing and by servicing fishing fleets operating off the coast of Newfoundland. The economy has been declining, however, because of disputes with Canada over fishing quotas and a steady decline in the number of ships stopping at Saint Pierre. In 1992, an arbitration panel awarded the islands an exclusive economic zone of 12,348 sq km to settle a longstanding territorial dispute with Canada, although it represents only 25% of what France had sought. France heavily subsidizes the islands to the great betterment of living standards. The government hopes an expansion of tourism will boost economic prospects. Fish farming, crab fishing, and agriculture are being developed to diversify the local economy. Recent test drilling for oil may pave the way for development of the energy sector.

SAINT VINCENT AND THE GRENADINES

INTRODUCTION

Background: Resistance by native Caribs prevented colonization on Saint Vincent until 1719. Disputed between France and the United Kingdom for most of the 18th

century, the island was ceded to the latter in 1783. Between 1960 and 1962, Saint Vincent and the Grenadines was a separate administrative unit of the Federation of the West Indies. Autonomy was granted in 1969 and independence in 1979.

ECONOMY

Economy—overview: Success of the economy hinges upon seasonal variations in agriculture, tourism, and construction activity as well as remittance inflows. Much of the workforce is employed in banana production and tourism, but persistent high unemployment has prompted many to leave the islands. This lower-middle-income country is vulnerable to natural disasters—tropical storms wiped out substantial portions of crops in 1994, 1995, and 2002. In 2008, the islands had more than 200,000 tourist arrivals, mostly to the Grenadines, a drop of nearly 20% from

2007. Saint Vincent is home to a small offshore banking sector and has moved to adopt international regulatory standards. The government's ability to invest in social programs and respond to external shocks is constrained by its high public debt burden, which was 90% of GDP at the end of 2010. GDP growth reached a 10-year high of nearly 7% in 2006. Following the global downturn, St. Vincent and the Grenadines has experienced annual contractions since 2009. The GONSALVES administration is directing government resources to infrastructure projects, including a new international airport that is under construction.

SAMOA

INTRODUCTION

Background: New Zealand occupied the German protectorate of Western Samoa at

the outbreak of World War I in 1914. It continued to administer the islands as a mandate and then as a trust territory until 1962, when the islands became the first Polynesian nation to reestablish independence in the 20th century. The country dropped the "Western" from its name in 1997.

ECONOMY

Economy—overview: The economy of Samoa has traditionally been dependent on development aid, family remittances from overseas, agriculture, and fishing. The country is vulnerable to devastating storms. Agriculture employs two-thirds of the labor force and furnishes 90% of exports, featuring coconut cream, coconut oil, and copra. The manufacturing sector mainly processes agricultural products. One factory in the Foreign Trade Zone employs 3,000 people to make automobile electrical harnesses for an assembly plant in Australia. Tourism is an expanding sector accounting for 25% of GDP; 122,000 tourists visited the islands

in 2007. In late September 2009, an earthquake and the resulting tsunami severely damaged Samoa, and nearby American Samoa, disrupting transportation and power generation, and resulting in about 200 deaths. The Samoan Government has called for deregulation of the financial sector, encouragement of investment, and continued fiscal discipline, while at the same time protecting the environment. Observers point to the flexibility of the labor market as a basic strength for future economic advances. Foreign reserves are in a relatively healthy state, the external debt is stable, and inflation is low.

SAN MARINO

INTRODUCTION

Background: The third smallest state in Europe (after the Holy See and Monaco), San Marino also claims to be the world's oldest republic. According to tradition, it was founded by a Christian stonemason named Marinus in A.D. 301. San Marino's foreign policy is aligned with that of the European Union, although it is not a member; social and political trends in the republic track closely with those of its larger neighbor, Italy.

ECONOMY

Economy—overview: san Marino's economy relies heavily on its tourism and banking industries, as well as on the manufacture and export of ceramics, clothing, fabrics, furniture, paints, spirits, tiles, and wine. The per capita level of output and standard of living are comparable to those of the most prosperous regions of Italy, which supplies much of the food San Marino consumes. The economy benefits from foreign investment due to its relatively low corporate taxes and low taxes on interest earnings. San Marino has recently faced increased international pressure to improve cooperation with foreign tax authorities and transparency within its own banking sector, which generates about one-fifth of the country's tax revenues. Italy's implementation in October 2009 of a tax amnesty to repatriate untaxed funds held abroad has resulted in financial outflows from San Marino to Italy worth more than \$4.5 billion. Such outflows, combined with a money-laundering scandal at San Marino's largest financial institution and the recent global economic downturn, have contributed to a deep recession, a growing

budget deficit, and higher levels of debt. Industrial production has declined, especially in the textile sector, and exports have been hurt by the downturn in Italy, which accounts for 90% of San Marino's export market. The government has adopted measures to counter the economic downturn, including subsidized credit to businesses. San Marino also continues to work towards harmonizing its fiscal laws with EU members and international standards. In September 2009, the OECD removed San Marino from its list of tax havens that have yet to fully implement global tax standards, and in 2010 San Marino signed Tax Information Exchange Agreements with most major countries. San Marino's government continues to work with Italy to ratify a financial information exchange agreement, seen by businesses and investors as crucial to strengthening the economic relationship between the two countries.

SAO TOME AND PRINCIPE

INTRODUCTION

Background: Discovered and claimed by Portugal in the late 15th century, the islands' sugar-based economy gave way to coffee and cocoa in the 19th century—all grown with plantation slave labor, a form of which lingered into the 20th century.

While independence was achieved in 1975, democratic reforms were not instituted until the late 1980s. The country held its first free elections in 1991, but frequent internal wrangling between the various political parties precipitated repeated changes in leadership and two failed coup attempts in 1995 and 2003. The recent discovery of oil in the

Gulf of Guinea promises to attract increased attention to the small island nation.

ECONOMY

Economy—overview: This small, poor island economy has become increasingly dependent on cocoa since independence in 1975. Cocoa production has substantially declined in recent years because of drought and mismanagement. Sao Tome and Principe has to import fuels, most manufactured goods, consumer goods, and a substantial amount of food, making it vulnerable to fluctuations in global commodity prices. Over the years, it has had difficulty servicing its external debt and has relied heavily on concessional aid and debt rescheduling. Sao Tome and Principe benefited from \$200 million in debt relief in December 2000 under the Highly Indebted Poor Countries (HIPC) program, which helped bring down the country's \$300 million debt burden. In August 2005, the government signed on to a new 3-year IMF Poverty Reduction and Growth Facility (PRGF) program worth \$4.3 million. In April 2011 the country completed a Threshold Country Program with The Millennium Challenge Corporation to help increase tax revenues, reform customs, and improve the business environment. Considerable potential exists for development of a tourist industry, and the government has taken steps to expand facilities in recent years. The government also has attempted to reduce price controls and subsidies. Potential exists for the development of petroleum resources in Sao Tome and Principe's territorial waters in the oil-rich Gulf of Guinea, which are being jointly developed in a 60–40 split with Nigeria, but any actual production is at least several years off. The first production licenses were sold in 2004, though a dispute over licensing with Nigeria delayed the country's receipt of more than \$20 million in signing bonuses for almost a year. Maintaining control of inflation, fiscal discipline, and increasing flows of foreign direct investment into the oil sector, are the major economic problems facing the country.

Military—note: Sao Tome and Principe's army is a tiny force with almost no resources at its disposal and would be wholly ineffective operating unilaterally; infantry equipment is considered simple to operate and maintain but may require refurbishment or replacement after 25 years in tropical climates; poor pay, working conditions, and alleged nepotism in the promotion of officers have been problems in the past, as reflected in the 1995 and 2003 coups; these issues are being addressed with foreign assistance aimed at improving the army and its focus on realistic security concerns; command is exercised from the president, through the Minister of Defense, to the Chief of the Armed Forces staff (2005)

SAUDI ARABIA

INTRODUCTION

Background: Saudi Arabia is the birthplace of Islam and home to Islam's two holiest shrines in Mecca and Medina. The king's official title is the Custodian of the Two Holy Mosques. The modern Saudi state was founded in 1932 by ABD AL-AZIZ bin Abd al-Rahman Al SAUD (Ibn Saud) after a 30-year campaign to unify most of the Arabian Peninsula. One of his

male descendants rules the country today as required by the country's 1992 Basic Law. King ABDALLAH bin Abd al-Aziz ascended to the throne in 2005. Following Iraq's invasion of Kuwait in 1990, Saudi Arabia accepted the Kuwaiti royal family and 400,000 refugees while allowing Western and Arab troops to deploy on its soil for the liberation of Kuwait the following year. The continuing presence of foreign troops on Saudi soil after the liberation of

Kuwait became a source of tension between the royal family and the public until all operational US troops left the country in 2003. Major terrorist attacks in May and November 2003 spurred a strong on-going campaign against domestic terrorism and extremism. King ABDALLAH has continued the cautious reform program begun when he was crown prince. The king instituted an interfaith dialogue initiative in 2008 to encourage religious tolerance on

a global level; in 2009, he reshuffled the cabinet, which led to more moderates holding ministerial and judicial positions, and appointed the first female to the cabinet. The 2010–11 uprising across Middle Eastern and North African countries sparked modest incidents in Saudi cities, predominantly by Shia demonstrators calling for the release of detainees and the withdrawal from Bahrain of the Gulf Cooperation Council's Peninsula Shield Force. Protests in general were met by a strong police presence, with some arrests, but not the level of bloodshed seen in protests elsewhere in the region. In response to the unrest, King ABDALLAH in February and March 2011 announced a series of benefits to Saudi citizens including funds to build affordable housing, salary increases for government workers, and unemployment benefits. To promote increased political participation, the government held elections nationwide in September 2011 for half the members of 285 municipal councils. Also in September, the king announced that women will be allowed to run for and vote in future municipal elections—first held in 2005—and serve as full members of the advisory Consultative Council. The country remains a leading producer of oil and natural gas and holds more than 20% of the world's proven oil reserves. The government continues to pursue economic reform and diversification, particularly since Saudi Arabia's accession to the WTO in December 2005, and promotes foreign investment in the kingdom. A burgeoning population, aquifer depletion, and an economy largely dependent on petroleum output and prices are all ongoing governmental concerns.

Flag description: green, a traditional color in Islamic flags, with the Shahada or Muslim creed in large white Arabic script (translated as "There is no god but God; Muhammad is the Messenger of God") above a white horizontal saber (the tip points to the hoist side); design dates to the early twentieth century and is closely associated with the Al Saud family which established the kingdom in 1932; the flag is manufactured with differing obverse and reverse sides so that the Shahada reads—and the sword points—correctly from right to left on both sides

note: one of only three national flags that differ on their obverse and reverse sides—the others are Moldova and Paraguay

National symbol(s): palm tree surmounting two crossed swords

National anthem: name: "Aash Al Maleek" (Long Live Our Beloved King)

lyrics/music: Ibrahim KHAFAJI/Abdul Rahman al-KHATEEB

note: music adopted 1947, lyrics adopted 1984

ECONOMY

Economy—overview: Saudi Arabia has an oil-based economy with strong government controls over major economic activities. It possesses about one-fifth of the world's proven petroleum reserves, ranks as the largest exporter of petroleum, and plays a leading role in OPEC. The petroleum sector accounts for roughly 80% of budget revenues, 45% of GDP, and 90% of export earnings. Saudi Arabia is encouraging the growth of the private sector in order to diversify its economy and to employ more Saudi nationals. Diversification efforts are focusing on power generation, telecommunications, natural gas exploration, and petrochemical sectors. Almost 6 million foreign workers play an important role in the Saudi economy, particularly in the oil and service sectors, while Riyadh is struggling to reduce unemployment among its own nationals. Saudi officials are particularly focused on employing its large youth population, which generally lacks the education and technical skills the private sector needs. Riyadh has substantially boosted spending on job training and education, most recently with the opening of the King Abdallah University of Science and Technology—Saudi Arabia's first co-educational university. As part of its effort to attract foreign investment, Saudi Arabia acceded to the WTO in December 2005 after many years of negotiations. The government has begun establishing six "economic cities" in different regions of the country to promote foreign investment and plans to spend \$373 billion between 2010 and 2014 on social development and infrastructure projects to advance Saudi Arabia's economic development.

TRANSNATIONAL ISSUES

Disputes—International: Saudi Arabia has reinforced its concrete-filled security barrier along sections of the now fully demarcated border with Yemen to stem illegal cross-border activities; Kuwait and Saudi Arabia continue discussions on a maritime boundary with Iran; Saudi Arabia claims Egyptian-administered islands of Tiran and Sanafir

Refugees and internally displaced persons: refugees (country of origin): 240,015 (Palestinian Territories) (2007)

Trafficking in persons: current situation: Saudi Arabia is a destination country for men and women subjected to forced labor and to a much lesser extent, forced prostitution; men and women from Bangladesh, India, Sri Lanka, Nepal, Pakistan, the Philippines, Indonesia, Sudan, Ethiopia, Kenya, and many other countries voluntar-

ily travel to Saudi Arabia as domestic servants or other low-skilled laborers, but some subsequently face conditions indicative of involuntary servitude; women, primarily from Asian and African countries, were believed to have been forced into prostitution in Saudi Arabia; others were reportedly kidnapped and forced into prostitution after running away from abusive employers; Yemeni, Nigerian, Pakistani, Afghan, Chadian, and Sudanese children were subjected to forced labor as beggars and street vendors in Saudi Arabia, facilitated by criminal gangs; some Saudi nationals travel to destinations including Morocco, Egypt, Yemen, Afghanistan, Pakistan, India, and Bangladesh to solicit prostitution

tier rating: Tier 3—Saudi Arabia does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; however, the government undertook some efforts to improve its response to the vast human trafficking problem in Saudi Arabia, including training government officials on its 2009 anti-trafficking law and conducting surprise visits to places where victims may be found; it also achieved its first conviction under its human trafficking law; nonetheless, the government did not prosecute and punish a significant number of trafficking offenders or significantly improve victim protection services (2008)

Illicit drugs: death penalty for traffickers; improving anti-money-laundering legislation and enforcement

SENEGAL

INTRODUCTION

Background: The French colonies of Senegal and the French Sudan were merged in 1959 and granted their independence as the Mali Federation in 1960. The union broke up after only a few months. Senegal joined with The Gambia to form the nominal confederation of Senegambia in 1982. The envisaged integration of the two coun-

tries was never carried out, and the union was dissolved in 1989. The Movement of Democratic Forces in the Casamance (MFDC) has led a low-level separatist insurgency in southern Senegal since the 1980s, and several peace deals have failed to resolve the conflict. Nevertheless, Senegal remains one of the most stable democracies in Africa and has a long history of participating in international peacekeeping and regional mediation. Senegal was ruled by a Socialist Party for 40 years until Abdoulaye WADE was elected president in 2000. He was reelected in 2007 and during his two terms amended Senegal's constitution over a dozen times to increase executive power and to weaken the opposition. His attempt to change the constitution in June 2011 prompted large public protests and his decision to run for a third presidential term sparked a large public backlash that led to his defeat in a March 2012 runoff election with Macky SALL.

ECONOMY

Economy—overview: senegal relies heavily on donor assistance. The country's key export industries are phosphate mining, fertilizer production, and commercial fishing. The country is also working on iron ore and oil exploration projects. In January 1994, Senegal undertook a bold and ambitious economic reform program with the support of the international donor community. Government price controls and subsidies have been steadily dismantled. After seeing its economy contract by 2.1% in 1993, Senegal made an important turnaround, thanks to the reform program, with real growth in GDP averaging over 5% annually during 1995–2007. Annual inflation had been pushed down to the single digits. The country was adversely affected by the global economic downturn in 2009, when GDP growth fell to 2.2%. As a member of

the West African Economic and Monetary Union, Senegal is working toward greater regional integration with a unified external tariff and a more stable monetary policy. High unemployment, however, continues to prompt migrants to flee Senegal in search of better job opportunities in Europe. Under the IMF's Highly Indebted Poor Countries (HIPC) debt relief program, Senegal benefited from eradication of two-thirds of its bilateral, multilateral, and private-sector debt. In 2007, Senegal and the IMF agreed to a new, non-disbursing, Policy Support Initiative program which was completed in 2010. The IMF approved a new three-year policy support instrument in December 2010 to assist with economic reforms. Senegal receives disbursements from the \$540 million Millennium Challenge Account compact it signed in September 2009 for infrastructure and agriculture development. In 2010, the Senegalese people protested against frequent power cuts. The government pledged to expand power capacity by 2012 and to promote renewable energy, but until Senegal has more capacity, more protests are likely. Foreign investment in Senegal is retarded by Senegal's unfriendly business environment.

SERBIA

INTRODUCTION

Background: The Kingdom of Serbs, Croats, and Slovenes was formed in 1918; its name was changed to Yugoslavia in 1929. Various paramilitary bands resisted Nazi Germany's occupation and division of Yugoslavia from 1941 to 1945, but fought each other and ethnic opponents as much as the invaders. The military and political movement headed by Josip "TITO" Broz (Partisans) took full control of Yugoslavia when German and Croatian separatist forces were defeated in 1945. Although Communist, TITO's new government and his successors (he died in 1980) managed to steer their own path between the Warsaw Pact nations and the West for the next four and a half decades. In 1989, Slobodan MILOSEVIC became president of the Republic of Serbia and his ultranationalist calls for Serbian domination led to the violent breakup of Yugoslavia along ethnic lines. In 1991, Croatia, Slovenia, and Macedonia declared independence, followed by Bosnia in 1992. The remaining republics of Serbia and Montenegro declared a new Federal Republic of Yugoslavia (FRY) in April 1992 and under MILOSEVIC's leadership, Serbia led various military campaigns to unite ethnic Serbs in neighboring republics into a "Greater Serbia." These actions were ultimately unsuccessful and led to the signing of the Dayton Peace Accords in 1995. MILOSEVIC retained control over Serbia and eventually became president of the FRY in 1997. In 1998, an

ethnic Albanian insurgency in the formerly autonomous Serbian province of Kosovo provoked a Serbian counterinsurgency campaign that resulted in massacres and massive expulsions of ethnic Albanians living in Kosovo. The MILOSEVIC government's rejection of a proposed international settlement led to NATO's bombing of Serbia in the spring of 1999, to the withdrawal of Serbian military and police forces from Kosovo in June 1999, and to the stationing of a NATO-led force in Kosovo to provide a safe and secure environment for the region's ethnic communities. FRY elections in late 2000 led to the ouster of MILOSEVIC and the installation of democratic government. In 2003, the FRY became Serbia and Montenegro, a loose federation of the two republics. Widespread violence predominantly targeting ethnic Serbs in Kosovo in March 2004 caused the international community to open negotiations on the future status of Kosovo in January 2006. In June 2006, Montenegro seceded from the federation and declared itself an independent nation. Serbia subsequently gave notice that it was the successor state to the union of Serbia and Montenegro. In February 2008, after nearly two years of inconclusive negotiations, the UN-administered province of Kosovo declared itself independent of Serbia—an action Serbia refuses to recognize. At Serbia's request, the UN General Assembly (UNGA) in October 2008 sought an advisory opinion from the International Court of Justice (ICJ) on whether Kosovo's unilateral declaration of independence was in accordance with international law. In a ruling considered unfavorable to Serbia, the ICJ issued an advisory opinion in July 2010 stating that international law did not prohibit declarations of independence. In late 2010, Serbia agreed to an EU-drafted UNGA Resolution acknowledging the ICJ's decision and calling for a new round of talks between Serbia and Kosovo, this time on practical issues rather than Kosovo's status.

Flag description: three equal horizontal stripes of red (top), blue, and white—the Pan-Slav colors representing freedom and revolutionary ideals; charged with the coat of arms of Serbia shifted slightly to the hoist side; the principal field of the coat of arms represents the Serbian state and displays a white two-headed eagle on a red shield; a smaller red shield on the eagle represents the Serbian nation, and is divided into four quarters by a white cross; a white Cyrillic "С" in each quarter stands for the phrase "Only Unity Saves the Serbs"; a royal crown surmounts the coat of arms

note: the Pan-Slav colors were inspired by the 19th-century flag of Russia

National symbol(s): double-headed eagle

National anthem:

name: "Boze pravde" (God of Justice)

lyrics/music:

Jovan DORDEVIC/Davorin JENKO

note: adopted 1904; the song was originally written as part of a play in 1872 and has been used as an anthem by the Serbian people throughout the 20th and 21st centuries

ECONOMY

Economy—overview: Serbia has a transitional economy mostly dominated by market forces, but the state sector remains large and many institutional reforms are needed. The economy relies on manufacturing and exports, driven largely by foreign investment. MILOSEVIC-era mismanagement of the economy, an extended period of international economic sanctions, and the damage to Yugoslavia's infrastructure and industry during the NATO airstrikes in 1999 left the economy only half the size it was in 1990. After the ousting of former Federal Yugoslav President MILOSEVIC in September

2000, the Democratic Opposition of Serbia (DOS) coalition government implemented stabilization measures and embarked on a market reform program. After renewing its membership in the IMF in December 2000, Yugoslavia continued to reintegrate into the international community by rejoining the World Bank (IBRD) and the European Bank for Reconstruction and Development (EBRD). Serbia has made progress in trade liberalization and enterprise restructuring and privatization, but many large enterprises - including the power utilities, telecommunications company, natural gas company, national air carrier, and others - remain in state hands. Serbia has made some progress towards EU membership, signing a Stabilization and Association Agreement with Brussels in May 2008, and with full implementation of the Interim Trade Agreement with the EU in February 2010, but a decision on candidate status has been postponed to 2012. Serbia is also pursuing membership in the World Trade Organization, and accession negotiations are at an advanced stage. Structural economic reforms needed to ensure the country's long-term prosperity have largely stalled since the onset of the global financial crisis. Serbia, however, is slowly recovering from the crisis. Economic growth in 2011 was 2.0%, following a modest 1.0% increase in 2010 and a 3.5% contraction in 2009. High unemployment and stagnant household incomes are ongoing political and economic problems. Serbia signed a new \$1.3 billion Precautionary Stand By Arrangement with the IMF in September 2011 that was set to expire in March 2013, but the program was frozen in early 2012 because the 2012 budget approved by parliament deviates from the program parameters. Growing deficits constrain the use of stimulus efforts to revive the economy, while Serbia's concerns about inflation and exchange rate stability preclude the use of expansionary monetary policy. Serbia adopted a new long-term economic growth plan in 2010 that calls for a quadrupling of exports over ten years and heavy investments in basic infrastructure. Since the plan was adopted, Serbia has increased its exports significantly. Major challenges ahead include: high unemployment rates and the need for job creation; high government expenditures for salaries, pensions and unemployment benefits; a growing need for new government borrowing; rising public and private foreign debt; attracting new foreign direct investment; and getting the IMF program back on track. Other serious challenges include an inefficient judicial system, high levels of corruption, and an aging population. Factors favorable to Serbia's economic growth include a strategic location, a relatively inexpensive and skilled labor force, free trade agreements with the EU, Russia, Turkey, and Central European Free Trade agreement countries; and a generous package of incentives for foreign investments.

ECONOMY

Economy—overview: since independence in 1976, per capita output in this Indian Ocean archipelago has expanded to roughly seven times the pre-independence, near-subsistence level, moving the island into the upper-middle income group of countries. Growth has been led by the tourist sector, which employs about 30% of the labor force and provides more than 70% of hard currency earnings, and by tuna fishing. In recent years, the government has encouraged foreign investment to upgrade hotels and other services. At the same time, the government has moved to reduce the dependence on tourism by promoting the development of farming, fishing, and small-scale manufacturing. The Seychelles rupee was allowed to depreciate in 2006 after being overvalued for years and fell by 10% in the first 9 months of 2007. Despite these actions, the Seychelles economy struggled to maintain its gains and in 2008 suffered from food and oil price shocks, a foreign exchange shortage, high inflation, large financing gaps, and the global recession. In July 2008 the government defaulted on a Euro amortizing note worth roughly

US\$80 million, leading to a downgrading of Seychelles credit rating. In an effort to obtain loans to service its debt, Seychelles in November 2008 signed a standby arrangement with the IMF that mandated floating the exchange rate, removing foreign exchange controls, cutting government spending, and tightening monetary policy. In response to Seychelles' successful implementation of these policies, the IMF upgraded Seychelles to a three-year extended fund facility (EFF) of \$31 million in December 2009. In 2008, GDP fell more than 1% due to declining tourism and the initial effects of liberalization, but the economy recovered in 2010–11 after the reforms took hold and tourism increased. Seychelles is attempting to implement further structural reforms, including overhauling the tax system, reorganizing of state enterprises, and deregulating the finance and communications sectors.

INTRODUCTION

Background: Democracy is slowly being reestablished after the civil war from 1991 to 2002 that resulted in tens of thousands of deaths and the displacement of more than 2 million people (about a third of the population). The military, which took over full responsibility for security following the departure of UN peacekeepers at the end of 2005, is increasingly developing as a guarantor of the country's stability. The armed forces remained on the sideline during the 2007 presidential election but still look to the UN Integrated Office in Sierra Leone (UNIOSIL)—a civilian UN mission—to support efforts to consolidate peace. The new government's priorities include furthering development, creating jobs, and stamping out endemic corruption.

ECONOMY

Economy—overview: Sierra Leone is an extremely poor nation with tremendous inequality in income distribution. While it possesses substantial mineral, agricultural, and fishery resources, its physical and social infrastructure has yet to recover from the civil war, and serious social disorders continue to hamper economic development. Nearly half of the working-age population engages in subsistence agriculture. Manufacturing consists mainly of the processing of raw materials and of light manufacturing for the domestic market. Alluvial diamond mining remains the major source of hard currency earnings, accounting for nearly half of Sierra Leone's exports. The fate of the economy depends upon the maintenance of domestic peace and the continued receipt of substantial aid from abroad, which is essential to offset the severe trade imbalance and supplement government revenues. The IMF completed a Poverty Reduction and Growth Facility program that helped stabilize economic growth and reduce inflation and in 2010 approved a new program worth \$45 million over three years. Political stability has led to a revival of economic activity such as the rehabilitation of bauxite and rutile mining, which are set to benefit from planned tax incentives. A number of offshore oil discoveries were announced in 2009 and 2010. The development on these reserves, which could be significant, is still several years away.

TRANSNATIONAL ISSUES

Disputes—international: as domestic fighting among disparate ethnic groups, rebel groups, warlords, and youth gangs in Cote d'Ivoire, Guinea, Liberia, and Sierra Leone gradually abates, the number of refugees in border areas has begun to slowly dwindle; Sierra Leone considers excessive Guinea's definition of the flood plain limits to define the left bank boundary of the Makona and Moa rivers and protests Guinea's continued occupation of these lands including the hamlet of Yenga occupied since 1998

Refugees and internally displaced persons: *refugees (country of origin):* 27,311 (Liberia) (2007)

SINGAPORE

INTRODUCTION

Background: Singapore was founded as a British trading colony in 1819. It joined the Malaysian Federation in 1963 but separated two years later and became independent. Singapore subsequently became one of the world's most prosperous countries with strong international trading links (its port is one of the world's busiest in terms of tonnage handled) and with per capita GDP equal to that of the leading nations of Western Europe.

ECONOMY

Economy—overview: Singapore has a highly developed and successful free-market economy. It enjoys a remarkably open and corruption-free environment, stable prices, and a per capita GDP higher than that of most developed countries. The economy depends heavily on exports, particularly in consumer electronics, information technology products, pharmaceuticals, and on a growing financial services sector. Real GDP growth averaged 8.6% between 2004 and 2007. The economy contracted 1.0% in 2009 as a result of the global financial crisis, but rebounded 14.8% in 2010 and 4.9% in 2011, on the strength of renewed exports. Over the longer term, the government hopes to establish a new growth path that focuses on raising productivity, which has sunk to a compound annual growth rate of just 1.8% in the last decade. Singapore has attracted major investments in pharmaceuticals and medical technology production and will continue efforts to establish Singapore as Southeast Asia's financial and high-tech hub.

TRANSNATIONAL ISSUES

Disputes—International: disputes persist with Malaysia over deliveries of fresh water to Singapore, Singapore's extensive land reclamation works, bridge construction, and maritime boundaries in the Johor and Singapore Straits; in 2008, ICJ awarded sovereignty of Pedra Branca (Pulau Batu Puteh/Horsburgh Island) to Singapore, and Middle Rocks to Malaysia, but did not rule on maritime regimes, boundaries, or disposition of South Ledge; Indonesia and Singapore continue to work on finalization of their 1973 maritime boundary agreement by defining unresolved areas north of Indonesia's Batam Island; piracy remains a problem in the Malacca Strait

Illicit drugs: drug abuse limited because of aggressive law enforcement efforts; as a transportation and financial services hub, Singapore is vulnerable, despite strict laws and enforcement, as a venue for money laundering

SINT MAARTEN

INTRODUCTION

Background: Although sighted by Christopher COLUMBUS in 1493 and claimed for Spain, it was the Dutch who occupied the island in 1631 and set about exploiting its salt deposits. The Spanish retook the island in 1633, but continued to be harassed by the Dutch. The Spanish finally relinquished the island of Saint Martin to the French and Dutch, who divided it amongst themselves in 1648. The establishment of cotton, tobacco, and sugar plantations dramatically expanded slavery on the island in the 18th and 19th centuries;

the practice was not abolished in the Dutch half until 1863. The island's economy declined until 1939 when it became a free port; the tourism industry was dramatically expanded beginning in the 1950s. In 1954, Sint Maarten and several other Dutch Caribbean possessions became part of the Kingdom of the Netherlands as the Netherlands Antilles. In a 2000 referendum, the citizens of Sint Maarten voted to become a self-governing country within the Kingdom of the Netherlands. The change in status became effective in October of 2010 with the dissolution of the Netherlands Antilles.

Diplomatic representation from the US: the US does not have an embassy in Sint Maarten; the Consul General to Curacao is accredited to Sint Maarten

Flag description: two equal horizontal bands of red (top) and blue with a white isosceles triangle based on the hoist side; the center of the triangle displays the Sint Maarten coat of arms; the arms consist of an orange-bordered blue shield prominently displaying the white court house in Philipsburg, as well as a bouquet of yellow sage (the national flower) in the upper left, and the silhouette of a Dutch-French friendship monument in the upper right; the shield is surmounted by a yellow rising sun in front of which is a Brown Pelican in flight; a yellow scroll below the shield bears the motto: SEMPER PROGREDIENS (Always Progressing); the three main colors are identical to those on the Dutch flag
note: the flag somewhat resembles that of the Philippines, but with the main red and blue bands reversed; the banner more closely evokes the wartime Philippine flag

National anthem:

name: "O Sweet Saint Martin's Land"

lyrics/music: Gerard KEMPS

note: the song, written in 1958, is used as an unofficial anthem for the entire island (both French and Dutch sides); as a collectivity of France, in addition to the local anthem, "La Marseillaise" is official on the French side (see France); as a constituent part of the Kingdom of the Netherlands, in addition to the local anthem, "Het Wilhelmus" is official on the Dutch side (see Netherlands)

ECONOMY

Economy—overview: The economy of Sint Maarten centers around tourism with nearly four-fifths of the labor force engaged in this sector. Over one million visitors come to the island each year—1.3 million in 2008—with most arriving through the Princess Juliana International Airport. Cruise ships and yachts also call on Sint Maarten's

numerous ports and harbors. No significant agriculture and limited local fishing means that almost all food must be imported. Energy resources and manufactured goods are also imported. Sint Maarten had the highest per capita income among the five islands that formerly comprised the Netherlands Antilles.

SLOVAKIA

INTRODUCTION

Background: Slovakia's roots can be traced to the 9th century state of Great Moravia. Subsequently, the Slovaks became part of the Hungarian Kingdom, where they remained for the next 1,000 years. Following the formation of the dual Austro-Hungarian monarchy in 1867, language and education policies favoring the use of Hungarian (Magyarization) resulted in a strengthening of Slovak nationalism and a

cultivation of cultural ties with the closely related Czechs, who were themselves ruled by the Austrians. After the dissolution of the Austro-Hungarian Empire at the close of World War I, the Slovaks joined the Czechs to form Czechoslovakia. Following the chaos of World War II, Czechoslovakia became a Communist nation within Soviet-dominated Eastern Europe. Soviet influence collapsed in 1989 and Czechoslovakia once more became free. The Slovaks and the Czechs agreed to separate peace-

fully on 1 January 1993. Slovakia joined both NATO and the EU in the spring of 2004 and the euro area on 1 January 2009.

National anthem: *name:* "Nad Tatrou sa blýska" (Storm Over the Tatras)

lyrics/music: Janko MATUSKA/traditional
note: adopted 1993, in use since 1844; the anthem's music is based on the Slovak folk song "Kopala studienku"

ECONOMY

Economy—overview: Slovakia has made significant economic reforms since its separation from the Czech Republic in 1993. Reforms to the taxation, healthcare, pension, and social welfare systems helped Slovakia consolidate its budget and get on track to join the EU in 2004 after a period of relative stagnation in the early and mid 1990s and to adopt the euro in January 2009. Major privatizations are nearly complete, the banking sector is almost entirely in foreign hands, and the government has helped facilitate a foreign investment boom with business friendly policies. Slovakia's economic growth exceeded expectations in 2001-08 despite a general European slowdown. Foreign direct investment (FDI), especially in the automotive and electronic sectors, fueled much of the growth until 2008. Cheap and skilled labor, low taxes, a 19% flat tax for corporations and individuals, no dividend taxes, a relatively liberal labor code and a favorable geographical location are Slovakia's main advantages for foreign investors. The economy contracted 5% in 2009 primarily as a result of smaller inflows of FDI and reduced demand for Slovakia's exports before rebounding 4% in 2010 and 3.3% in 2011. Unemployment rose above 12% in 2010-11. The government of Prime Minister Iveta RADICOVA implemented reforms to curb corruption and improve government accountability—a major source of discontent with many Slovaks—and trimmed the budget deficit to 4.9% of GDP in 2011.

A map of Slovenia and its surrounding regions. Slovenia is centrally located, bordered by Austria to the north, Hungary to the northeast, Croatia to the south, and Bosnia and Herzegovina to the southwest. The capital, Ljubljana, is marked with a star. Other cities shown include Maribor, Ptuj, Celje, Kranj, Novo Mesto, and Nova Gorica. Mountainous regions like the Julian Alps and Karawanks are indicated. The Gulf of Trieste is visible to the southwest. A scale bar at the top left shows distances in kilometers (0, 20, 40) and miles (0, 20, 40).

Background: The Slovene lands were part of the Austro-Hungarian Empire until the latter's dissolution at the end of World War I. In 1918, the Slovenes joined the Serbs and Croats in forming a new multinational state, which was named Yugoslavia in 1929. After World War II, Slovenia became a republic of the renewed Yugoslavia, which though Communist, distanced itself from Moscow's rule. Dissatisfied with the exercise of power by the majority Serbs, the Slovenes succeeded in establishing their independence in 1991 after a short 10-day war. Historical ties to Western Europe, a strong economy, and a stable democracy have assisted in Slovenia's transformation to a modern state. Slovenia acceded to both NATO and the EU in the spring of 2004; it joined the eurozone in 2007.

Flag description: three equal horizontal bands of white (top), blue, and red, derive from the medieval coat of arms of the Duchy of Carniola; the Slovenian seal (a shield with the image of Triglav, Slovenia's highest peak, in white against a blue background at the center; beneath it are two wavy blue lines depicting seas and rivers, and above it are three six-pointed stars arranged in an inverted triangle, which are taken from the coat of arms of the Counts

of Celje, the great Slovene dynastic house of the late 14th and early 15th centuries) appears in the upper hoist side of the flag centered on the white and blue bands

National symbol(s): Mount Triglav

National anthem:

name: "Zdravljica" (A Toast)

lyrics/music: France PRESEREN/Stanko PREMRL

note: adopted 1989; the anthem was originally written in 1848; the full poem, whose seventh verse is used as the anthem, speaks of pan-Slavic nationalism

ECONOMY

Economy—overview: Slovenia became the first 2004 European Union entrant to adopt the euro (on 1 January 2007) and has experienced one of the most stable political and economic transitions in Central and Southeastern Europe. With the highest per capita GDP in Central Europe, Slovenia has excellent infrastructure, a well-educated work force, and a strategic location between the Balkans and Western Europe. Privatization has lagged since 2002, and the economy has one of highest levels of state control in the EU. Structural reforms to improve the business environment have allowed for somewhat greater foreign participation in Slovenia's economy and have helped to lower unemployment. In March 2004, Slovenia became the first transition country to graduate from borrower status to donor partner at the World Bank. In December 2007, Slovenia was invited to begin the accession process for joining the OECD. Despite its economic success, foreign direct investment (FDI) in Slovenia has lagged behind the region average, and taxes remain relatively high. Furthermore, the labor market is often seen as inflexible, and legacy industries are losing sales to more competitive firms in China, India, and elsewhere. In 2009, the world recession caused the economy to contract—through falling exports and industrial production—by 8%, and unemployment to rise. Although growth resumed in 2010, the unemployment rate continued to rise, approaching 11% in 2011.

TRANSNATIONAL ISSUES

Disputes—International: the Croatia-Slovenia land and maritime boundary agreement, which would have ceded most of Piran Bay and maritime access to Slovenia and several villages to Croatia, remains unratified and in dispute; Slovenia also protests Croatia's 2003 claim to an exclusive economic zone in the Adriatic; as a member state that forms part of the EU's external border, Slovenia has implemented the strict Schengen border rules to curb illegal migration and commerce through southeastern Europe while encouraging close cross-border ties with Croatia

Illicit drugs: minor transit point for cocaine and Southwest Asian heroin bound for Western Europe, and for precursor chemicals

SOLOMON ISLANDS

INTRODUCTION

Background:

The UK established a protectorate over the Solomon Islands in the 1890s. Some of the most bitter fighting of World War II occurred on this archipelago. Self-government was achieved in 1976 and independence two years later. Ethnic violence, government malfeasance, and endemic crime have undermined stability and civil society. In June 2003, then Prime Minister Sir Allan KEMAKEZA sought the assistance of Australia in reestablishing law and order; the following month, an Australian-led multinational force arrived to restore peace and disarm ethnic militias. The Regional Assistance Mission to the Solomon Islands (RAMSI) has generally been effective in restoring law and order and rebuilding government institutions.

ECONOMY

Economy—overview: The bulk of the popu-

lation depends on agriculture, fishing, and

forestry for at least part of its livelihood. Most

manufactured goods and petroleum products

must be imported. The islands are rich in

undeveloped mineral resources such as lead,

zinc, nickel, and gold. Prior to the arrival of

RAMSI, severe ethnic violence, the closing

of key businesses, and an empty government

treasury culminated in economic collapse.

RAMSI's efforts to restore law and order

and economic stability have led to modest

SOMALIA

INTRODUCTION

Background: Britain withdrew from British Somaliland in 1960 to allow its protectorate to join with Italian Somaliland and form the new nation of Somalia. In 1969, a coup headed by Mohamed SIAD Barre ushered in an authoritarian socialist rule characterized by the persecution, jailing and torture of political opponents and dissidents. After the regime's collapse early in 1991, Somalia descended into turmoil, factional fighting, and anarchy. In May 1991, northern clans declared an independent Republic of Somaliland that now includes the administrative regions of Awdal, Woqooyi Galbeed, Togdheer, Sanaag, and Sool. Although not recognized by any government, this entity has maintained a stable existence and continues efforts to establish a constitutional democracy, including holding municipal, parliamentary, and presidential elections. The regions of Bari, Nugaal, and northern Mudug comprise a neighboring semi-autonomous state of Puntland, which has been self-governing since 1998 but does not aim at independence; it has also made strides toward reconstructing a legitimate, representative government but has suffered some civil strife. Puntland disputes its border with Somaliland as it also claims portions of eastern Sool and Sanaag. Beginning in 1993, a two-year UN humanitarian effort (primarily in the south) was able to alleviate famine conditions, but when the UN withdrew in 1995, having suffered significant casualties, order still had not been restored. In 2000, the Somalia National Peace Conference (SNPC) held in Djibouti resulted in the formation of an interim government, known as the Transitional National Government (TNG). When the TNG failed to establish adequate security or governing institutions, the Government of Kenya, under the auspices of the Intergovernmental Authority on Development (IGAD), led a subsequent peace process that concluded in October 2004 with the election of Abdullahi YUSUF Ahmed as President of a second interim government, known as the Transitional Federal Government (TFG)

of the Somali Republic. The TFG included a 275-member parliamentary body, known as the Transitional Federal Parliament (TFP). President YUSUF resigned late in 2008 while United Nations-sponsored talks between the TFG and the opposition Alliance for the Re-Liberation of Somalia (ARS) were underway in Djibouti. In January 2009, following the creation of a TFG-ARS unity government, Ethiopian military forces, which had entered Somalia in December 2006 to support the TFG in the face of advances by the opposition Islamic Courts Union (ICU), withdrew from the country. The TFP was doubled in size to 550 seats with the addition of 200 ARS and 75 civil society members of parliament. The expanded parliament elected Sheikh SHARIF Sheikh Ahmed, the former ICU and ARS chairman as president in January 2009. The creation of the TFG was based on the Transitional Federal Charter (TFC), which outlined a five-year mandate leading to the establishment of a new Somali constitution and a transition to a representative government following national elections. In January 2009, the TFP amended the TFC to extend TFG's mandate until 2011. Somali principals in September 2011 agreed to a political roadmap that aims to institute a political transition by August 2012.

ECONOMY

Economy—overview: Despite the lack of effective national governance, Somalia has maintained a healthy informal economy, largely based on livestock, remittance/money transfer companies, and telecommunications. Agriculture is the most important sector with livestock normally accounting for about 40% of GDP and more than 50% of export earnings. Nomads and semi-pastoralists, who are dependent upon livestock for their livelihood, make up a large portion of the population. Livestock, hides, fish, charcoal, and bananas are Somalia's principal exports, while sugar, sorghum, corn, qat, and machined goods are the principal imports. Somalia's small industrial sector, based on the processing of agricultural products, has largely been looted and the machinery sold as scrap metal. Somalia's service sector has grown. Telecommunication firms provide wireless services in most major cities and offer the lowest international call rates on the continent. In the absence of a formal banking sector, money transfer/remittance services have sprouted throughout the country, handling up to \$1.6 billion in remittances annually. Mogadishu's main market offers a variety of goods from food to the newest electronic gadgets. Hotels continue to operate and are supported with private-security militias. Somalia's arrears to the IMF have continued to grow.

Transportation—note: the International Maritime Bureau reports the territorial and offshore waters in the Gulf of Aden and Indian Ocean remain the region of greatest risk for piracy and armed robbery against ships accounting for 50% of all attacks in 2010; 217 vessels, including commercial shipping and pleasure craft, were

attacked or hijacked both at anchor and while underway; hijackings off the coast of Somalia accounted for 92% of all ship seizures in 2010; as of May 2011, 26 vessels and 522 hostages were being held for ransom by Somali pirates; the presence of several naval task forces in the Gulf of Aden and additional anti-piracy measures on the part of ship operators have reduced piracy incidents in that body of water; in response Somali-based pirates, using hijacked fishing trawlers as "mother ships" to extend their range, shifted operations as far south as the Mozambique Channel and eastward to the vicinity of the Maldives

TRANSNATIONAL ISSUES

Disputes—International: Ethiopian forces invaded southern Somalia and routed Islamist Courts from Mogadishu

in January 2007; "Somaliland" secessionists provide port facilities in Berbera to landlocked Ethiopia and have established commercial ties with other regional states; "Puntland" and "Somaliland" "governments" seek international support in their secessionist aspirations and overlapping border claims; the undemarcated former British administrative line has little meaning as a political separation to rival clans within Ethiopia's Ogaden and southern Somalia's Oromo region; Kenya works hard to prevent the clan and militia fighting in Somalia from spreading south across the border, which has long been open to nomadic pastoralists

Refugees and internally displaced persons: IDPs: 1.1 million (civil war since 1988, clan-based competition for resources) (2007)

SOUTH AFRICA

INTRODUCTION

Background: Dutch traders landed at the southern tip of modern day South Africa in 1652 and established a stopover point on the spice route between the Netherlands and the Far East, founding the city of Cape Town. After the British seized the Cape of Good Hope area in 1806, many of the Dutch settlers (the Boers) trekked north to found their own republics. The discovery of diamonds (1867) and gold (1886) spurred wealth and immigration and intensified the subjugation of the native inhabitants. The Boers resisted British encroachments but were defeated in the Boer War (1899–1902); however, the British and the Afrikaners, as the Boers became known, ruled together beginning in 1910 under the Union of South Africa, which became a republic in 1961 after a whites-only referendum. In 1948, the National Party was voted into power and instituted a policy of apartheid—the separate development of the races—which favored the white minority

at the expense of the black majority. The African National Congress (ANC) led the opposition to apartheid and many top ANC leaders, such as Nelson MANDELA, spent decades in South Africa's prisons. Internal protests and insurgency, as well as boycotts by some Western nations and institutions, led to the regime's eventual willingness to negotiate a peaceful transition to majority rule. The first multi-racial elections in 1994 brought an end to apartheid and ushered in majority rule under an ANC-led government. South Africa since then has struggled to address apartheid-era imbalances in decent housing, education, and health care. ANC infighting, which has grown in recent years, came to a head in September 2008 when President Thabo MBEKI resigned, and Kgalema MOTLANTHE, the party's General-Secretary, succeeded him as interim president. Jacob ZUMA became president after the ANC won general elections in April 2009. In January 2011, South Africa assumed a nonpermanent seat on the UN Security Council for the 2011–12 term.

Flag description: two equal width horizontal bands of red (top) and blue separated by a central green band that splits into a horizontal Y, the arms of which end at the corners of the hoist side; the Y embraces a black isosceles triangle from which the arms are separated by narrow yellow bands; the red and blue bands are separated from the green band and its arms by narrow white stripes; the flag colors do not have any official symbolism, but the Y stands for the “convergence of diverse elements within South African society, taking the road ahead in unity”; black, yellow, and green are found on the flag of the African National Congress, while red, white, and blue are the colors in the flags of the Netherlands and the UK, whose settlers ruled South Africa during the colonial era **note:** the South African flag is one of only two national flags to display six colors as part of its primary design, the other is South Sudan's

National symbol(s): springbok antelope

National anthem:

name: “National Anthem of South Africa” **lyrics/music:** Enoch SONTONGA and Cornelius Jacob LANGENHOVEN/Enoch SONTONGA and Marthinus LOURENS de Villiers

note: adopted 1994; the anthem is a combination of “N’kosi Sikelel’ iAfrica” (God Bless Africa) and “Die Stem van Suid Afrika” (The Call of South Africa), which were respectively the anthems of the non-white and white communities under apartheid; the official lyrics contain a mixture of Xhosa, Zulu, Sesotho, Afrikaans, and English; the music incorporates the melody used in the Tanzanian and Zambian anthems

ECONOMY

Economy—overview: south Africa is a middle-income, emerging market with an abundant supply of natural resources; well-developed financial, legal, communications, energy, and transport sectors; a stock exchange that is the 18th largest in the world; and modern infrastructure supporting a relatively efficient distribution of goods to major urban centers throughout

the region. Growth was robust from 2004 to 2007 as South Africa reaped the benefits of macroeconomic stability and a global commodities boom but began to slow in the second half of 2007 due to an electricity crisis and the subsequent global financial crisis' impact on commodity prices and demand. GDP fell nearly 2% in 2009 but recovered in 2010–11. Unemployment remains high and outdated infrastructure has constrained growth. State power supplier Eskom encountered problems with aging plants and meeting electricity demand necessitating “load-shedding” cuts in 2007 and 2008 to residents and businesses in the major cities. Daunting economic problems remain from the apartheid era—especially poverty, lack of economic empowerment among the disadvantaged groups, and a shortage of public transportation. South Africa's economic policy is fiscally conservative focusing on controlling inflation and attaining a budget surplus. The current government largely follows these prudent policies but must contend with the impact of the global crisis and is facing growing pressure from special interest groups to use state-owned enterprises to deliver basic services to low-income areas and to increase job growth.

TRANSNATIONAL ISSUES

Disputes—International: South Africa has placed military along the border to apprehend the thousands of Zimbabweans fleeing economic dysfunction and political persecution; as of January 2007, South Africa also supports large numbers of refugees and asylum seekers from the Democratic Republic of the Congo (33,000), Somalia (20,000), Burundi (6,500), and

other states in Africa (26,000); managed dispute with Namibia over the location of the boundary in the Orange River; in 2006, Swazi king advocates resort to ICJ to claim parts of Mpumalanga and KwaZulu-Natal from South Africa

Refugees and internally displaced persons: refugees (country of origin): 10,772 (Democratic Republic of Congo); 7,818 (Somalia); 5,759 (Angola) (2007)

Illicit drugs: transshipment center for heroin, hashish, and cocaine, as well as a major cultivator of marijuana in its own right; cocaine and heroin consumption on the rise; world's largest market for illicit methaqualone, usually imported illegally from India through various east African countries, but increasingly producing its own synthetic drugs for domestic consumption; attractive venue for money launderers given the increasing level of organized criminal and narcotics activity in the region and the size of the South African economy

INTRODUCTION

Background: The islands, which have large bird and seal populations, lie approximately 1,000 km east of the Falkland Islands and have been under British administration since 1908—except for a brief period in 1982 when Argentina occupied them. Grytviken, on South Georgia, was a 19th and early 20th century whaling station. Famed explorer Ernest SHACKLETON stopped there in 1914 en route to his ill-fated attempt to cross Antarctica on foot. He returned some 20 months later with a few companions in a small boat and arranged a successful rescue for the rest of his crew, stranded off the Antarctic Peninsula. He died in 1922 on a subsequent expedition and is buried in Grytviken. Today, the station houses scientists from the British

Dependency status: overseas territory of the UK, also claimed by Argentina; administered from the Falkland Islands by a commissioner, who is concurrently governor of the Falkland Islands, representing Queen ELIZABETH II

Legal system: the laws of the UK where applicable apply; the senior magistrate from the Falkland Islands presides over the Magistrates Court

Diplomatic representation in the US:

Diplomatic representation from the US: none (overseas territory of the UK, also claimed by Argentina)

Flag description: blue, with the flag of the UK in the upper hoist-side quadrant and the South Georgia and South Sandwich Islands coat of arms centered on the outer half of the flag; the coat of arms features a

shield with a golden lion rampant, holding a torch; the shield is supported by a fur seal on the left and a Macaroni penguin on the right; a reindeer appears above the crest, and below the shield on a scroll is the motto LEO TERRAM PROPRIAM PROTEGAT (Let the Lion Protect its Own Land); the lion with the torch represents the UK and discovery; the background of the shield, blue and white estoiles, are found in the coat of arms of James Cook, discoverer of the islands; all the outer supporting animals represented are native to the islands

ECONOMY

Economy—overview: Some fishing takes place in adjacent waters. There is a potential source of income from harvesting finfish and krill. The islands receive income from postage stamps produced in the UK, sale of fishing licenses, and harbor and landing fees from tourist vessels. Tourism from specialized cruise ships is increasing rapidly.

SOUTH SUDAN

INTRODUCTION

Background: Egypt attempted to colonize the region of southern Sudan by establishing the province of Equatoria in the 1870s. Islamic Mahdist revolutionaries overran the region in 1885, but in 1898 a British force was able to overthrow the Mahdist regime. An Anglo-Egyptian Sudan was established the following year with Equatoria being the southernmost of its eight provinces. The isolated region was largely left to itself over the following decades, but Christian missionaries converted much of the population and facilitated the spread of English. When Sudan gained its independence in 1956, it was with the understanding that the southerners would be able to participate fully in the political system. When the Arab Khartoum government reneged on its promises, a mutiny began that led to two prolonged

periods of conflict (1955–1972 and 1983–2005) in which perhaps 2.5 million people died—mostly civilians—due to starvation and drought. Ongoing peace talks finally resulted in a Comprehensive Peace Agreement, signed in January 2005. As part of this agreement the south was granted a six-year period of autonomy to be followed by a referendum on final status. The result of this referendum, held in January 2011, was a vote of 98% in favor of secession. Independence was attained on 9 July 2011.

ECONOMY

Economy—overview: Industry and infrastructure in landlocked South Sudan are severely underdeveloped and poverty is widespread, following several decades of civil war with the north. Subsistence agriculture provides a living for the vast majority of the population. Property rights are tentative and price signals are missing because markets are not well organized. South Sudan has little infrastructure—just 60 km of paved roads. Electricity is produced mostly by costly diesel generators and running water is scarce. The government spends large sums of money to maintain a large army; delays in paying salaries have resulted in riots by unruly soldiers. Ethnic conflicts have resulted in a large number of civilian deaths and displacement. South Sudan depends largely on imports of goods, services, and capital from the north. Despite these disadvantages, South Sudan does have abundant natural resources. South Sudan produces nearly three-fourths of the former Sudan's total oil output of nearly a half million barrels per day. The government of South Sudan derives nearly 98% of its budget revenues from oil. Oil is exported through two pipelines that run to refineries and shipping facilities at Port Sudan on the Red Sea, and the 2005 oil sharing agreement with Khartoum called for a 50–50 sharing of oil revenues between the two entities. That deal expired on 9 July, however, when South Sudan became an independent country. The economy of South Sudan undoubtedly will remain linked to Sudan for some time, given the long lead time and great expense required to build another pipeline. In early 2012 South Sudan suspended production of oil because of its dispute with Sudan over transshipment fees. South Sudan holds one of the richest agricultural areas in Africa in the White Nile valley, which has fertile soils and abundant water supplies. Currently the region supports 10–20 million head of cattle. South Sudan also contains large wildlife herds, which could be exploited in the future to attract ecotourists. And the White Nile has sufficient flow to generate large quantities of hydroelectricity. South Sudan does not have large external debt or structural trade deficits. South Sudan has received more than \$4 billion in foreign aid since 2005, largely from the UK, US, Norway, and Netherlands, but Khartoum has imposed blockades on goods and capital going to South Sudan. The World Bank plans to support investment in

infrastructure, agriculture, and power generation. The Government of South Sudan set a target for economic growth of 6% for 2011, and expects 7.2% growth in 2012. Inflation stood at 8.6% in April 2011, with high fuel prices pushing up food prices. Following independence, South Sudan's central bank issued a new currency, the South Sudanese Pound, allowing a short grace period for turning in the old currency. Long term problems include alleviating poverty, maintaining macroeconomic stability, improving tax collection and financial management, focusing resources on speeding growth, and improving the business environment.

TRANSNATIONAL ISSUES

Disputes—International: South Sudan-Sudan boundary represents 1 January 1956 alignment, final alignment pending negotiations and demarcation; final sovereignty status of Abyei Area pending negotiations between South Sudan and Sudan; periodic violent skirmishes with South Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic; the boundary that separates Kenya and South Sudan's sovereignty is unclear in the "Ilemi Triangle," which Kenya has administered since colonial times

SOUTHERN OCEAN

INTRODUCTION

Background: A large body of recent oceanographic research has shown that the Antarctic Circumpolar Current (ACC), an ocean current that flows from west to east around Antarctica, plays a crucial role in global ocean circulation. The region where the cold waters of the ACC meet and mingle with the warmer waters of the north defines a distinct border—the Antarctic Convergence—which fluctuates with the seasons, but which encompasses a discrete body of water and a unique ecologic region. The Convergence concentrates nutrients, which promotes marine plant life, and which in turn allows for a greater abundance of animal life. In the spring of 2000, the International Hydrographic Organization decided to delimit the waters within the Convergence as a fifth world ocean—the Southern Ocean—by combining the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific Ocean. The Southern Ocean extends from the coast of Antarctica north to 60 degrees south latitude, which coincides with the Antarctic Treaty Limit and which approximates the extent of the Antarctic Convergence. As such, the Southern Ocean is now the fourth largest of the world's five oceans (after the Pacific Ocean, Atlantic Ocean, and Indian Ocean, but larger than the Arctic Ocean). It should be noted that inclusion of the Southern Ocean does not imply recognition of this feature as one of the world's primary oceans by the US Government.

GEOGRAPHY

Location: body of water between 60 degrees south latitude and Antarctica

Geographic coordinates: 60 00 S, 90 00 E (nominally), but the Southern Ocean has the unique distinction of being a large circumpolar body of water totally encircling the continent of Antarctica; this ring of water lies between 60 degrees south latitude and the coast of Antarctica and encompasses 360 degrees of longitude

Map references:

Antarctic Region

Area: *total:* 20.327 million sq km

note: includes Amundsen Sea, Bellingshausen Sea, part of the Drake Passage, Ross Sea, a small part of the Scotia Sea, Weddell Sea, and other tributary water bodies

Area—comparative: slightly more than twice the size of the US

Coastline: 17,968 km

Climate: sea temperatures vary from about 10 degrees Celsius to -2 degrees Celsius; cyclonic storms travel eastward around the continent and frequently are intense because of the temperature contrast between ice and open ocean; the ocean area from about latitude 40 south to the Antarctic Circle has the strongest average winds found anywhere on Earth; in winter the ocean freezes outward to 65 degrees south latitude in the Pacific sector and 55 degrees south latitude in the Atlantic sector, lowering surface temperatures well below 0 degrees Celsius; at some coastal points intense persistent drainage winds from the interior keep the shoreline ice-free throughout the winter

Terrain: the Southern Ocean is deep, 4,000 to 5,000 m over most of its extent with only limited areas of shallow water; the Antarctic continental shelf is generally narrow and unusually deep, its edge lying at depths of 400 to 800 m (the global mean is 133 m); the Antarctic icepack grows from an average

age minimum of 2.6 million sq km in March to about 18.8 million sq km in September, better than a sixfold increase in area; the Antarctic Circumpolar Current (21,000 km in length) moves perpetually eastward; it is the world's largest ocean current, transporting 130 million cubic meters of water per second—100 times the flow of all the world's rivers

Elevation extremes: lowest point: -7,235 m at the southern end of the South Sandwich Trench

highest point: sea level 0 m

Natural resources: probable large and possible giant oil and gas fields on the continental margin; manganese nodules, possible placer deposits, sand and gravel, fresh water as icebergs; squid, whales, and seals—none exploited; krill, fish

Natural hazards: huge icebergs with drafts up to several hundred meters; smaller bergs and iceberg fragments; sea ice (generally 0.5 to 1 m thick) with sometimes dynamic short-term variations and with large annual and interannual variations; deep continental shelf floored by glacial deposits varying widely over short distances; high winds and large waves much of the year; ship icing, especially May–October; most of region is remote from sources of search and rescue

Environment—current issues: increased solar ultraviolet radiation resulting from the Antarctic ozone hole in recent years, reducing marine primary productivity (phytoplankton) by as much as 15% and damaging the DNA of some fish; illegal, unreported, and unregulated fishing in recent years, especially the landing of an estimated five to six times more Patagonian toothfish than the regulated fishery, which is likely to affect the sustainability of the stock; large amount of incidental mortality of seabirds resulting from long-line fishing for toothfish

note: the now-protected fur seal population is making a strong comeback after severe overexploitation in the 18th and 19th centuries

Environment—international agreements: the Southern Ocean is subject to all international agreements regarding the

world's oceans; in addition, it is subject to these agreements specific to the Antarctic region: International Whaling Commission (prohibits commercial whaling south of 40 degrees south [south of 60 degrees south between 50 degrees and 130 degrees west]); Convention on the Conservation of Antarctic Seals (limits sealing); Convention on the Conservation of Antarctic Marine Living Resources (regulates fishing) *note:* many nations (including the US) prohibit mineral resource exploration and exploitation south of the fluctuating Polar Front (Antarctic Convergence), which is in the middle of the Antarctic Circumpolar Current and serves as the dividing line between the cold polar surface waters to the south and the warmer waters to the north

Geography—note: the major chokepoint is the Drake Passage between South America and Antarctica; the Polar Front (Antarctic Convergence) is the best natural definition of the northern extent of the Southern Ocean; it is a distinct region at the middle of the Antarctic Circumpolar Current that separates the cold polar surface waters to the south from the warmer waters to the north; the Front and the Current extend entirely around Antarctica, reaching south of 60 degrees south near New Zealand and near 48 degrees south in the far South Atlantic coinciding with the path of the maximum westerly winds

ECONOMY

Economy—overview: Fisheries in 2006–07 landed 126,976 metric tons, of which 82% (104,586 tons) was krill (*Euphausia superba*) and 9.5% (12,027 tons) Patagonian toothfish (*Dissostichus eleginoides*—also known as Chilean sea bass), compared to 127,910 tons in 2005–06 of which 83% (106,591 tons) was krill and 9.7% (12,396 tons) Patagonian toothfish (estimated fishing from the area covered by the Convention of the Conservation of Antarctic Marine Living Resources (CCAMLR), which extends slightly beyond the Southern Ocean area). International agreements

were adopted in late 1999 to reduce illegal, unreported, and unregulated fishing, which in the 2000–01 season landed, by one estimate, 8,376 metric tons of Patagonian and Antarctic toothfish. In the 2007–08 Antarctic summer, 45,213 tourists visited the Southern Ocean, compared to 35,552 in 2006–07, and 29,799 in 2005–06 (estimates provided to the Antarctic Treaty by the International Association of Antarctica Tour Operators (IAATO), and does not include passengers on overflights and those flying directly in and out of Antarctica).

TRANSPORTATION

Ports and terminals: McMurdo, Palmer, and offshore anchorages in Antarctica *note:* few ports or harbors exist on the southern side of the Southern Ocean; ice conditions limit use of most to short periods in midsummer; even then some cannot be entered without icebreaker escort; most Antarctic ports are operated by government research stations and, except in an emergency, are not open to commercial or private vessels

Transportation—note: Drake Passage offers alternative to transit through the Panama Canal

TRANSNATIONAL ISSUES

Disputes—international: Antarctic Treaty defers claims (see Antarctica entry), but Argentina, Australia, Chile, France, NZ, Norway, and UK assert claims (some overlapping), including the continental shelf in the Southern Ocean; several states have expressed an interest in extending those continental shelf claims under the United Nations Convention on the Law of the Sea to include undersea ridges; the US and most other states do not recognize the land or maritime claims of other states and have made no claims themselves (the US and Russia have reserved the right to do so); no formal claims exist in the waters in the sector between 90 degrees west and 150 degrees west

SPAIN

INTRODUCTION

Background: Spain's powerful world empire of the 16th and 17th centuries ultimately yielded command of the seas to England. Subsequent failure to embrace the mercantile and industrial revolutions caused the country to fall behind Britain, France, and Germany in economic and political power. Spain remained neutral in World Wars I and II but suffered through a devastating civil war (1936–39). A peaceful transition to democracy following the death of dictator Francisco FRANCO in

1975, and rapid economic modernization (Spain joined the EU in 1986) gave Spain a dynamic and rapidly growing economy and made it a global champion of freedom and human rights. The government's major focus for the immediate future will be on measures to reverse the severe economic recession that started in mid-2008.

GEOGRAPHY

Location: Southwestern Europe, bordering the Mediterranean Sea, North Atlantic Ocean, Bay of Biscay, and Pyrenees Mountains; southwest of France

Geographic coordinates:

40 00 N, 4 00 W

Map references: Europe

Area: total: 505,370 sq km

country comparison to the world: 51

land: 498,980 sq km

water: 6,390 sq km

note: there are two autonomous cities—Ceuta and Melilla—and 17 autonomous communities including Balearic Islands and Canary Islands, and three small Spanish possessions off the coast of Morocco—Islas Chafarinas, Penon de Alhucemas, and Penon de Velez de la Gomera

Area—comparative: slightly more than twice the size of Oregon

Land boundaries: total: 1,917.8 km

border countries: Andorra 63.7 km, France 623 km, Gibraltar 1.2 km, Portugal 1,214 km, Morocco (Ceuta) 6.3 km, Morocco (Melilla) 9.6 km

GOVERNMENT

Country name: conventional long form:

Kingdom of Spain

conventional short form: Spain

local long form: Reino de Espana

local short form: Espana

Government type: parliamentary monarchy

Capital: name: Madrid

geographic coordinates: 40 24 N, 3 41 W

time difference: UTC+1 (6 hours ahead of

Washington, DC during Standard Time)

daylight saving time: +1hr, begins last Sunday

in March; ends last Sunday in October

note: Spain is divided into two time zones including the Canary Islands

Administrative divisions: 17 autonomous communities (comunidades autonomas, singular—comunidad autonoma) and 2 autonomous cities* (ciudades autonomas, singular—ciudad autonoma); Andalusia, Aragon, Asturias, Baleares (Balearic Islands), Ceuta*, Canarias (Canary Islands), Cantabria, Castilla-La Mancha, Castilla y Leon, Cataluna (Catalonia), Comunidad Valenciana (Valencian Community), Extremadura, Galicia, La Rioja, Madrid, Melilla*, Murcia, Navarra, Pais Vasco (Basque Country)

note: the autonomous cities of Ceuta and Melilla plus three small islands of Islas Chafarinas, Penon de Alhucemas, and Penon de Velez de la Gomera, administered directly by the Spanish central government, are all along the coast of Morocco and are collectively referred to as Places of Sovereignty (Plazas de Soberania)

Independence: 1492; the Iberian peninsula was characterized by a variety of independent kingdoms prior to the Muslim occupation that began in the early 8th century A.D. and lasted nearly seven centuries; the small Christian redoubts of the north began the reconquest almost immediately, culminating in the seizure of Granada in 1492; this event completed the unification of several kingdoms and is traditionally considered the forging of present-day Spain

National holiday: National Day, 12 October (1492); year when Columbus first set foot in the Americas

Constitution: approved by legislature 31 October 1978; passed by referendum 6 December 1978; signed by the king 27 December 1978

Legal system: civil law system with regional variations

International law organization participation: accepts compulsory ICJ jurisdiction with reservations; accepts ICCt jurisdiction

Suffrage: 18 years of age; universal

Executive branch: chief of state: King JUAN CARLOS I (since 22 November 1975); Heir Apparent Prince FELIPE, son of the monarch, born 30 January 1968

head of government: President of the Government (Prime Minister equivalent) Mariano RAJOY (since 20 December 2011); Vice President (and Minister of the President's Office) Soraya Saez de SANTAMARIA (since 22 December 2011)

cabinet: Council of Ministers designated by the president (For more information visit the World Leaders website)

note: there is also a Council of State that is the supreme consultative organ of the government, but its recommendations are non-binding

elections: the monarchy is hereditary; following legislative elections, the leader of the majority party or the leader of the majority coalition usually proposed president by the monarch and elected by the National Assembly; election last held on 20 November 2011 (next to be held in November 2015); vice president appointed by the monarch on the proposal of the president

election results: Mariano RAJOY elected President of the Government; percent of vote—NA

Legislative branch: bicameral; General Courts or Las Cortes Generales (National Assembly) consists of the Senate or Senado (264 seats as of 2008; 208 members directly elected by popular vote and the other 56—as of 2008—appointed by the regional legislatures; members to serve four-year terms) and the Congress of Deputies or Congreso de los Diputados (350 seats; each of the 50 electoral provinces fills a minimum of two seats and the North African enclaves of Ceuta and Melilla fill one seat each with members serving a four-year term; the other 248 members are determined by proportional representation based on popular vote on block lists who serve four-year terms)

elections: Senate—last held on 20 November 2011 (next to be held by November 2015); Congress of Deputies—last held on 20 November 2011 (next to be held by November 2015)

election results: Senate—percent of vote by party—NA; seats by party—PP 136, PSOE 48, CiU 9, EAJ/PNV 4, Amair 3, other 8, members appointed by regional legislatures 56; Congress of Deputies—percent of vote by party—PP 44.6%, PSOE 28.8%, CiU 4.2%, IU 6.9%, Amair 1.4%, UPyD 4.7%, EAJ/PNV 2.4%, other 7.1%; seats by party—PP 186, PSOE 110, CiU 16, IU 11, Amair 7, UPyD 5, EAJ/PNV 5, other 10

Judicial branch: Supreme Court or Tribunal Supremo

Political parties and leaders: Amair [collective leadership] (a coalition of parties advocating the peaceful Basque independence from Spain); Basque Nationalist Party or PNV or EAJ [Inigo URKULLU Renteria]; Canarian Coalition or CC [Claudina MORALES Rodriguez] (a coalition of five parties); Convergence and Union or CiU [Josep Antoni DURAN i LLEIDA] (a coalition of the Democratic Convergence of Catalonia or CDC [Artur MAS i Gavarro] and the Democratic Union of Catalonia or UDC [Josep Antoni DURAN i LLEIDA]);

Entesa Catalonia de Progress (a Senate coalition grouping four Catalan parties—PSC, ERC, ICV, EUA); Galician Nationalist Bloc or BNG [Guillermo VAZQUEZ Vazquez]; Initiative for Catalonia Greens or ICV [Joan HERRA i Torres]; Yes to the Future or Geroa Bai [collective leadership] (a coalition of four Navarran parties); Popular Party or PP [Mariano RAJOY Brey]; Republican Left of Catalonia or ERC [Oriol JUNQUERAS i Vies]; Spanish Socialist Workers Party or PSOE; Union of People of Navarra or UPN [Yolanda BARCINA Angulo]; Union, Progress and Democracy or UPyD [Rosa DIEZ Gonzalez]; United Left or IU [Cayo LARA Moya] (a coalition of parties including the Communist Party of Spain or PCE and other small parties)

Political pressure groups and leaders:

Association for Victims of Terrorism or AVT (grassroots organization devoted primarily to supporting victims of the Basque Fatherland and Liberty (ETA) terrorist organization); 15-M or 15 May protest movement, which is also known as the Indignados, Spanish for the “indignant ones” (a loose association of grassroots organizations that advocate for greater accountability and transparency in Spanish politics, increased social justice and job creation); Socialist General Union of Workers or UGT and the smaller independent Workers Syndical Union or USO; Trade Union Confederation of Workers' Commissions or CC.OO. *other:* business and land-owning interests; Catholic Church; free labor unions (authorized in April 1977); university students

International organization participation:

ADB (nonregional member), AfDB (nonregional member), Arctic Council (observer), Australia Group, BCIE, BIS, CBSS (observer), CE, CERN, EAPC, EBRD, ECB, EIB, EMU, ESA, EU, FAO, FATF, IADB, IAEA, IBRD, ICAO, ICC, ICRM, IDA, IEA, IFAD, IFC, IFRCs, IHO, ILO, IMF, IMO, IMSO, Interpol, IOC, IOM, IPU, ISO, ITSO, ITU, ITUC, LAIA (observer), MIGA, MONUSCO, NATO, NEA, NSG, OAS (observer), OECD, OPCW, OSCE, Paris Club, PCA, Schengen Convention, SELEC (observer), SICA (observer), UN, UNCTAD, UNESCO, UNHCR, UNIDO, UNIFIL, Union Latina, UNRWA, UNWTO, UPU, WCO, WHO, WIPO, WMO, WTO, ZC

Flag description: three horizontal bands of red (top), yellow (double width), and red with the national coat of arms on the hoist side of the yellow band; the coat of arms is quartered to display the emblems of the traditional kingdoms of Spain (clockwise from upper left, Castile, Leon, Navarre, and Aragon) while Granada is represented by the stylized pomegranate at the bottom of the shield; the arms are framed by two columns representing the Pillars of Hercules, which are the two promontories (Gibraltar and Ceuta) on either side of the eastern end of the Strait of Gibraltar; the red scroll across the two columns bears the imperial motto of "Plus Ultra" (further beyond) referring to Spanish lands beyond Europe; the triband arrangement with the center stripe twice the width of the outer dates to the 18th century

note: the red and yellow colors are related to those of the oldest Spanish kingdoms: Aragon, Castile, Leon, and Navarre

National symbol(s): Pillars of Hercules

National anthem: name: "Himno Nacional Español" (National Anthem of Spain)

lyrics/music: none/unknown

note: officially in use between 1770 and 1931, restored in 1939; the Spanish anthem has no lyrics; in the years prior to 1931 it became known as "Marcha Real" (The Royal March); it first appeared in a 1761 military bugle call book and was replaced by "Himno de Riego" in the years between 1931 and 1939; the long version of the anthem is used for the king, while the short version is used for the prince, prime minister, and occasions such as sporting events

ECONOMY

Economy—overview: Spain's mixed capitalist economy is the 13th largest in the world, and its per capita income roughly matches that of Germany and France. However, after almost 15 years of above average GDP growth, the Spanish economy began to slow in late 2007 and entered into a recession in the second quarter of 2008. GDP contracted by 3.7% in 2009, ending a 16-year growth trend, and by another 0.1% in 2010, before turning positive in 2011, making Spain the last major economy to emerge from the global recession. The reversal in Spain's economic growth reflected a significant decline in construction amid an oversupply of housing and falling consumer spending, while exports actually have begun to grow. Government efforts to boost the economy through stimulus spending, extended unemployment benefits, and loan guarantees did not prevent a sharp rise in the unemployment rate, which rose from a low of about 8% in 2007 to over 20% in 2011. The government budget deficit worsened from 3.8% of GDP in 2008 to 9.2% of GDP in 2010, more than three times the euro-zone limit. Madrid cut the deficit to 8.5% of GDP in 2011, a larger deficit than the 6% target negotiated between

Spain and the EU. Spain's large budget deficit and poor economic growth prospects have made it vulnerable to financial contagion from other highly-indebted euro zone members despite the government's efforts to cut spending, privatize industries, and boost competitiveness through labor market reforms. Spanish banks' high exposure to the collapsed domestic construction and real estate market also poses a continued risk for the sector. The government oversaw a restructuring of the savings bank sector in 2010, and provided some \$15 billion in capital to various institutions. Investors remain concerned that Madrid may need to bail out more troubled banks. The Bank of Spain, however, is seeking to boost confidence in the financial sector by pressuring banks to come clean about their losses and consolidate into stronger groups.

TRANSNATIONAL ISSUES

Disputes—International: in 2002, Gibraltar residents voted overwhelmingly by referendum to reject any “shared sovereignty” arrangement; the government of Gibraltar insists on equal participation in talks between the UK and Spain; Spain disapproves of UK plans to grant Gibraltar greater autonomy; Morocco protests Spain’s control over the coastal enclaves of Ceuta, Melilla, and the islands of Penon de Velez de la Gomera, Penon de Alhucemas, and Islas Chafarinas, and surrounding waters; both countries claim Isla Perejil (Leila Island); Morocco serves as the primary launching site of illegal migration into Spain from North Africa; Portugal does not recognize Spanish sovereignty over the territory of Olivenza based on a

difference of interpretation of the 1815 Congress of Vienna and the 1801 Treaty of Badajoz

Illicit drugs: despite rigorous law enforcement efforts, North African, Latin Ameri-

can, Galician, and other European traffickers take advantage of Spain's long coastline to land large shipments of cocaine and hashish for distribution to the European market; consumer for Latin American cocaine and

North African hashish; destination and minor transshipment point for Southwest Asian heroin; money-laundering site for Colombian narcotics trafficking organizations and organized crime

SPRATLY ISLANDS

INTRODUCTION

Background: The Spratly Islands consist of more than 100 small islands or reefs. They are surrounded by rich fishing grounds and potentially by gas and oil deposits. They are claimed in their entirety by China, Taiwan, and Vietnam, while portions are claimed by Malaysia and the Philippines. About 45 islands are occupied by relatively small numbers of military forces from China, Malaysia, the Philippines, Taiwan, and Vietnam. Since 1985 Brunei has claimed a continental shelf that overlaps a southern reef but has not made any formal claim to the reef. Brunei claims an exclusive economic zone over this area.

GEOGRAPHY

Location: Southeastern Asia, group of reefs and islands in the South China Sea, about two-thirds of the way from southern Vietnam to the southern Philippines

Geographic coordinates: 8 38 N, 111 55 E

Map references: Southeast Asia

Area: total: less than 5 sq km

country comparison to the world: 245

land: less than 5 sq km

water: 0 sq km

note: includes 100 or so islets, coral reefs, and sea mounts scattered over an area of nearly 410,000 sq km of the central South China Sea

Area—comparative: NA

Land boundaries: 0 km

Coastline: 926 km

Maritime claims: NA

Climate: tropical

Terrain: flat

Elevation extremes:

lowest point: South China Sea 0 m

highest point: unnamed location on Southwest Cay 4 m

Natural resources: fish, guano, undetermined oil and natural gas potential

Land use: arable land: 0%

permanent crops: 0%

Irrigated land: 0 sq km

Natural hazards: typhoons; numerous reefs and shoals pose a serious maritime hazard

Environment—current issues: NA

Geography—note: strategically located near several primary shipping lanes in the central South China Sea; includes numerous small islands, atolls, shoals, and coral reefs

PEOPLE AND SOCIETY

Population: no indigenous inhabitants

note: there are scattered garrisons occupied by military personnel of several claimant states

GOVERNMENT

Country name:

conventional long form: none

conventional short form: Spratly Islands

ECONOMY

Economy—overview: Economic activity is limited to commercial fishing. The proximity to nearby oil- and gas-producing sedi-

mentary basins suggests the potential for oil and gas deposits, but the region is largely unexplored. There are no reliable estimates of potential reserves. Commercial exploitation has yet to be developed.

MILITARY

Military—note: Spratly Islands consist of more than 100 small islands or reefs of which about 45 are claimed and occupied by China, Malaysia, the Philippines, Taiwan, and Vietnam

TRANSNATIONAL ISSUES

Disputes—International: all of the Spratly Islands are claimed by China (including Taiwan) and Vietnam; parts of them are claimed by Brunei, Malaysia and the Philippines; despite no public territorial claim to Louisa Reef, Brunei implicitly lays claim by including it within the natural prolongation of its continental shelf and basis for a seabed median with Vietnam; claimants in November 2002 signed the "Declaration on the Conduct of Parties in the South China Sea," which has eased tensions but falls short of a legally binding "code of conduct"; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands

SRI LANKA

INTRODUCTION

Background: The first Sinhalese arrived in Sri Lanka late in the 6th century B.C., probably from northern India. Buddhism was introduced in about the mid-third century B.C., and a great civilization developed at the cities of Anuradhapura (kingdom from circa 200 B.C. to circa A.D. 1000) and Polonnaruwa (from about 1070 to 1200). In the 14th century, a south Indian dynasty established a Tamil kingdom in northern Sri Lanka. The coastal areas of the island were controlled by the Portuguese in the 16th century and by the Dutch in the 17th century. The island was ceded to the British in 1796, became a crown colony in 1802, and was formally united under British rule by 1815. As Ceylon, it became independent in 1948; its name was changed to Sri Lanka in 1972. Tensions between the Sinhalese majority and Tamil separatists erupted into war in 1983. After two decades of fighting, the government and Liberation Tigers of Tamil Eelam (LTTE) formalized a cease-fire in February 2002 with Norway brokering peace negotiations. Violence between the LTTE and government forces intensified in 2006, but the government regained control of the Eastern Province in 2007. By May 2009, the government announced that its military had defeated the remnants of the LTTE. Since the end of the conflict, the government has enacted an ambitious program of economic development projects, many of which are financed by loans from the Government of China. In addition to efforts to reconstruct its economy, the government has resettled more than 95% of those civilians who were displaced during the final phase of the conflict and released the vast majority of former LTTE combatants captured by Government Security Forces. At the same time, there has been little progress on more contentious and politically difficult issues such as reaching a political settlement with Tamil elected representatives and holding accountable those alleged to have been involved in human rights violations at the end of the war.

Flag description: yellow with two panels;
the smaller hoist-side panel has two equal
vertical bands of green (hoist side) and
orange; the other larger panel depicts a yel-
low lion holding a sword on a dark red rec-
tangular field that also displays a yellow bo
leaf in each corner; the yellow field appears
as a border around the entire flag and
extends between the two panels; the lion
represents Sinhalese ethnicity, the strength
of the nation, and bravery; the sword dem-
onstrates the sovereignty of the nation; the
four bo leaves—symbolizing Buddhism and
its influence on the country—stand for the
four virtues of kindness, friendliness, hap-
piness, and equanimity; orange signifies
Sri Lankan Tamils, green the Sri Lankan
Moors; dark red represents the European
burghers, but also refers to the rich colonial
background of the country; yellow denotes
other ethnic groups; also referred to as the

ECONOMY

Economy—overview: Sri Lanka continues to experience strong economic growth, driven by large-scale reconstruction and development projects following the end of the 26-year conflict with the LTTE. Sri Lanka is pursuing a combination of government directed policies, private investment, both foreign and domestic, to spur growth in disadvantaged areas, develop small and medium enterprises, and increase agricultural productivity. The government struggles with high debt interest payments, a bloated civil service, and historically high budget deficits. However recent reforms to the tax code have resulted in higher revenue and lower budget deficits in recent years. The 2008–09 global financial crisis and recession exposed Sri Lanka's economic vulnerabilities and nearly caused a balance of payments crisis. Growth slowed to 3.5% in 2009. Economic activity rebounded strongly with the end of the war and an IMF agreement, resulting in two straight years of high growth in 2010 and 2011. Per capita income of \$5,600 on a purchasing power parity basis is among the highest in the region.

SUDAN

INTRODUCTION

Background: Military regimes favoring Islamic-oriented governments have dominated national politics since independence from the UK in 1956. Sudan was embroiled in two prolonged civil wars during most of the remainder of the 20th century. These conflicts were rooted in northern economic, political, and social domination of largely non-Muslim, non-Arab southern Sudanese. The first civil war ended in 1972 but broke out again in 1983. The second war and famine-related effects resulted in

more than four million people displaced and, according to rebel estimates, more than two million deaths over a period of two decades. Peace talks gained momentum in 2002–04 with the signing of several accords. The final North/South Comprehensive Peace Agreement (CPA), signed in January 2005, granted the southern rebels autonomy for six years followed by a referendum on independence for Southern Sudan. The referendum was held in January 2011 and indicated overwhelming support for independence. South Sudan became independent on 9 July 2011. Since southern independence Sudan has been combating rebels from the Sudan People's Liberation Movement-North (SPLM-N) in Southern Kordofan and Blue Nile states. A separate conflict, which broke out in the western region of Darfur in 2003, has displaced nearly two million people and caused an estimated 200,000 to 400,000 deaths. The UN took command of the Darfur peacekeeping operation from the African Union in December 2007. Peacekeeping troops have struggled to stabilize the situation, which has become increasingly regional in scope and has brought instability to eastern Chad. Sudan also has faced large refugee influxes from neighboring countries primarily Ethiopia and Chad. Armed conflict, poor transport infrastructure, and lack

of government support have chronically obstructed the provision of humanitarian assistance to affected populations.

ECONOMY

Economy—overview: Sudan is an extremely poor country that has had to deal with social conflict, civil war, and the July 2011 secession of South Sudan—the region of the country that had been responsible for about three-fourths of the former Sudan's total oil production. The oil sector had driven much of Sudan's GDP growth since it began exporting oil in 1999. For nearly a decade, the economy boomed on the back of increases in oil production, high oil prices, and significant inflows of foreign direct investment. Following South Sudan's secession, Sudan has struggled to maintain economic stability, because oil earnings now provide a far lower share of the country's need for hard currency and for budget revenues. Sudan is attempting to generate new sources of revenues, such as from gold mining, while carrying out an austerity program to reduce expenditures. Services and utilities have played an

increasingly important role in the economy. Agricultural production continues to employ 80% of the work force and contributes a third of GDP. Sudan introduced a new currency, still called the Sudanese pound, following South Sudan's secession, but the value of the currency has fallen since its introduction and shortages of foreign exchange continue. Sudan also faces rising inflation, which has led to a number of small scale protests in Khartoum in recent months. Ongoing conflicts in Southern Kordofan, Darfur, and the Blue Nile states, lack of basic infrastructure in large areas, and reliance by much of the population on subsistence agriculture ensure that much of the population will remain at or below the poverty line for years to come.

TRANSNATIONAL ISSUES

Disputes—International: the effects of Sudan's almost constant ethnic and rebel militia fighting since the mid-20th century have penetrated all of the neighboring states; Chad wishes to be a helpful mediator in resolving the Darfur conflict, and in 2010 established a joint border monitoring force with Sudan, which has helped to reduce cross-border banditry and violence; as of 2006, Chad, Ethiopia, Kenya, Central African Republic, Democratic Republic of the Congo, and Uganda provided shelter for over a half million Sudanese refugees, which include 240,000 Darfur residents

driven from their homes by Janjawid armed militia and Sudanese military forces; as of January 2011, Sudan, in turn, hosted about 138,700 Eritreans, 43,000 Chadians, and smaller numbers of Ethiopians; Sudan accuses Eritrea of supporting Sudanese rebel groups; efforts to demarcate the porous boundary with Ethiopia proceed slowly due to civil and ethnic fighting in eastern Sudan; Sudan claims but Egypt de facto administers security and economic development of Halaib region north of the 22nd parallel boundary; periodic violent skirmishes with Sudanese residents over water and grazing rights persist among related pastoral populations along the border with the Central African Republic; South Sudan-Sudan boundary represents 1 January 1956 alignment, final alignment pending negotiations and demarcation; final sovereignty status of Abyei Area pending negotiations between South Sudan and Sudan

Refugees and internally displaced persons: *refugees (country of origin):* 162,000 (Eritrea); 43,000 (Chad); 11,009 (Ethiopia) *IDPs:* more than 4 million (civil war 1983–2005; ongoing conflict in Darfur region) (2007)

Trafficking in persons: *current situation:* Sudan is a source, transit, and destination country for men, women, and children who are subjected to forced labor and sex trafficking; Sudanese women and girls, particularly those from rural areas or who are internally displaced, are vulnerable to forced labor as domestic workers in homes throughout the country; some of these women and girls are subsequently sexually abused by male occupants of the household or forced to engage in commercial sex acts; Sudanese women and girls are subjected to domestic servitude in Middle Eastern countries, such as Bahrain, Saudi Arabia, and Qatar, and to forced sex trafficking in European countries; some Sudanese men who voluntarily migrate to

the Middle East as low-skilled laborers face conditions indicative of forced labor; Sudanese children transit Yemen en route to Saudi Arabia, where they are used in forced begging and street vending, and reportedly work in exploitative labor situations for Sudanese traders in the Central African Republic; Sudan is a transit and destination country for Ethiopian and Eritrean women subjected to domestic servitude in Sudan and Middle Eastern countries; Sudan is a destination for Ethiopian, Somali, and possibly Thai women subjected to forced prostitution *tier rating:* Tier 3—Sudan does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; while the government took some steps to identify, demobilize, and reintegrate child soldiers during the reporting period, combating human trafficking through law enforcement, protection, or prevention measures was not a priority (2008)

SURINAME

INTRODUCTION

Background: First explored by the Spaniards in the 16th century and then settled by the English in the mid-17th century, Suriname became a Dutch colony in 1667. With the abolition of slavery in 1863, workers were brought in from India and Java. Independence from the Netherlands was granted in 1975. Five years later the civilian government was replaced by a military regime that soon declared a socialist republic. It continued to exert control through a succession of nominally civilian administrations until 1987, when international pressure finally forced a democratic election. In 1990, the military overthrew the civilian leadership, but a democratically elected government—a four-party coalition—returned to power in 1991. The coalition expanded to eight parties in 2005 and ruled until August 2010, when voters returned

former military leader Desire BOUTERSE and his opposition coalition to power.

ECONOMY

Economy—overview: The economy is dominated by the mining industry, with exports of alumina, gold, and oil accounting for about 85% of exports and 25% of government revenues, making the economy highly vulnerable to mineral price volatility. Economic growth, which reached about 7% in 2008, owing to sizeable foreign investment in mining and oil, slowed to 2.2% in 2009 as investment waned and the country earned less from its commodity exports when global prices for most commodities fell. Trade picked up, boosting Suriname's economic growth in 2010 to 4.4%, but the government's budget remained strained, with increased social spending during the election. Inflation rose from 1.3% in 2009 to 6.9% in 2010. In January 2011, the government devalued the currency by 20% and raised taxes to reduce the budget deficit. Suriname's economic prospects for the medium term will depend on continued commitment to responsible monetary and fiscal policies and to the introduction of structural reforms to liberalize markets and promote competition.

TRANSNATIONAL ISSUES

Disputes—International: area claimed by French Guiana between Riviere Litani and Riviere Marouini (both headwaters of the Lawa); Suriname claims a triangle of land between the New and Kutari/Koetari rivers in a historic dispute over the headwaters of the Courantyne; Guyana seeks United Nations Convention on the Law of the Sea arbitration to resolve the longstanding dispute with Suriname over the axis of the territorial sea boundary in potentially oil-rich waters

Illicit drugs: growing transshipment point for South American drugs destined for Europe via the Netherlands and Brazil; transshipment point for arms-for-drugs dealing

SVALBARD

INTRODUCTION

Background: First discovered by the Norwegians in the 12th century, the islands served as an international whaling base during the 17th and 18th centuries. Norway's sovereignty was recognized in 1920; five years later it officially took over the territory.

GEOGRAPHY

ECONOMY

Economy—overview: Coal mining, tourism, and international research are the major revenue sources on Svalbard. Coal mining is the dominant economic activity and a treaty of 9 February 1920 gave the 41 signatories equal rights to exploit mineral deposits, subject to Norwegian regulation. Although US, UK, Dutch, and Swedish coal companies have mined in the past, the only companies still engaging in this are Norwegian and Russian. The settlements on Svalbard are essentially company towns. The Norwegian state-owned coal company employs nearly 60% of the Norwegian population on the island, runs many of the local services, and provides most of the local infrastructure. There is also some hunting of seal, reindeer, and fox. Goods such as alcohol, tobacco, and vehicles, normally highly taxed on mainland Norway, are con-

siderably cheaper in Svalbard in an effort by the Norwegian government to entice more people to live on the Arctic archipelago.

SWAZILAND

INTRODUCTION

Background: Autonomy for the Swazis of southern Africa was guaranteed by the British in the late 19th century; independence was granted in 1968. Student and labor unrest during the 1990s pressured King MSWATI III, Africa's last absolute monarch, to grudgingly allow political reform and greater democracy, although he has backslid on these promises in recent years. A constitution came into effect in 2006, but the legal status of political parties remains unclear. The African United Democratic Party tried unsuccessfully to register as an official political party in mid 2006. Talks over the constitution broke down between the government and progressive groups in 2007. Swaziland recently surpassed Botswana as the country with the world's highest known HIV/AIDS prevalence rate.

ECONOMY

Economy—overview: surrounded by South Africa, except for a short border with Mozambique, Swaziland depends heavily on South Africa from which it receives more than 90% of its imports and to which it sends 60% of its exports. Swaziland's currency is pegged to the South African rand, effectively subsuming Swaziland's monetary policy to South Africa. The government is heavily dependent on customs duties from the Southern African Customs Union (SACU), and worker remittances from South Africa supplement domestically earned income. Subsistence agriculture employs approximately 70% of the population. The manufacturing sector has diversified since the mid-1980s. Sugar and wood pulp were major foreign exchange earners; however, the wood pulp producer closed in January 2010, and sugar is now the main export earner. In 2007, the sugar industry increased efficiency and diversification efforts, in response to a 17% decline in EU sugar prices. Mining has declined in importance in recent years with only coal and quarry stone mines remaining active. Customs revenues plummeted due to the global economic crisis and a drop in South African imports. The resulting decline in revenue has pushed the country into a fiscal crisis. The government has requested assistance from the IMF and from the African Development Bank, but in 2011 was not able to meet the targets—including cutting the wage bill and improving spending controls—necessary to receive aid. Swaziland is looking to other countries, including South Africa, for assistance, but continues to struggle to meet its monthly payroll and fund government programs. With an estimated 40% unemployment rate, Swaziland's need to increase the number and size of small and medium enterprises and attract foreign direct investment is acute. Overgrazing, soil depletion, drought, and floods persist as problems for the future. More than one-fourth of the population needed emergency food aid in 2006–07 because of drought, and more than one-quarter of the adult population

SWEDEN**INTRODUCTION**

Background: A military power during the 17th century, Sweden has not participated in any war for almost two centuries. An armed neutrality was preserved in both world wars. Sweden's long-successful economic formula of a capitalist system interlarded with substantial welfare elements was challenged in the 1990s by high unemployment and in 2000–02 and 2009 by the global economic downturns, but fiscal discipline over the past several years has allowed the country to weather economic vagaries. Sweden joined the EU in 1995, but the public rejected the introduction of the euro in a 2003 referendum.

ECONOMY

Economy—overview: Aided by peace and neutrality for the whole of the 20th century, Sweden has achieved an enviable standard of living under a mixed system of high-tech capitalism and extensive welfare benefits. It has a modern distribution system, excellent internal and external communications, and a highly skilled labor force. In September 2003, Swedish voters turned down entry into the euro system concerned about the impact on the economy and sovereignty. Timber, hydropower, and iron ore constitute the resource base of an economy heavily oriented toward foreign trade. Privately owned firms account for vast majority of industrial output, of which the engineering sector accounts for about 50% of output and exports. Agriculture accounts for little more than 1% of GDP and of employment. Until 2008, Sweden was in the midst of a sustained economic upswing, boosted by increased domestic demand and strong exports. This and robust finances offered the center-right government considerable scope to implement its reform program aimed at increasing employment, reducing welfare dependence, and streamlining the state's role in the economy. Despite strong finances and underlying fundamentals, the Swedish economy slid into recession in the third quarter of 2008 and growth continued downward in 2009 as deteriorating global conditions reduced export demand and consumption. Strong exports of commodities and a return to profitability by Sweden's banking sector drove the strong rebound in 2010, which continued in 2011, and the government is proposing stimulus measures in the 2012 budget to curb the effects of a global economic slowdown and boost employment and growth.

SWITZERLAND

INTRODUCTION

Background: The Swiss Confederation was founded in 1291 as a defensive alliance among three cantons. In succeeding years, other localities joined the original three. The Swiss Confederation secured its independence from the Holy Roman Empire in 1499. A constitution of 1848, subsequently modified in 1874, replaced the confederation with a centralized federal government. Switzerland's sovereignty and neutrality have long been honored by the major European powers, and the country was not involved in either of the two world wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, has strengthened Switzerland's ties with its neighbors. However, the country did not officially become a UN member until 2002. Switzerland remains active in many UN and international organizations but retains a strong commitment to neutrality.

ECONOMY

Economy—overview: Switzerland is a peaceful, prosperous, and modern market economy with low unemployment, a highly skilled labor force, and a per capita GDP among the highest in the world. Switzerland's economy benefits from a highly

developed service sector, led by financial services, and a manufacturing industry that specializes in high-technology, knowledge-based production. Its economic and political stability, transparent legal system, exceptional infrastructure, efficient capital markets, and low corporate tax rates also make Switzerland one of the world's most competitive economies. The Swiss have brought their economic practices largely into conformity with the EU's, to enhance their international competitiveness, but some trade protectionism remains, particularly for its small agricultural sector. The fate of the Swiss economy is tightly linked to that of its neighbors in the euro zone, which purchases half of all Swiss exports. The global financial crisis of 2008 and resulting economic downturn in 2009 stalled export demand and put Switzerland in a recession. The Swiss National Bank (SNB) during this period effectively implemented a zero-interest rate policy to boost the economy as well as prevent appreciation of the franc, and Switzerland's economy recovered in 2010 with 2.7% growth. The sovereign debt crises currently unfolding in neighboring euro-zone countries pose a significant risk to Switzerland's financial stability and are driving up demand for the Swiss franc by investors seeking a safe haven currency. The independent SNB has upheld its zero-interest rate policy and conducted major market interventions to prevent further appreciation of the Swiss franc, but parliamentarians have urged it to do more to weaken the currency. The franc's strength has made Swiss exports less competitive and weakened the country's growth outlook; GDP growth fell to 2.1% in 2011. Switzerland has also come under increasing pressure from individual neighboring countries, the EU, the US, and international institutions to reform its banking secrecy laws. Consequently, the government agreed to conform to OECD regulations on administrative assistance in tax matters, including tax evasion. The government has renegotiated its double taxation agreements with numerous countries, including the US, to incorporate the OECD standard, and in 2011 it reached deals with Germany and the UK to resolve outstanding issues, particularly the possibility of imposing taxes on bank deposits held by foreigners. These steps will have a lasting impact on Switzerland's long history of bank secrecy.

SYRIA

INTRODUCTION

Background: Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French administered the area as Syria until granting it independence in 1946. The new country lacked political stability, however, and experienced a series of military coups during its first decades. Syria united with Egypt in February 1958 to form the United Arab Republic. In September 1961, the two entities separated, and the Syrian Arab Republic was reestablished. In November 1970, Hafiz al-ASAD, a member of the Socialist Ba'th Party and the minority Alawi sect, seized power in a bloodless coup and brought political stability to the country. In the 1967 Arab-Israeli War, Syria lost the Golan Heights to Israel. During the 1990s, Syria and Israel held occasional peace talks over its return. Following the death of President al-ASAD, his son, Bashar al-ASAD, was approved as president by popular referendum in July 2000. Syrian troops—stationed in Lebanon since 1976 in an ostensible peacekeeping role—were withdrawn in April 2005. During the July-August 2006 conflict between Israel and Hizballah, Syria placed its military forces on alert but did not intervene directly on behalf of its ally Hizballah. In May 2007 Bashar al-ASAD was elected to his second term as president.

Influenced by major uprisings that began elsewhere in the region, antigovernment protests broke out in the southern province of Da'ra in March 2011 with protest-

ers calling for the repeal of the restrictive Emergency Law allowing arrests without charge, the legalization of political parties, and the removal of corrupt local officials. Since then demonstrations and unrest have spread to nearly every city in Syria, but the size and intensity of protests have fluctuated over time, and Aleppo and Damascus have remained relatively calm. The government has responded to unrest with a mix of concessions—including the repeal of the Emergency Law and approving new laws permitting new political parties and liberalizing local and national elections—and force. However, the government's response has failed to meet opposition demands for ASAD to step down, and the government's ongoing security operations to quell unrest and a rise in armed opposition activity have led to violent clashes between government forces and oppositionists. In November 2011, international pressure on the ASAD regime intensified as the 22-nation Arab League and Turkey voted to impose economic sanctions. Former UN Secretary-General Kofi ANNAN, appointed as the joint UN-Arab League envoy to Syria, met with President ASAD in March 2012 to propose a cease-fire which included the withdrawal of government troops from Syrian towns and villages. Former UN Secretary-General Kofi ANNAN, appointed as the joint UN-Arab League envoy to Syria, met with President ASAD in March 2012 to propose a cease fire. Despite a brief lull in hostilities immediately following a 12 April agreement, fighting resumed and in several locations intensified through the end of May. Some estimates put the death toll at well over 9,000 since fighting began in March 2011.

ECONOMY

Economy—overview: After modest economic reform in recent years, Syria's economy suffered the effects of political unrest and violence in 2011. Economic growth slowed because of international sanctions and reduced domestic consumption and production. Prior to the unrest, Damascus had cut lending interest rates, opened private banks, consolidated multiple exchange rates, raised prices on some subsidized items, and established the Damascus Stock Exchange, which began operations in 2009. The economy remains highly regulated by the government, which has increased subsidies and tightened trade controls to assuage protesters and protect foreign currency reserves. Long-run economic constraints include foreign trade barriers, declining oil production, high unemployment, rising budget deficits, and increasing pressure on water supplies caused by heavy use in agriculture, rapid population growth, industrial expansion, and water pollution.

TRANSNATIONAL ISSUES

Disputes—International: Golan Heights is Israeli-occupied with the almost 1,000-strong UN Disengagement Observer Force patrolling a buffer zone since 1964; lacking a treaty or other documentation describing the boundary, portions of the Lebanon-Syria boundary are unclear with several sections in dispute; since 2000, Lebanon has claimed Shab'a Farms in the Golan Heights; 2004 Agreement and pending demarcation settles border dispute with Jordan

Refugees and internally displaced persons:

refugees (country of origin): 1–1.4 million (Iraq); 522,100 (Palestinian Refugees (UNRWA))

IDPs: 305,000 (most displaced from Golan Heights during 1967 Arab-Israeli War) (2007)

Trafficking in persons: *current situation:* Syria is principally a destination country for women and children subjected to forced labor or sex trafficking; women from Indonesia, the Philippines, Somalia, and Ethiopia are recruited by employment agencies to work in Syria as domestic servants, but are subsequently subjected to conditions of forced labor; some economically desperate

Syrian children are subjected to conditions of forced labor within the country, particularly by organized street begging rings; some Syrian women in Lebanon may be forced to engage in street prostitution and small numbers of Syrian girls are reportedly brought to Lebanon for the purpose of prostitution

tier rating: Tier 2 Watch List—the government made modest anti-trafficking efforts, however, it did not demonstrate evidence of increasing efforts to investigate and pun-

ish trafficking offenses, inform the public about the practice of human trafficking, or provide much-needed anti-trafficking training to law enforcement and social welfare officials (2008)

Illicit drugs: a transit point for opiates, hashish, and cocaine bound for regional and Western markets; weak anti-money-laundering controls and bank privatization may leave it vulnerable to money laundering

TAIWAN

INTRODUCTION

Background: In 1895, military defeat forced China to cede Taiwan to Japan. Taiwan reverted to Chinese control after World War II. Following the Communist victory on the mainland in 1949, 2 million Nationalists fled to Taiwan and established a government using the 1947 constitution drawn up for all of China. Over the next five decades, the ruling authorities gradually democratized and incorporated the local population within the governing structure. In 2000, Taiwan underwent its first peaceful transfer of power from the Nationalist to the Democratic Progressive Party. Throughout this period, the island prospered and became one of East Asia's economic "Tigers." The dominant political issues continue to be the relationship between Taiwan and China—specifically the question of Taiwan's eventual status—as well as domestic political and economic reform.

Flag description: red field with a dark blue rectangle in the upper hoist-side corner bearing a white sun with 12 triangular rays; the blue and white design of the canton (symbolizing the sun of progress) dates to 1895; it was later adopted as the flag of the Kuomintang Party; blue signifies liberty, justice, and democracy; red stands for fraternity, sacrifice, and nationalism, white represents equality, frankness, and the people's livelihood; the 12 rays of the sun are those of the months and the twelve traditional Chinese hours (each ray equals two hours)

National symbol(s): white, 12-rayed sun on blue field

National anthem: *name:* "Zhonghua Minguo guoge" (National Anthem of the Republic of China)

lyrics/music: HU Han-min, TAI Chi-t'ao, and LIAO Chung-k'ai/CHENG Mao-Yun

note: adopted 1930; the anthem is also the song of the Kuomintang Party; it is informally known as "San Min Chu I" or "San Min Zhu Yi" (Three Principles of the People); because of political pressure from China, "Guo Qi Ge" (National Banner Song) is used at international events rather than the official anthem of Taiwan; the "National Banner Song" has gained popularity in Taiwan and is commonly used during flag raisings

ECONOMY

Economy—overview: Taiwan has a dynamic capitalist economy with gradually

decreasing government guidance of investment and foreign trade. In keeping with this trend, some large, state-owned banks and industrial firms have been privatized. Exports, led by electronics, machinery, and petrochemicals have provided the primary impetus for economic development. This heavy dependence on exports exposes the economy to fluctuations in world demand. In 2009, Taiwan's GDP contracted 1.9% due primarily to a 20% year-on-year decline in exports. In 2010 GDP grew 10.9%, as exports returned to the level of previous years, and in 2011, grew 5.2%. However, 2012 growth will likely be less, according to most forecasters, because of softening global demand. Taiwan's diplomatic isolation, low birth rate, and rapidly aging population are major long-term challenges. Free trade agreements have proliferated in East Asia over the past several years, but so far Taiwan has been excluded from this greater economic integration largely because of its diplomatic status with the exception of the landmark Economic Cooperation Framework Agreement (ECFA) signed with China in June 2010. The MA administration has said that the ECFA will serve as a stepping stone toward trade pacts with other regional partners, and negotiations on a deal with Singapore began this year. Follow-on components of ECFA, including deals on trade in goods, services, and investment, have yet to be completed. Taiwan's Total Fertility rate of just over one child per woman is among the lowest in the world, raising the prospect of future labor shortages, falling domestic demand, and declining tax revenues. Taiwan's population is aging quickly, with the number of people over 65 accounting for 10.9% of the island's total population as of 2011. The island runs a large trade surplus, and its foreign reserves are the world's fourth largest, behind China, Japan, and Russia. Since 2005 China has overtaken the US to become Taiwan's second-largest source of imports after Japan. China is also the island's number one destination for foreign direct investment. Three financial memorandums of understanding, covering banking, securities, and insurance took effect in mid-January 2010, opening the island to greater investments from the mainland's financial firms and institutional investors, and providing new opportunities for Taiwan financial firms to operate in China. Closer economic links with the mainland bring greater opportunities for the Taiwan economy, but also poses new challenges as the island becomes more economically dependent on China while political differences remain unresolved.

TRANSNATIONAL ISSUES

Disputes—International: involved in complex dispute with Brunei, China, Malaysia, the Philippines, and Vietnam over the Spratly Islands, and with China and the Philippines over Scarborough Reef; the 2002 “Declaration on the Conduct of Parties in the South China Sea” has eased tensions but falls short of a legally binding “code of conduct” desired by several of the disputants; Paracel Islands are occupied by China, but claimed by Taiwan and Vietnam; in 2003, China and Taiwan became more vocal in rejecting both Japan’s claims to the uninhabited islands of the Senkaku-shoto (Diaoyu Tai) and Japan’s unilaterally declared exclusive economic zone in the East China Sea where all parties engage in hydrocarbon prospecting

Illicit drugs: regional transit point for heroin, methamphetamine, and precursor chemicals; transshipment point for drugs to Japan; major problem with domestic consumption of methamphetamine and heroin; rising problems with use of ketamine and club drugs

TAJIKISTAN

INTRODUCTION

Background: The Tajik people came under Russian rule in the 1860s and 1870s, but Russia’s hold on Central Asia weakened following the Revolution of 1917. Bolshevik control of the area was fiercely contested and not fully reestablished until 1925. Much of present-day Sughd province was transferred from the Uzbek SSR to the newly formed Tajik SSR in 1929. Ethnic Uzbeks form a substantial minority in Tajikistan. Tajikistan became independent in 1991 following the breakup of the Soviet Union, and experienced a civil war between regional factions from 1992–97.

Tajikistan experienced several security incidents in 2010, including a mass prison-break from a Dushanbe detention facility, the country’s first suicide car bombing in Khujand, and armed conflict between government forces and opposition militants in the Rasht Valley. The country remains the poorest in the former Soviet sphere. Attention by the international community since the beginning of the NATO intervention in Afghanistan has brought increased economic development and security assistance, which could create jobs and strengthen stability in the long term. Tajikistan is seeking WTO membership and joined NATO’s Partnership for Peace in 2002.

Flag description: three horizontal stripes of red (top), a wider stripe of white, and green; a gold crown surmounted by seven gold, five-pointed stars is located in the center of the white stripe; red represents the sun, victory, and the unity of the nation, white stands for purity, cotton, and mountain snows, while green is the color of Islam and the bounty of nature; the crown symbolizes the Tajik people; the seven stars signify the Tajik magic number "seven"—a symbol of perfection and the embodiment of happiness

National symbol(s): crown surmounted by seven, five-pointed stars

National anthem: *name:* "Surudi milli" (National Anthem)
lyrics/music: Gulnazar KELDI/Suleiman YUDAKOV

note: adopted 1991; after the fall of the Soviet Union, Tajikistan kept the music of the anthem from its time as a Soviet republic but adopted new lyrics

ECONOMY

Economy—overview: Tajikistan has one of the lowest per capita GDPs among the 15 former Soviet republics. Because of a lack of employment opportunities in Tajikistan, as many as a million Tajik citizens work abroad, almost all of them in Russia, supporting families in Tajikistan through remittances. Less than 7% of the land area is arable. Cotton is the most important crop, and its production is closely monitored, and in many cases controlled, by the government. In the wake of the National Bank of Tajikistan's admission in December 2007 that it had improperly lent money to investors in the cotton sector, the IMF canceled its program in Tajikistan. A reform agenda is underway, according to which over half a billion dollars in farmer debt is being forgiven, and IMF assistance has been reinstated. Mineral resources include silver, gold, uranium, and tungsten. Industry consists only of a large aluminum plant, hydropower facilities, and small obsolete factories mostly in light industry and food processing. The civil war (1992–97) severely damaged the already weak economic infrastructure and caused a sharp decline in industrial and agricultural production. Tajikistan's economic situation remains fragile due to uneven implementation of structural reforms, corruption, weak governance, seasonal power shortages, and the external debt burden. Electricity output expanded with the completion of the Sangnuda-1 hydropower dam—finished in 2009 with Russian investment. The smaller Sangnuda-2, built with Iranian investment, began operating in 2011. The government of Tajikistan is pinning major hopes on the massive Roghun dam which, if finished according to Tajik plans, will be the tallest dam in the world and significantly expand electricity output. The World Bank has agreed to fund technical, economic, social, and environmental feasibility studies for the dam, scheduled to be completed in 2012. In January 2010, the government began selling shares in the Roghun enterprise to its population, ultimately raising over \$180 million but Tajikistan will still need significant investment to complete the dam. According to numerous reports, many Tajik individuals and businesses were forced to buy shares. The coerced share sales finally ended in mid-2010 under intense criticism from donors, particularly the IMF. Food and fuel prices in 2011 increased to the highest levels seen since 2002 due in part to an increase in rail transport tariffs through Uzbekistan. Tajikistan imports approximately 60% of its food and 90% of that comes by rail.

Illicit drugs: major transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of opium poppy for domestic consumption; Tajikistan seizes roughly 80% of all drugs captured in Central Asia and stands third worldwide in seizures of opiates (heroin and raw opium); significant consumer of opiates

TANZANIA

INTRODUCTION

Background: Shortly after achieving independence from Britain in the early 1960s, Tanganyika and Zanzibar merged to form the nation of Tanzania in 1964. One-party rule ended in 1995 with the first democratic elections held in the country since the 1970s. Zanzibar's semi-autonomous status and popular opposition have led to two contentious elections since 1995, which the ruling party won despite international observers' claims of voting irregularities. The formation of a government of national unity between Zanzibar's two leading parties succeeded in minimizing electoral tension in 2010

ECONOMY

Economy—overview: Tanzania is one of the world's poorest economies in terms of per capita income, however, Tanzania averaged 7% GDP growth per year between 2000 and 2008 on strong gold production and tourism. The economy depends heavily on agriculture, which accounts for more than one-quarter of GDP, provides 85% of exports, and employs about 80% of the work force. The World Bank, the IMF, and bilateral donors have provided funds to rehabilitate Tanzania's aging economic infrastructure, including rail and port infrastructure that are important trade links for inland countries. Recent banking reforms have helped increase private-sector growth and investment, and the government has increased spending on agriculture to 7% of its budget. Continued donor assistance and solid macroeconomic policies supported a positive growth rate, despite the world recession. In 2008, Tanzania received the world's largest Millennium Challenge Compact grant, worth \$698 million. Dar es Salaam used fiscal stimulus and loosened monetary policy to ease the impact of the global recession. GDP growth in 2009–11 was a respectable 6% per year due to high gold prices and increased production.

TRANSNATIONAL ISSUES

Disputes—International: Tanzania still hosts more than a half million refugees, more than any other African country, mainly from Burundi and the Democratic Republic of the Congo, despite the international community's efforts at repatriation; disputes with Malawi over the boundary in Lake Nyasa (Lake Malawi) and the meandering Songwe River remain dormant

Refugees and internally displaced persons:

refugees (*country of origin*): 352,640 (Burundi); 127,973 (Democratic Republic of the Congo) (2007)

Illicit drugs: targeted by traffickers moving hashish, Afghan heroin, and South American cocaine transported down the East African coastline, through airports, or overland through Central Africa; Zanzibar likely used by traffickers for drug smuggling; traffickers in the past have recruited Tanzanian couriers to move drugs through Iran into East Asia.

THAILAND

INTRODUCTION

Background: A unified Thai kingdom was established in the mid-14th century. Known as Siam until 1939, Thailand is the only Southeast Asian country never to have been taken over by a European power. A bloodless revolution in 1932 led to a constitutional monarchy. In alliance with Japan during World War II, Thailand became a US treaty ally in 1954 after sending troops to Korea and fighting alongside the US in Vietnam. A military coup in September 2006 ousted then Prime Minister THAKSIN Chinnawat. December 2007 elections

saw the pro-THAKSIN People's Power Party (PPP) emerge at the head of a coalition government that took office in February 2008. The anti-THAKSIN People's Alliance for Democracy (PAD, aka yellow-shirts) in May 2008 began street demonstrations against the new government, eventually occupying the prime minister's office in August and Bangkok's two international airports in November. After an early December 2008 court ruling that dissolved the ruling PPP and two other coalition parties for election violations, the Democrat Party formed a new coalition government and ABHISIT Wetchachiwa became prime

minister. In October 2008 THAKSIN fled abroad in advance of an abuse of power conviction and has agitated his followers from abroad since then. THAKSIN supporters under the banner of the United Front for Democracy Against Dictatorship (UDD, aka red-shirts) rioted in April 2009, shutting down an ASEAN meeting in Pattaya. Following a February 2010 court verdict confiscating half of THAKSIN's frozen assets, the UDD staged large protests between March and May 2010, and occupied several blocks of downtown Bangkok. Clashes between security forces and protesters, elements of which were armed,

resulted in at least 92 deaths and an estimated \$1.5 billion in arson-related property losses. These protests exposed major cleavages in the Thai body politic that hampered the government and led to a general election in July 2011. THAKSIN's youngest sister, YINGLAK, led the Puea Thai party to an electoral win and assumed control of the government in August. YINGLAK's leadership was almost immediately challenged by historic flooding in late 2011 that had large swathes of the country underwater and threatened to inundate Bangkok itself. At the beginning of 2012 the Puea Thai-led government began fulfilling one of its main election promises, the pursuit of constitutional reform, which could lead to the nation's 19th Constitution since 1932. Since January 2004, thousands have been killed and wounded as separatists in Thailand's southern ethnic Malay-Muslim provinces continued the campaign of violence associated with their cause.

ECONOMY

Economy—overview: With a well-devel-
oped infrastructure, a free-enterprise econ-
omy, generally pro-investment policies, and
strong export industries, Thailand enjoyed
solid growth from 2000 to 2007—averaging
more than 4% per year—as it recovered from
the Asian financial crisis of 1997–98. Thai
exports—mostly machinery and electronic
components, agricultural commodities, and
jewelry—continue to drive the economy,
accounting for more than half of GDP. The
global financial crisis of 2008–09 severely cut
Thailand's exports, with most sectors experi-
encing double-digit drops. In 2009, the
economy contracted 2.3%. In 2010, Thai-
land's economy expanded 7.8%, its fastest
pace since 1995, as exports rebounded from
their depressed 2009 level. Steady economic
growth at just below 4% during the first three
quarters of 2011 was interrupted by historic
flooding in October and November in the
industrial areas north of Bangkok, crippling
the manufacturing sector and leading to a
revised growth rate of only 0.1% for the year.
The industrial sector is poised to recover
from the second quarter of 2012 onward,
however, and the government anticipates
the economy will probably grow between 5.5
and 6.5% for 2012, while private sector fore-
casts range between 3.8% and 5.7%.

TRANSNATIONAL ISSUES

Disputes—international: separatist violence in Thailand's predominantly Muslim southern provinces prompt border closures and controls with Malaysia to stem terrorist activities; Southeast Asian states have enhanced border surveillance to check the spread of avian flu; talks continue on completion of demarcation with Laos but disputes remain over several islands in the Mekong River; despite continuing border committee talks, Thailand must deal with Karen and other ethnic rebels, refugees, and illegal cross-border activities, and as of 2006, over 116,000 Karen and other refugees and asylum seekers from Burma; Cambodia and Thailand dispute sections of boundary; in 2011 Thailand and Cambodia resorted to arms in the dispute over the location of the boundary on the precipice surmounted by Preah Vihear temple ruins, awarded to Cambodia by ICJ decision in 1962 and part of a planned UN World Heritage site; Thailand is studying the feasibility of jointly constructing the Hatgyi Dam on the Salween river near the border with Burma; in 2004, international environmentalist pressure prompted China to halt construction of 13 dams on the Salween River that flows through China, Burma, and Thailand; 140,000 mostly Karen refugees fleeing civil strife, political upheaval and economic stagnation in Burma live in remote camps in Thailand near the border

Refugees and internally displaced persons:

refugees (country of origin): 132,241 (Burma) (2007)

Illicit drugs: a minor producer of opium, heroin, and marijuana; transit point for illicit heroin en route to the international drug market from Burma and Laos; eradication efforts have reduced the area of cannabis cultivation and shifted some production to neighboring countries; opium poppy cultivation has been reduced by eradication efforts; also a drug money-laundering center; minor role in methamphetamine production for regional consumption; major consumer of methamphetamine since the 1990s despite a series of government crackdowns

TIMOR-LESTE

INTRODUCTION

Background: The Portuguese began to trade with the island of Timor in the early 16th century and colonized it in mid-century. Skirmishing with the Dutch in the region eventually resulted in an 1859 treaty in which Portugal ceded the western portion of the island. Imperial Japan occupied Portuguese Timor from 1942 to 1945, but Portugal resumed colonial authority after the Japanese defeat in World War II. East Timor declared itself independent from Portugal on 28 November 1975 and was invaded and occupied by Indonesian forces nine days later. It was incorporated into Indonesia in July 1976 as the province of Timor Timur (East Timor). An unsuccessful campaign of pacification followed over the next two decades, during which an estimated 100,000 to 250,000 individuals lost their lives. On 30 August 1999, in a UN-supervised popular referendum, an overwhelming majority of the people of Timor-Leste voted for independence from Indonesia. However, in the next three weeks, anti-independence Timorese militias—organized and supported by the Indonesian military—commenced a large-scale, scorched-earth campaign of retribution. The militias killed approximately 1,400 Timorese and forcibly pushed 300,000 people into western Timor as refugees. Most of the country's infrastructure, including homes, irrigation systems, water supply systems, and schools, and nearly 100% of the country's electrical grid were destroyed. On 20 September 1999, Australian-led peacekeeping troops deployed to the country and brought the violence to an end. On 20 May 2002, Timor-Leste was internationally recognized as an independent state. In 2006, internal tensions threatened the new nation's security when a military strike led to violence and a breakdown of law and order. At Dili's request, an Australian-led International Stabilization Force (ISF) deployed to Timor-Leste, and the UN Security Council established the UN Integrated Mission in Timor-Leste (UNMIT), which included an authorized police presence of

over 1,600 personnel. The ISF and UNMIT restored stability, allowing for presidential and parliamentary elections in 2007 in a largely peaceful atmosphere. In February 2008, a rebel group staged an unsuccessful attack against the president and prime minister. The ringleader was killed in the attack and most of the rebels surrendered in April 2008. Since the unsuccessful attacks the government has enjoyed one of its longest periods of post-independence stability.

ECONOMY

Economy—overview: In late 1999, about 70% of the economic infrastructure of Timor-Leste was laid waste by Indonesian troops and anti-independence militias. Three hundred thousand people fled westward. Over the next three years a massive international program, manned by 5,000 peacekeepers (8,000 at peak) and 1,300 police officers, led to substantial reconstruction in both urban and rural areas. The country continues to face great challenges in rebuilding its infrastructure, strengthening the civil administration, and generating jobs for young people entering the work force. The development of oil and gas resources in offshore waters has greatly supplemented government revenues. This

technology-intensive industry, however, has done little to create jobs for the unemployed in part because there are no production facilities in Timor-Leste. Gas is piped to Australia. In June 2005, the National Parliament unanimously approved the creation of a Petroleum Fund to serve as a repository for all petroleum revenues and to preserve the value of Timor-Leste's petroleum wealth for future generations. The Fund held assets of US\$9.3 billion as of December 2011. The economy continues to recover strongly from the mid-2006 outbreak of violence and civil unrest, which disrupted both private and public sector economic activity. All of the estimated 100,000 internally displaced persons returned home by early 2009. Government spending increased markedly from 2009 through 2011, primarily on basic infrastructure, including electricity and roads. Limited experience in procurement and infrastructure building has hampered these projects. The underlying economic policy challenge the country faces remains how best to use oil-and-gas wealth to lift the non-oil economy onto a higher growth path and to reduce poverty. The parliament in late 2011 approved an ambitious, infrastructure-focused \$1.67 billion budget for 2012 that would allow the government to borrow for the first time in its 10-year history.

INTRODUCTION

Background: French Togoland became Togo in 1960. Gen. Gnassingbe EYADEMA, installed as military ruler in 1967, ruled Togo with a heavy hand for almost four decades. Despite the facade of multiparty elections instituted in the early 1990s, the government was largely dominated by President EYADEMA, whose Rally of the Togolese People (RPT) party has maintained power almost continually since 1967 and maintains a majority of seats in today's legislature. Upon EYADEMA's death in February 2005, the military installed the president's son, Faure GNASSINGBE, and then engineered his formal election two months later. Democratic gains since then allowed Togo to hold its first relatively free and fair legislative elections in October 2007. After years of political unrest and condemnation from international organizations for human rights abuses, Togo is finally being re-welcomed into the international community. In January 2012, Togo assumed a nonpermanent seat on the UN Security Council for the 2012–13 term.

ECONOM-Y

Economy—overview: This small, sub-Saharan economy suffers from anemic economic growth and depends heavily on both commercial and subsistence agriculture, which provides employment for a significant share of the labor force. Some basic foodstuffs must still be imported. Cocoa, coffee, and cotton generate about 40% of export earnings with cotton being the most important cash crop. Togo is among the world's largest producers of phosphate and Togo seeks to develop its carbonate phosphate reserves. The government's decade-long effort, supported by the World Bank and the IMF, to implement economic reform measures, encourage foreign investment, and bring revenues in line with expenditures has moved slowly. Progress depends on follow through on privatization, increased openness in government financial operations, progress toward legislative elections, and continued support from foreign donors. Foreign direct investment inflows have slowed over recent years. Togo completed its IMF Extended Credit Facility in 2011 and reached a HIPC debt relief completion point in 2010 at which 95% of the country's debt was forgiven. Togo continues to work with the IMF on structural reforms.

tuluma (fishing tackle box)

National anthem:

name: "Te Atua" (For the Almighty)

lyrics/music: unknown/Falani KALOLO

note: adopted 2008; in preparation for eventual self governance, Tokelau held a national contest to choose an anthem; as a territory of New Zealand, "God Defend New Zealand" and "God Save the Queen" are official (see New Zealand)

ECONOMY

Economy—overview: Tokelau's small size (three villages), isolation, and lack of resources greatly restrain economic development and confine agriculture to the subsistence level. The people rely heavily on aid from New Zealand—about \$10 million annually in 2008 and 2009—to maintain public services. New Zealand's support amounts to 80% of Tokelau's recurrent government budget. An international trust fund, currently worth nearly US\$32 million, was established in 2004 to provide Tokelau an independent source of revenue. The principal sources of revenue come from sales of copra, postage stamps, souvenir coins, and handicrafts. Money is also remitted to families from relatives in New Zealand.

TONGA

INTRODUCTION

Background: Tonga—unique among Pacific nations—never completely lost its indigenous governance. The archipelagos of “The Friendly Islands” were united into a Polynesian kingdom in 1845. Tonga became a constitutional monarchy in 1875 and a British protectorate in 1900; it withdrew from the protectorate and joined the Commonwealth of Nations in 1970. Tonga remains the only monarchy in the Pacific.

ECONOMY**Economy—overview:** Tonga has a small, open, South Pacific island economy. It has a narrow export base in agricultural goods. Squash, vanilla beans, and yams are the main crops. Agricultural exports, including fish, make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand. The country remains dependent on external aid and remittances from Tongan communities overseas to offset its trade deficit. Tourism is the second-largest source of hard currency earnings following remittances. Tonga had 39,000 visitors in 2006. The government is emphasizing the development of the private sector, especially the encouragement of investment, and is committing increased funds for health and education. Tonga has a reasonably sound basic infrastructure and well developed social services. High unemployment among the young, a continuing upturn in inflation, pressures for democratic reform, and rising civil service expenditures are major issues facing the government.**GDP (purchasing power parity):** \$816 million (2011 est.)

ish control in the early 19th century. The islands' sugar industry was hurt by the emancipation of the slaves in 1834. Manpower was replaced with the impor-

tation of contract laborers from India between 1845 and 1917, which boosted sugar production as well as the cocoa industry. The discovery of oil on Trinidad

in 1910 added another important export. Independence was attained in 1962. The country is one of the most prosperous in the Caribbean thanks largely to petroleum and natural gas production and processing. Tourism, mostly in Tobago, is targeted for expansion and is growing. The government is coping with a rise in violent crime.

ECONOMY

Economy—overview: Trinidad and Tobago has earned a reputation as an excellent investment site for international businesses and has one of the highest growth rates and per capita incomes in Latin America. Economic growth between 2000 and 2007 averaged slightly over 8%, significantly

above the regional average of about 3.7% for that same period; however, GDP has slowed down since then and contracted during 2009–2011. Growth had been fueled by investments in liquefied natural gas, petrochemicals, and steel. Additional petrochemical, aluminum, and plastics projects are in various stages of planning. Trinidad and Tobago is the leading Caribbean producer of oil and gas, and its economy is heavily dependent upon these resources but it also supplies manufactured goods, notably food products and beverages, as well as cement to the Caribbean region. Oil and gas account for about 40% of GDP and 80% of exports, but only 5% of employment. The country is also a regional financial center, and tourism is a growing sector, although it is not as important domestically as it is to many other Caribbean islands. The economy benefits from a growing trade surplus. The previous MANNING administration benefited from fiscal surpluses fueled by the dynamic export sector; however, declines in oil and gas prices have reduced government revenues which will challenge the new government's commitment to maintaining high levels of public investment.

TUNISIA

INTRODUCTION

Background: Rivalry between French and Italian interests in Tunisia culminated in a French invasion in 1881 and the creation of a protectorate. Agitation for independence in the decades following World War I was finally successful in getting the French to recognize Tunisia as an independent state in 1956. The country's first president, Habib BOURGUIBA, established a strict one-party state. He dominated the country for 31 years, repressing Islamic fundamentalism and establishing rights for women unmatched by any other Arab nation. In November 1987, BOURGUIBA was removed from office and replaced by Zine el Abidine BEN ALI in a bloodless coup. Street protests that began in Tunis in December 2010 over high unemployment, corruption, widespread poverty, and high food prices escalated in January 2011, culminating in rioting that led to hundreds of

deaths. On 14 January 2011, the same day BEN ALI dismissed the government, he fled the country, and by late January 2011, a "national unity government" was formed. In late October 2011, elections for a Constituent Assembly were held. The Constituent Assembly is charged with appointing a new interim government, drafting a new constitution, and preparing for legislative and presidential elections.

ECONOMY

Economy—overview: Tunisia has a diverse, market-oriented economy, with important agricultural, mining, tourism, and manufacturing sectors but faces an array of challenges. Following an ill-fated experiment with socialist economic policies in the 1960s, Tunisia successfully focused on bolstering exports, foreign investment, and tourism. Key exports now include textiles and apparel, food products, petroleum products, chemicals, and phosphates, with about 80% going to the European Union. Tunisia achieved four decades of 4–5% annual GDP growth. As the presidency wore on, cronyism and corruption under former President Zine el Abidine BEN ALI (1987–2011) stymied economic performance and unemployment rose among the university's graduates. In January 2011 BEN ALI was overthrown, sending Tunisia's economy into a tailspin. The country's newly elected government faces immediate challenges stabilizing the economy. It must reassure businesses and investors, bring budget and current account deficits under control, shore up the country's financial system, bring down high unemployment, and reduce economic disparities between the more developed coastal region and impoverished interior.

TURKEY

INTRODUCTION

Background: Modern Turkey was founded in 1923 from the Anatolian remnants of the defeated Ottoman Empire by national hero Mustafa KEMAL, who was later honored with the title Atatürk or "Father of the Turks." Under his authoritarian leadership, the country adopted wide-ranging social, legal, and political reforms. After a period of one-party rule, an experiment with multi-party politics led to the 1950 election victory of the opposition Democratic Party and the peaceful transfer of power. Since then, Turkish political parties have multiplied, but democracy has been fractured by periods of instability and intermittent military coups (1960, 1971, 1980), which in each case eventually resulted in a return of political

power to civilians. In 1997, the military again helped engineer the ouster—popularly dubbed a “post-modern coup”—of the then Islamic-oriented government. Turkey intervened militarily on Cyprus in 1974 to prevent a Greek takeover of the island and has since acted as patron state to the “Turkish Republic of Northern Cyprus,” which only Turkey recognizes. A separatist insurgency began in 1984 by the Kurdistan Workers’ Party (PKK)—now known as the Kurdistan People’s Congress or Kongra-Gel (KKG)—has dominated the Turkish military’s attention and claimed more than 30,000 lives. After the capture of the group’s leader in 1999, the insurgents largely withdrew from Turkey mainly to northern Iraq. In 2004, KKG announced an end to its ceasefire and attacks attributed to the KKG increased. Turkey joined the UN in 1945 and in 1952 it became a member of NATO. In 1964, Turkey became an associate member of the European Community. Over the past decade, it has undertaken many reforms to strengthen its democracy and economy; it began accession membership talks with the European Union in 2005.

note: lyrics adopted 1921, music adopted 1932; the anthem's original music was adopted in 1924; a new composition was agreed upon in 1932

ECONOMY

Economy—overview: Turkey's largely free-market economy is increasingly driven by its industry and service sectors, although its traditional agriculture sector still accounts for about 25% of employment. An aggressive privatization program has reduced state involvement in basic industry, banking, transport, and communication, and an emerging cadre of middle-class entrepreneurs is adding dynamism to the economy and expanding production beyond the traditional textiles and clothing sectors. The automotive, construction, and electronics industries, are rising in importance and have surpassed textiles within Turkey's export mix. Oil began to flow through the Baku-Tbilisi-Ceyhan pipeline in May 2006, marking a major milestone that will

bring up to 1 million barrels per day from the Caspian to market. Several gas pipelines projects also are moving forward to help transport Central Asian gas to Europe through Turkey, which over the long term will help address Turkey's dependence on imported oil and gas to meet 97% of its energy needs. After Turkey experienced a severe financial crisis in 2001, Ankara adopted financial and fiscal reforms as part of an IMF program. The reforms strengthened the country's economic fundamentals and ushered in an era of strong growth—averaging more than 6% annually until 2008. Global economic conditions and tighter fiscal policy caused GDP to contract in 2009, but Turkey's well-regulated financial markets and banking system helped the country weather the global financial crisis and GDP rebounded strongly to 8.2% in 2010, as exports returned to normal levels following the recession. Turkey's public sector debt to GDP ratio has fallen to roughly 40%. Continued strong growth has pushed inflation to the 8% level, however, and worsened an already high current account deficit. Turkey remains dependent on often volatile, short-term investment to finance its large trade deficit. The stock value of FDI stood at \$99 billion at year-end 2011. Inflows have slowed considerably in light of continuing economic turmoil in Europe, the source of much of Turkey's FDI. Further economic and judicial reforms and prospective EU membership are expected to boost Turkey's attractiveness to foreign investors. However, Turkey's relatively high current account deficit, uncertainty related to monetary policy-making, and political turmoil within Turkey's neighborhood leave the economy vulnerable to destabilizing shifts in investor confidence.

female: 670,328 (2010 est.)

Military expenditures: 5.3% of GDP (2005 est.)

country comparison to the world: 14

Military—note: the ruling Justice and Development Party (AKP) has incrementally asserted its supremacy over the military since first taking power in 2002 and has reduced the role of the Turkish Armed Forces (TSK) in internal security, increasing the responsibility of the Turkish National Police (TNP) in combating its Kurdish insurgency; the TSK leadership continues to play a role in politics and considers itself guardian of Turkey's secular state; primary domestic threats are listed as fundamentalism (with the definition in some dispute with the civilian government), separatism (Kurdish discontent), and the extreme left wing; Ankara strongly opposed establishment of an autonomous Kurdish region; an overhaul of the Turkish Land Forces Command (TLFC) taking place under the "Force 2014" program is to produce 20-30% smaller, more highly trained forces characterized by greater mobility and firepower and capable of joint and combined operations; the TLFC has taken on increasing international peace-keeping responsibilities, and took charge of a NATO International Security Assistance Force (ISAF) command in Afghanistan in April 2007; the Turkish Navy is a regional naval power that wants to develop the capability to project power beyond Turkey's coastal waters; the Navy is heavily involved in NATO, multinational, and UN operations; its roles include control of territorial waters and security for sea lines of communications; the Turkish Air Force adopted an "Aerospace and Missile Defense Concept" in 2002 and has initiated project work on an integrated missile defense system; Air Force priorities include attaining a modern deployable, survivable, and sustainable force structure, and establishing a sustainable command and control system (2008)

TRANSNATIONAL ISSUES

Disputes—International: complex maritime, air, and territorial disputes with Greece in the Aegean Sea; status of north Cyprus question remains; Syria and Iraq protest Turkish hydrological projects to control upper Euphrates waters; Turkey has expressed concern over the status of Kurds in Iraq; in 2009, Swiss mediators facilitated an accord reestablishing diplomatic ties between Armenia and Turkey, but neither side has ratified the agreement and the rapprochement effort has faltered; Turkish authorities have complained that blasting

from quarries in Armenia might be damaging the medieval ruins of Ani, on the other side of the Arpacay valley;

Refugees and internally displaced persons: IDPs: 1–1.2 million (fighting 1984–99 between Kurdish PKK and Turkish military; most IDPs in southeastern provinces) (2007)

Illicit drugs: key transit route for Southwest Asian heroin to Western Europe and, to a lesser extent, the US—via air, land, and sea routes; major Turkish and other international trafficking organizations operate out of Istanbul; laboratories to convert imported morphine base into heroin exist in remote regions of Turkey and near Istanbul;

bul; government maintains strict controls over areas of legal opium poppy cultivation and over output of poppy straw concentrate; lax enforcement of money-laundering controls

TURKMENISTAN

INTRODUCTION

Background: Present-day Turkmenistan covers territory that has been at the crossroads of civilizations for centuries. The area was ruled in antiquity by various Persian empires, and was conquered by Alexander the Great, Muslim crusaders, the Mongols, Turkic warriors, and eventually the Russians. In medieval times Merv (today known as Mary) was one of the great cities of the Islamic world and an important stop on the Silk Road. Annexed by Russia in the late 1800s, Turkmenistan later figured prominently in the anti-Bolshevik movement in Central Asia. In 1924, Turkmenistan became a Soviet republic; it achieved independence upon the dissolution of the USSR in 1991. Extensive hydrocarbon/natural gas reserves, which have yet to be fully exploited, have begun to transform the country. Turkmenistan is moving to expand its extraction and delivery projects. The Turkmen Government is actively working to diversify its gas export routes beyond the still important Russian pipeline network. In 2010, new gas export pipelines that carry Turkmen gas to China and to northern Iran began operating, effectively ending the Russian monopoly on Turkmen gas exports. President for Life Saparmurat NYIAZOW died in December 2006, and Turkmenistan held its first multi-candidate presidential election in February 2007. Gurbanguly BERDIMUHAMEDOW, a deputy cabinet chairman under NYIAZOW, emerged as the coun-

try's new president; he was reelected in February 2012.

ECONOMY

Economy—overview: Turkmenistan is largely a desert country with intensive agriculture in irrigated oases and sizeable gas and oil resources. The two largest crops

are cotton, most of which is produced for export, and wheat, which is domestically consumed. Although agriculture accounts for roughly 10% of GDP, it continues to employ nearly half of the country's workforce. Turkmenistan's authoritarian regime has taken a cautious approach to economic reform, hoping to use gas and cotton export revenues to sustain its inefficient and highly corrupt economy. Privatization goals remain limited. From 1998–2005, Turkmenistan suffered from the continued lack of adequate export routes for natural gas and from obligations on extensive short-term external debt. At the same time, however, total exports rose by an average of roughly 15% per year from 2003–08, largely because of higher international oil and gas prices. Additional pipelines to China and Iran, that began operation in early 2010, have expanded Turkmenistan's export routes for its gas, although these new routes have not completely offset the sharp drop in export revenue since early 2009 from decreased gas exports to Russia. Overall prospects in the near future are discouraging because of endemic corruption, a poor educational system, government misuse of oil and gas revenues, and Ashgabat's reluctance to adopt market-oriented reforms. The majority of Turkmenistan's economic statistics are state secrets. The present government established a State Agency for Statistics, but GDP numbers and other publicized figures are subject to wide margins of error. In particular, the rate of GDP growth is uncertain. Since his election, President BERDIMUHAMEDOW unified the country's dual currency exchange rate, ordered the redenomination of the manat, reduced state subsidies for gasoline, and initiated development of a special tourism zone on the Caspian Sea. Although foreign investment is encouraged, and some improvements in macroeconomic policy h

TURKS AND CAICOS ISLANDS

INTRODUCTION

Background: The islands were part of the UK's Jamaican colony until 1962, when they assumed the status of a separate crown colony upon Jamaica's independence. The governor of The Bahamas oversaw affairs from 1965 to 1973. With Bahamian independence, the islands received a separate

governor in 1973. Although independence was agreed upon for 1982, the policy was reversed and the islands remain a British overseas territory.

elections: the monarchy is hereditary; governor appointed by the monarch

note: following an investigation into allegations of widespread corruption and misconduct within the Turks and Caicos Government, the UK foreign minister directed the governor to bring into effect on 14 August 2009 an Order in Council suspending Ministerial government and the House of Assembly, and imposing direct rule pending completion of reform milestones

Legislative branch: under provisions of the Order in Council, the unicameral House of Assembly is dissolved and all seats vacated for a period of up to two years; in the interim, a Consultative Forum, appointed by the governor, will be established elections: last held on 9 February 2007 (next to be held in 2012)

election results: under provisions of the Order in Council, all seats in the House of Assembly are vacated

Judicial branch: Supreme Court; Court of Appeal

Political parties and leaders: People's Democratic Movement or PDM [Floyd SEYMOUR]; Progressive National Party or PNP [Michael Eugene MISICK]

Political pressure groups and leaders: NA

International organization participation: Caricom (associate), CDB, Interpol (sub-bureau), UPU

Diplomatic representation in the US: none (overseas territory of the UK)

Flag description: blue, with the flag of the UK in the upper hoist-side quadrant and the colonial shield centered on the outer half of the flag; the shield is yellow and displays a conch shell, a spiny lobster, and Turks Head cactus—three common elements of the islands' biota

National anthem: name: "This Land of Ours"

lyrics/music: Conrad HOWELL

note: serves as a local anthem; as a territory of the United Kingdom, "God Save the Queen" is the official anthem (see United Kingdom)

ECONOMY

Economy—overview: The Turks and Caicos economy is based on tourism, offshore financial services, and fishing. Most capital goods and food for domestic consumption are imported. The US is the leading source of tourists, accounting for more than three-quarters of the 175,000 visitors that arrived in 2004. Major sources of government revenue also include fees from offshore financial activities and customs receipts.

Natural hazards: severe tropical storms are usually rare, but in 1997 there were three cyclones; low level of islands make them sensitive to changes in sea level

Environment—current issues: since there are no streams or rivers and groundwater is not potable, most water needs must be met by catchment systems with storage facilities (the Japanese Government has built one desalination plant and plans to build one other); beachhead erosion because of the use of sand for building materials; excessive clearance of forest undergrowth for use as fuel; damage to coral reefs from the spread of the Crown of Thorns starfish; Tuvalu is concerned about global increases in greenhouse gas emissions and their effect on rising sea levels, which threaten the country's underground water table; in 2000, the government appealed to Australia and New Zealand to take in Tuvaluans if rising sea levels should make evacuation necessary

Environment—International agreements: party to: Biodiversity, Climate Change, Climate Change-Kyoto Protocol, Desertification, Law of the Sea, Ozone Layer Protection, Ship Pollution, Whaling signed, but not ratified: none of the selected agreements

Geography—note: one of the smallest and most remote countries on Earth; six of the nine coral atolls—Nanumea, Nui, Vaitupu, Nukufetau, Funafuti, and Nukulaelae—have lagoons open to the ocean; Nanumaya and Nuiatao have landlocked lagoons; Niulakita does not have a lagoon

lyrics/music: Afaese MANOA

note: adopted 1978; the anthem's name is also the nation's motto

ECONOMY

Economy—overview: Tuvalu consists of a densely populated, scattered group of nine coral atolls with poor soil. The country has no known mineral resources and few exports and is almost entirely dependent upon imported food and fuel. Subsistence farming and fishing are the primary economic activities. Fewer than 1,000 tourists, on average, visit Tuvalu annually. Job opportunities are scarce and public sector workers make up most of those employed. About 15% of the adult male population work as seamen on merchant ships abroad, and remittances are a vital source of income contributing around \$2 million in 2007. Substantial income is received annually from the Tuvalu Trust Fund (TTF) an international trust fund established in 1987 by Australia, NZ, and the UK and supported also by Japan and South Korea. Thanks to wise investments and conservative withdrawals, this fund grew from an initial \$17 million to an estimated value of \$77 million in 2006. The TTF contributed nearly \$9 million towards the government budget in 2006 and is an important cushion for meeting shortfalls in the government's budget. The US Government is also a major revenue source for Tuvalu because of payments from a 1988 treaty on fisheries. In an effort to ensure financial stability and sustainability, the government is pursuing public sector reforms, including privatization of some government functions and personnel cuts. Tuvalu also derives royalties from the lease of its ".tv" Internet domain name with revenue of more than \$2 million in 2006. A minor source of government revenue comes from the sale of stamps and coins. With merchandise exports only a fraction of merchandise imports, continued reliance must be placed on fishing and telecommunications license fees, remittances from overseas workers, official transfers, and income from overseas investments. Growing income disparities and the vulnerability of the country to climatic change are among leading concerns for the nation.

INTRODUCTION

Background: The colonial boundaries created by Britain to delimit Uganda grouped together a wide range of ethnic groups with different political systems and cultures. These differences prevented the establishment of a working political community after independence was achieved in 1962. The dictatorial regime of Idi AMIN (1971–79) was responsible for the deaths of some 300,000 opponents; guerrilla war and human rights abuses under Milton OBOTE (1980–85) claimed at least another 100,000 lives. The rule of Yoweri MUSEVENI since 1986 has brought relative stability and economic growth to Uganda. During the 1990s, the government promulgated non-party presidential and legislative elections.

ECONOMY

Economy—overview: Uganda has substantial natural resources, including fertile soils, regular rainfall, small deposits of copper, gold, and other minerals, and recently discovered oil. Uganda has never conducted a national minerals survey. Agriculture is the most important sector of the economy, employing over 80% of the work force. Coffee accounts for the bulk of export revenues. Since 1986, the government—with the support of foreign countries and international agencies—has acted to rehabilitate and stabilize the economy by undertaking currency reform, raising producer prices on export crops, increasing prices of petroleum products, and improving civil service wages. The policy changes are especially aimed at dampening inflation and boosting production and export earnings. Since 1990 economic reforms ushered in an era of solid economic growth based on continued investment in infrastructure, improved incentives for production and exports, lower inflation, better domestic security, and the return of exiled Indian-Ugandan entrepreneurs. Uganda has received about \$2 billion in multilateral and bilateral debt relief. In 2007 Uganda received \$10 million for a Millennium Challenge Account Threshold Program. The global economic downturn has hurt Uganda's exports; however, Uganda's GDP growth is still relatively strong due to past reforms and sound management of the downturn. Oil revenues and taxes will become a larger source of

government funding as oil comes on line in the next few years. Rising food and fuel prices in 2011 led to protests. Instability in southern Sudan is a risk for the Ugandan economy in 2012 because Uganda's main export partner is Sudan, and Uganda is a key destination for Sudanese refugees.

UKRAINE

INTRODUCTION

Background: Ukraine was the center of the first eastern Slavic state, Kyivan Rus, which during the 10th and 11th centuries was the largest and most powerful state in Europe. Weakened by internecine quarrels and Mongol invasions, Kyivan Rus was incorporated into the Grand Duchy of Lithuania and eventually into the Polish-Lithuanian Commonwealth. The cultural and religious legacy of Kyivan Rus laid the foundation for

Ukrainian nationalism through subsequent centuries. A new Ukrainian state, the Cossack Hetmanate, was established during the mid-17th century after an uprising against the Poles. Despite continuous Muscovite pressure, the Hetmanate managed to remain autonomous for well over 100 years. During the latter part of the 18th century, most Ukrainian ethnographic territory was absorbed by the Russian Empire. Following the collapse of czarist Russia in 1917, Ukraine was able to achieve a short-lived

period of independence (1917–20), but was reconquered and forced to endure a brutal Soviet rule that engineered two forced famines (1921–22 and 1932–33) in which over 8 million died. In World War II, German and Soviet armies were responsible for some 7 to 8 million more deaths. Although final independence for Ukraine was achieved in 1991 with the dissolution of the USSR, democracy and prosperity remained elusive as the legacy of state control and endemic corruption stalled efforts at economic reform, privatization, and civil liberties. A peaceful mass protest “Orange Revolution” in the closing months of 2004 forced the authorities to overturn a rigged presidential election and to allow a new internationally monitored vote that swept into power a reformist slate under Viktor YUSHCHENKO. Subsequent internal squabbles in the YUSHCHENKO camp allowed his rival Viktor YANUKOVYCH to stage a comeback in parliamentary elections and become prime minister in August of 2006. An early legislative election, brought on by a political crisis in the spring of 2007, saw Yuliya TYMOSHENKO, as head of an “Orange” coalition, installed as a new prime minister in December 2007. Viktor YANUKOVYCH was elected president in a February 2010 run-off election that observers

assessed as meeting most international standards. The following month, the Rada approved a vote of no-confidence prompting Yuliya TYMOSHENKO to resign from her post as prime minister.

ECONOMY

Economy—overview: After Russia, the Ukrainian republic was the most important economic component of the former Soviet Union, producing about four times the output of the next-ranking republic. Its fertile black soil generated more than one-fourth of Soviet agricultural output, and its farms provided substantial quantities of meat, milk, grain, and vegetables to other republics. Likewise, its diversified heavy industry supplied the unique equipment (for example, large diameter pipes) and raw materials to industrial and mining sites (vertical drilling apparatus) in other regions of the former USSR. Shortly after independence in August 1991, the Ukrainian Government liberalized most prices and erected a legal framework for privatization, but widespread resistance to reform within the government and the legislature soon stalled reform efforts and led to some backtracking. Output by 1999 had fallen to less than 40% of the 1991 level. Ukraine's dependence on Russia for energy supplies and the lack of significant structural reform have made the Ukrainian economy vulnerable to external shocks. Ukraine depends on imports to meet about three-fourths of its annual oil

and natural gas requirements and 100% of its nuclear fuel needs. After a two-week dispute that saw gas supplies cutoff to Europe, Ukraine agreed to 10-year gas supply and transit contracts with Russia in January 2009 that brought gas prices to "world" levels. The strict terms of the contracts have further hobbled Ukraine's cash-strapped state gas company, Naftohaz. Outside institutions—particularly the IMF—have encouraged Ukraine to quicken the pace and scope of reforms. Ukrainian Government officials eliminated most tax and customs privileges in a March 2005 budget law, bringing more economic activity out of Ukraine's large shadow economy, but more improvements are needed, including fighting corruption, developing capital markets, and improving the legislative framework. Ukraine's economy was buoyant despite political turmoil between the prime minister and president until mid-2008. Real GDP growth exceeded 7% in 2006–07, fueled by high global prices for steel—Ukraine's top export—and by strong domestic consumption, spurred by rising pensions and wages. A drop in steel prices and Ukraine's exposure to the global financial crisis due to aggressive foreign borrowing lowered growth in 2008. Ukraine reached an agreement with the IMF for a \$16.4 billion Stand-By Arrangement in November 2008 to deal with the economic crisis, but the program quickly stalled due to the Ukrainian Government's lack of progress in implementing reforms. The economy contracted nearly 15% in 2009, among the worst economic performances in the world. In April 2010, Ukraine negotiated a price discount on Russian gas imports in exchange for extending Russia's lease on its naval base in Crimea. In August 2010, Ukraine, under the YANUKOVYCH Administration, reached a new agreement with the IMF for a \$15.1 billion Stand-By Agreement to put the country on the path to fiscal sustainability, reform the gas sector, and shore up the country's banking system. Economic growth resumed in 2010 and 2011, buoyed by exports. After initial disbursements, the IMF program stalled in early 2011 due to the Ukrainian Government's lack of progress in implementing key gas sector reforms, namely gas tariff increases.

Telephones—mobile cellular:

53.929 million (2009)

country comparison to the world: 23

Telephone system: general assessment: Ukraine's telecommunication development plan emphasizes improving domestic trunk lines, international connections, and the mobile-cellular system

domestic: at independence in December 1991, Ukraine inherited a telephone system that was antiquated, inefficient, and in disrepair; more than 3.5 million applications for telephones could not be satisfied; telephone density is rising and the domestic trunk system is being improved; about one-third of Ukraine's networks are digital and a majority of regional centers now have digital switching stations; improvements in local networks and local exchanges continue to lag; the mobile-cellular telephone system's expansion has slowed, largely due to saturation of the market which has reached 120 mobile phones per 100 people

international: country code—380; 2 new domestic trunk lines are a part of the fiber-optic Trans-Asia-Europe (TAE) system and 3 Ukrainian links have been installed in the fiber-optic Trans-European Lines (TEL) project that connects 18 countries; additional international service is provided by the Italy-Turkey-Ukraine-Russia (ITUR) fiber-optic submarine cable and by an unknown number of earth stations in the Intelsat, Inmarsat, and Intersputnik satellite systems

Broadcast media: Ukraine's state-controlled nationwide TV broadcast channel

(UT1) and a number of privately-owned TV networks provide basic TV coverage; multi-channel cable and satellite TV services are available; Russian television broadcasts have a small audience nationwide, but larger audiences in the eastern and southern regions; Ukraine's radio broadcast market, a mix of independent and state-owned networks, is comprised of some 300 stations (2007)

TRANSNATIONAL ISSUES

Disputes—International: 1997 boundary delimitation treaty with Belarus remains unratified due to unresolved financial claims, stalling demarcation and reducing border security; delimitation of land boundary with Russia is complete with preparations for demarcation underway; the dispute over the boundary between Russia and Ukraine through the Kerch Strait and Sea of Azov remains unresolved despite a December 2003 framework agreement and ongoing expert-level discussions; Moldova and Ukraine operate joint customs posts to monitor transit of people and commodities through Moldova's break-away Transnistria Region, which remains under Organization for Security and Cooperation in Europe supervision; the ICJ ruled largely in favor of Romania its dispute submitted in 2004 over Ukrainian-administered Zmiynyy/Serpilor (Snake) Island and Black Sea maritime boundary delimitation; Romania opposes Ukraine's reopening of a navigation canal from the Danube border through Ukraine to the Black Sea

Illicit drugs: limited cultivation of cannabis and opium poppy, mostly for CIS consumption; some synthetic drug production for export to the West; limited government eradication program; used as transshipment point for opiates and other illicit drugs from Africa, Latin America, and Turkey to Europe and Russia; Ukraine has improved anti-money-laundering controls, resulting in its removal from the Financial Action Task Force's (FATF's) Noncooperative Countries and Territories List in February 2004; Ukraine's anti-money-laundering regime continues to be monitored by FATF

UNITED ARAB EMIRATES

INTRODUCTION

Background: The Trucial States of the Persian Gulf coast granted the UK control of their defense and foreign affairs in 19th century treaties. In 1971, six of these states—Abu Zaby, 'Ajman, Al Fujayrah, Ash Shariqah, Dubayy, and Umm al Qaywayn—merged to form the United Arab Emirates (UAE). They were joined in 1972 by Ra's al Khaymah. The UAE's per capita GDP is on par with those of leading West European nations. Its generosity with oil revenues and its moderate foreign policy stance have allowed the UAE to play a vital role in the affairs of the region. For more than three decades, oil and global finance drove the UAE's economy. However, in 2008–09, the confluence of falling oil prices, collapsing real estate prices, and the international banking crisis hit the UAE especially hard. In March 2011, about 100 Emirati activists and intellectuals posted on the Internet and sent to the government a petition calling for greater political reform, including the establishment of a parliament with full legislative powers and the further expansion of the electorate and the rights of the Federal National Council (FNC), the UAE's quasi-legislature. In an effort to stem further unrest, the government announced a multi-year, \$1.6-billion infrastructure investment plan for the poorer northern Emirates. In late September 2011, an FNC election—in which voting was expanded from 6,600 voters to about 12 percent of the Emirati population—was held for half of the FNC seats. The other half are appointed by the rulers of the Emirates.

ECONOMY

Economy—overview: The UAE has an open economy with a high per capita income and a sizable annual trade surplus. Successful efforts at economic diversification have reduced the portion of GDP based on oil and gas output to 25%. Since the discovery of oil in the UAE more than 30 years ago, the UAE has undergone a profound transformation from an impoverished region of small desert principalities to a modern state with a high standard of living. The government has increased spending on job creation and infrastructure expansion and is opening up utilities to greater private sector involvement. In April 2004, the UAE signed a Trade and Investment Framework Agreement with Washington and in November 2004 agreed to undertake negotiations toward a Free Trade Agreement with the US, however, those talks have not moved forward. The country's Free Trade Zones—offering 100% foreign ownership and zero taxes—are helping to attract foreign investors. The global financial crisis, tight international credit, and deflated asset prices constricted the

economy in 2009. UAE authorities tried to blunt the crisis by increasing spending and boosting liquidity in the banking sector. The crisis hit Dubai hardest, as it was heavily exposed to depressed real estate prices. Dubai lacked sufficient cash to meet its debt obligations, prompting global concern about its solvency. The UAE Central Bank and Abu Dhabi-based banks bought the largest shares. In December 2009 Dubai received an additional \$10 billion loan from the emirate of Abu Dhabi. The economy is expected to continue a slow rebound. Dependence on oil, a large expatriate workforce, and growing inflation pressures are significant long-term challenges. The UAE's strategic plan for the next few years focuses on diversification and creating more opportunities for nationals through improved education and increased private sector employment.

TRANSNATIONAL ISSUES

Disputes—International: boundary agreement was signed and ratified with Oman in 2003 for entire border, including Oman's Musandam Peninsula and Al Madhah enclaves, but contents of the agreement and detailed maps showing the alignment have not been published; Iran and UAE dispute Tunb Islands and Abu Musa Island, which Iran occupies

Illicit drugs: the UAE is a drug transshipment point for traffickers given its proximity to Southwest Asian drug-producing countries; the UAE's position as a major financial center makes it vulnerable to money laundering; anti-money-laundering controls improving, but informal banking remains unregulated

UNITED KINGDOM

INTRODUCTION

Background: The United Kingdom has historically played a leading role in developing parliamentary democracy and in advancing literature and science. At its zenith in the 19th century, the British Empire stretched over one-fourth of the earth's surface. The first half of the 20th century saw the UK's strength seriously depleted in two world wars and the Irish Republic's withdrawal from the union. The second half witnessed the dismantling of the Empire and the UK rebuilding itself into a modern and prosperous European nation. As one of five permanent members of the UN Security Council and a founding member of NATO and the Commonwealth, the UK pursues a global approach to foreign policy. The UK is also an active member of the EU, although it chose to remain outside the Economic and Monetary Union. The Scottish Parliament, the National Assembly for Wales, and the Northern Ireland Assembly were established in 1999. The latter was suspended until May 2007 due to wrangling over the peace process, but devolution was fully completed in March 2010.

ECONOMY

Economy—overview: The UK, a leading trading power and financial center, is the third largest economy in Europe after Germany and France. Over the past two decades, the government has greatly reduced public ownership and contained the growth of social welfare programs. Agriculture is intensive, highly mechanized, and efficient by European standards, producing about 60% of food needs with less than 2% of the labor force. The UK has large coal, natural gas, and oil resources, but its oil and natural gas reserves are declining and the UK became a net importer of energy in 2005. Services, particularly banking, insurance, and business services, account by far for the largest proportion of GDP while industry continues to decline in importance. After emerging from recession in 1992, Britain's economy enjoyed the longest period of expansion on record during which time growth outpaced most of Western Europe. In 2008, however, the global financial crisis hit the economy

particularly hard, due to the importance of its financial sector. Sharply declining home prices, high consumer debt, and the global economic slowdown compounded Britain's economic problems, pushing the economy into recession in the latter half of 2008 and prompting the then BROWN (Labour) government to implement a number of measures to stimulate the economy and stabilize the financial markets; these include nationalizing parts of the banking system, temporarily cutting taxes, suspending public sector borrowing rules, and moving forward public spending on capital projects. Facing burgeoning public deficits and debt levels, in 2010 the CAMERON-led coalition government (between Conservatives and Liberal Democrats) initiated a five-year austerity program, which aims to lower London's budget deficit from over 10% of GDP in 2010 to nearly 1% by 2015. In November 2011, Chancellor of the Exchequer George OSBORNE announced additional austerity measures through 2017 because of slower-than-expected economic growth and the impact of the euro-zone debt crisis. The CAMERON government raised the value added tax from 17.5% to 20% in 2011. It has pledged to reduce the corporation tax rate to 23% by 2015. The Bank of England (BoE) implemented an asset purchase program of up to £325 billion (approximately \$525 billion) as of February 2011. During times of economic crisis, the BoE coordinates interest rate moves with the European Central Bank, but Britain remains outside the European Economic and Monetary Union (EMU).

TRANSNATIONAL ISSUES

Disputes—International: in 2002, Gibraltar residents voted overwhelmingly by referendum to reject any “shared sovereignty” arrangement between the UK and Spain; the Government of Gibraltar insisted on equal participation in talks between the two countries; Spain disapproved of UK plans to grant Gibraltar greater autonomy; Mauritius and Seychelles claim the Chagos Archipelago (British Indian Ocean Territory); in 2001, the former inhabitants of the archipelago, evicted 1967–1973, were granted U.K. citizenship and the right of return, followed by Orders in Council in 2004 that banned rehabilitation, a High Court ruling reversed the ban, a Court of Appeal refusal to hear the case, and a Law Lords’ decision in 2008 denied the right of return;

in addition, the United Kingdom created the world’s largest marine protection area around the Chagos islands prohibiting the extraction of any natural resources therein; UK rejects sovereignty talks requested by Argentina, which still claims the Falkland Islands (Islas Malvinas) and South Georgia and the South Sandwich Islands; territorial claim in Antarctica (British Antarctic Territory) overlaps Argentine claim and partially overlaps Chilean claim; Iceland, the UK, and Ireland dispute Denmark’s claim that the Faroe Islands’ continental shelf extends beyond 200 nm

Illicit drugs: producer of limited amounts of synthetic drugs and synthetic precursor chemicals; major consumer of Southwest Asian heroin, Latin American cocaine, and synthetic drugs; money-laundering center

UNITED STATES

INTRODUCTION

Background: Britain’s American colonies broke with the mother country in 1776 and were recognized as the new nation of the United States of America following the Treaty of Paris in 1783. During the 19th and 20th centuries, 37 new states were added to the original 13 as the nation expanded across the North American continent and acquired a number of overseas possessions. The two most traumatic experiences in the nation’s history were the Civil War (1861–65), in which a northern Union of states defeated a secessionist Confederacy of 11 southern slave states, and the Great Depression of the 1930s, an economic downturn during which about a quarter of the labor force lost its jobs. Buoyed by victories in World Wars I and

II and the end of the Cold War in 1991, the US remains the world’s most powerful nation state. Since the end of World War II, the economy has achieved relatively steady growth, low unemployment and inflation, and rapid advances in technology.

GEOGRAPHY

Location: North America, bordering both the North Atlantic Ocean and the North Pacific Ocean, between Canada and Mexico
Geographic coordinates: 38 00 N, 97 00 W
Map references: North America

Area: total: 9,826,675 sq km

country comparison to the world: 3

land: 9,161,966 sq km

water: 664,709 sq km

note: includes only the 50 states and District of Columbia

Area—comparative: about half the size of Russia; about three-tenths the size of Africa; about half the size of South America (or slightly larger than Brazil); slightly larger than China; more than twice the size of the European Union

Land boundaries: total: 12,034 km
border countries: Canada 8,893 km (including 2,477 km with Alaska), Mexico 3,141 km

note: US Naval Base at Guantanamo Bay, Cuba is leased by the US and is part of Cuba; the base boundary is 28 km

Coastline: 19,924 km

Maritime claims: territorial sea: 12 nm

contiguous zone: 24 nm

exclusive economic zone: 200 nm

continental shelf: not specified

Climate: mostly temperate, but tropical in Hawaii and Florida, arctic in Alaska, semi-arid in the great plains west of the Mississippi River, and arid in the Great Basin of the southwest; low winter temperatures in the northwest are ameliorated occasionally in January and February by warm chinook winds from the eastern slopes of the Rocky Mountains

Terrain: vast central plain, mountains in west, hills and low mountains in east; rugged mountains and broad river valleys in Alaska; rugged, volcanic topography in Hawaii

Elevation extremes: lowest point: Death Valley -86 m

highest point: Mount McKinley 6,194 m

note: the peak of Mauna Kea (4,207 m above sea level) on the island of Hawaii rises about 10,200 m above the Pacific Ocean floor; by this measurement, it is

the world's tallest mountain—higher than Mount Everest, which is recognized as the tallest mountain above sea level

Natural resources: coal, copper, lead, molybdenum, phosphates, rare earth elements, uranium, bauxite, gold, iron, mercury, nickel, potash, silver, tungsten, zinc, petroleum, natural gas, timber

ECONOMY

Economy—overview: The US has the largest and most technologically powerful economy in the world, with a per capita GDP of \$48,100. In this market-oriented economy, private individuals and business firms make most of the decisions, and the federal and state governments buy needed goods and services predominantly in the private marketplace. US business firms enjoy greater flexibility than their counterparts in Western Europe and Japan in decisions to expand capital plant, to lay off surplus workers, and to develop new products. At the same time, they face higher barriers to enter their rivals' home markets than foreign firms face entering US markets. US firms are at or near the forefront in technological advances, especially in computers and in medical, aerospace, and military equipment; their advantage has narrowed since the end of World War II. The onrush of technology largely explains

the gradual development of a "two-tier labor market" in which those at the bottom lack the education and the professional/technical skills of those at the top and, more and more, fail to get comparable pay raises, health insurance coverage, and other benefits. Since 1975, practically all the gains in household income have gone to the top 20% of households. Since 1996, dividends and capital gains have grown faster than wages or any other category of after-tax income. Imported oil accounts for nearly 55% of US consumption. Oil prices doubled between 2001 and 2006, the year home prices peaked; higher gasoline prices ate into consumers' budgets and many individuals fell behind in their mortgage payments. Oil prices increased another 50% between 2006 and 2008. In 2008, soaring oil prices threatened inflation and caused a deterioration in the US merchandise trade deficit, which peaked at \$840 billion. In 2009, with the global recession deepening, oil prices dropped 40% and the US trade deficit shrank, as US domestic demand declined, but in 2011 the trade deficit ramped back up to \$803 billion, as oil prices climbed once more. The global economic downturn, the sub-prime mortgage crisis, investment bank failures, falling home prices, and tight credit pushed the United States into a recession by mid-2008. GDP contracted until the third quarter of 2009, making this the deepest and longest downturn since the Great Depression. To help stabilize financial markets, in October 2008 the US Congress established a \$700 billion Troubled Asset Relief Program (TARP). The government used some of these funds to purchase equity in US banks and industrial corporations, much of which had been returned to the government by early 2011. In January 2009 the US Congress passed and President Barack OBAMA signed a bill providing an additional \$787 billion fiscal stimulus to be used over 10 years—two-thirds on additional spending and one-third on tax cuts—to create jobs and to help the economy recover. In 2010 and 2011, the federal budget deficit reached nearly 9% of GDP; total government revenues from taxes and other sources are lower, as a percentage of GDP, than that of most other developed countries. The wars in Iraq and Afghanistan required major shifts in national resources from civilian to military purposes and contributed to the growth of the US budget deficit and public debt—through 2011, the direct costs of the wars totaled nearly \$900 billion, according to US government figures. In March 2010, President OBAMA signed a health insurance reform bill into law that will extend coverage to an additional 32 million American citizens by 2016, through private health insurance for the general population and Medicaid for the impoverished. In July 2010, the president signed the DODD-FRANK Wall Street Reform and Consumer Protection Act, a bill designed to promote financial stability by protecting consumers from financial abuses, ending taxpayer bailouts of financial firms, dealing with troubled

banks that are "too big to fail," and improving accountability and transparency in the financial system—in particular, by requiring certain financial derivatives to be traded in markets that are subject to government regulation and oversight. Long-term problems include inadequate investment in deteriorating infrastructure, rapidly rising medical and pension costs of an aging population, sizable current account and budget deficits—including significant budget shortages for state governments—energy shortages, and stagnation of wages in lower-income families.

Telephone system: general assessment: a large, technologically advanced, multipurpose communications system

domestic: a large system of fiber-optic cable, microwave radio relay, coaxial cable, and domestic satellites carries every form of telephone traffic; a rapidly growing cellular system carries mobile telephone traffic throughout the country

international: country code–1; multiple ocean cable systems provide international connectivity; satellite earth stations–61 Intelsat (45 Atlantic Ocean and 16 Pacific Ocean), 5 Intersputnik (Atlantic Ocean region), and 4 Innmarsat (Pacific and Atlantic Ocean regions) (2000)

Broadcast media: 4 major terrestrial TV networks with affiliate stations throughout the country, plus cable and satellite networks, independent stations, and a limited public broadcasting sector that is largely supported by private grants; overall,

thousands of TV stations broadcasting; multiple national radio networks with many affiliate stations; while most stations are commercial, National Public Radio (NPR) has a network of some 600 member stations; satellite radio available; overall, nearly 15,000 radio stations operating (2008)

TRANSNATIONAL ISSUES

Disputes—International: the US has intensified domestic security measures and is collaborating closely with its neighbors, Canada and Mexico, to monitor and control legal and illegal personnel, transport, and commodities across the international borders; abundant rainfall in recent years along much of the Mexico-US border region has ameliorated periodically strained water-sharing arrangements; 1990 Maritime Boundary Agreement in the Bering Sea still awaits Russian Duma ratification; Canada and the United States dispute how to divide the Beaufort Sea and the status of the Northwest Passage but continue to

work cooperatively to survey the Arctic continental shelf; The Bahamas and US have not been able to agree on a maritime boundary; US Naval Base at Guantanamo Bay is leased from Cuba and only mutual agreement or US abandonment of the area can terminate the lease; Haiti claims US-administered Navassa Island; US has made no territorial claim in Antarctica (but has reserved the right to do so) and does not recognize the claims of any other states; Marshall Islands claims Wake Island; Tokelau included American Samoa's Swains Island among the islands listed in its 2006 draft constitution

Refugees and Internally Displaced

persons:

refugees (country of origin): the US admitted 62,643 refugees during FY04/05 including; 10,586 (Somalia); 8,549 (Laos); 6,666 (Russia); 6,479 (Cuba); 3,100 (Haiti); 2,136 (Iran) (2006)

Illicit drugs: world's largest consumer of cocaine (shipped from Colombia through Mexico and the Caribbean), Colombian heroin, and Mexican heroin and marijuana; major consumer of ecstasy and Mexican methamphetamine; minor consumer of high-quality Southeast Asian heroin; illicit producer of cannabis, marijuana, depressants, stimulants, hallucinogens, and methamphetamine; money-laundering center

UNITED STATES PACIFIC ISLAND WILDLIFE REFUGES

INTRODUCTION

Background: All of the following US Pacific island territories except Midway Atoll constitute the Pacific Remote Islands National Wildlife Refuge (NWR) Complex and as such are managed by the Fish and Wildlife Service of the US Depart-

ment of the Interior. Midway Atoll NWR has been included in a Refuge Complex with the Hawaiian Islands NWR and also designated as part of Papahānaumokuākea Marine National Monument. These remote refuges are the most widespread collection of marine- and terrestrial-life protected areas on the planet under a single country's jurisdiction. They sustain many endemic species including corals, fish, shellfish, marine mammals, seabirds, water birds, land birds, insects, and vegetation not found elsewhere. **Baker Island:** The US took possession of the island in 1857. Its guano deposits were mined by US and British companies during the second half of the 19th century. In 1935, a short-lived attempt at colonization began on this island but was disrupted by World War II and thereafter abandoned. The island was established as a NWR in 1974.

Howland Island: Discovered by the US early in the 19th century, the uninhabited atoll was officially claimed by the US in 1857. Both US and British companies mined for guano deposits until about 1890. In 1935, a short-lived attempt at colonization began on this island, similar to the effort on nearby Baker Island, but was disrupted by World War II and thereafter

abandoned. The famed American aviatrix Amelia EARHART disappeared while seeking out Howland Island as a refueling stop during her 1937 round-the-world flight; Earhart Light, a day beacon near the middle of the west coast, was named in her memory. The island was established as a NWR in 1974.

Jarvis Island: First discovered by the British in 1821, the uninhabited island was annexed by the US in 1858 but abandoned in 1879 after tons of guano had been removed. The UK annexed the island in 1889 but never carried out plans for further exploitation. The US occupied and reclaimed the island in 1935. It was abandoned in 1942 during World War II. The island was established as a NWR in 1974.

Johnston Atoll: Both the US and the Kingdom of Hawaii annexed Johnston Atoll in 1858, but it was the US that mined the guano deposits until the late 1880s. Johnston and Sand Islands were designated wildlife refuges in 1926. The US Navy took over the atoll in 1934. Subsequently, the US Air Force assumed control in 1948. The site was used for high-altitude nuclear tests in the 1950s and 1960s. Until late in 2000 the atoll was maintained as a storage and disposal site for chemical weapons.

Munitions destruction, cleanup, and closure of the facility were completed by May 2005. The Fish and Wildlife Service and the US Air Force are currently discussing future management options; in the interim, Johnston Atoll and the three-mile Naval Defensive Sea around it remain under the jurisdiction and administrative control of the US Air Force.

Kingman Reef: The US annexed the reef in 1922. Its sheltered lagoon served as a way station for flying boats on Hawaii-to-American Samoa flights during the late 1930s. There are no terrestrial plants on the reef, which is frequently awash, but it does support abundant and diverse marine fauna and flora. In 2001, the waters surrounding the reef out to 12 nm were designated a US NWR.

Midway Islands: The US took formal possession of the islands in 1867. The laying of the trans-Pacific cable, which passed through the islands, brought the first residents in 1903. Between 1935 and 1947, Midway was used as a refueling stop for trans-Pacific flights. The US naval victory over a Japanese fleet off Midway in 1942 was one of the turning points of World War II. The islands continued to serve as a naval station until closed in 1993. Today the islands are a NWR and are the site of the world's largest Laysan albatross colony. **Palmyra Atoll:** The Kingdom of Hawaii claimed the atoll in 1862, and the US included it among the Hawaiian Islands when it annexed the archipelago in 1898. The Hawaii Statehood Act of 1959 did not include Palmyra Atoll, which is now partly privately owned by the Nature Conservancy with the rest owned by the Federal government and managed by the US Fish and Wildlife Service. These organizations are managing the atoll as a wildlife refuge. The lagoons and surrounding waters within the 12 nm US territorial seas were transferred to the US Fish and Wildlife Service and designated as a NWR in January 2001.

URUGUAY

INTRODUCTION

Background: Montevideo, founded by the Spanish in 1726 as a military stronghold, soon took advantage of its natural harbor to become an important commercial center. Claimed by Argentina but annexed by Brazil in 1821, Uruguay declared its independence four years later and secured its freedom in 1828 after a three-year struggle. The administrations of President Jose BATLE in the early 20th century established widespread political, social, and economic reforms that established a statist tradition. A violent Marxist urban guerrilla movement named the Tupamaros, launched in the late 1960s,

led Uruguay's president to cede control of the government to the military in 1973. By yearend, the rebels had been crushed, but the military continued to expand its hold over the government. Civilian rule was not restored until 1985. In 2004, the left-of-center Frente Amplio Coalition won national elections that effectively ended 170 years of political control previously held by the Colorado and Blanco parties. Uruguay's political and labor conditions are among the freest on the continent.

Flag description: nine equal horizontal stripes of white (top and bottom) alternating with blue; a white square in the upper hoist-side corner with a yellow sun bearing a human face known as the Sun of May with 16 rays that alternate between triangular and wavy; the stripes represent the nine original departments of Uruguay; the sun symbol evokes the legend of the sun breaking through the clouds on 25 May 1810 as independence was first declared from Spain (Uruguay subsequently won its independence from Brazil)

note: the banner was inspired by the national colors of Argentina and by the design of the US flag

National symbol(s): Sun of May (a sun-with-face symbol)

National anthem: name: "Himno Nacional" (National Anthem of Uruguay)

lyrics/music: Francisco Esteban ACUNA de Figueroa/Francisco Jose DEBALI
note: adopted 1848; the anthem is also known as "Orientales, la Patria o la tumba!" ("Uruguayans, the Fatherland or Death!"); it is the world's longest national anthem in terms of music (105 bars; almost five minutes); generally only the first verse and chorus are sung

ECONOMY

Economy—overview: Uruguay's economy is characterized by an export-oriented agricultural sector, a well-educated work force, and high levels of social spending. Following financial difficulties in the late 1990s and early 2000s, economic growth for Uruguay averaged 8% annually during the period 2004–08. The 2008–09 global financial crisis put a brake on Uruguay's vigorous growth, which decelerated to 2.6% in 2009. Nevertheless, the country managed to avoid a recession and keep positive growth rates, mainly through higher public expenditure and investment, and GDP growth reached 8.5% in 2010 and 6% in 2011.

INTRODUCTION

Background: Russia conquered the territory of present-day Uzbekistan in the late 19th century. Stiff resistance to the Red Army after the Bolshevik Revolution was eventually suppressed and a socialist republic established in 1924. During the Soviet era, intensive production of “white gold” (cotton) and grain led to overuse of agrochemicals and the depletion of water supplies, which have left the land degraded and the Aral Sea and certain rivers half dry. Independent since 1991, the country seeks to gradually lessen its dependence on the cotton monoculture by diversifying agricultural production while developing its mineral and petroleum reserves and increasing its manufacturing base. Current concerns include terrorism by Islamic militants, economic stagnation, and the curtailment of human rights and democratization.

National anthem: name: "O'zbekiston Respublikasining Davlat Madhiyasi" (National Anthem of the Republic of Uzbekistan)

lyrics/music: Abdulla ARIPOV/Mutal BURHANOV

note: adopted 1992; after the fall of the Soviet Union, Uzbekistan kept the music of the anthem from its time as a Soviet Republic but adopted new lyrics

ECONOMY

Economy—overview: Uzbekistan is a dry, landlocked country; 11% of the land is intensely cultivated, in irrigated river valleys. More than 60% of the population lives in densely populated rural communities. Export of hydrocarbons, primarily natural gas, provided about 40% of foreign exchange earnings in 2009. Other major export earners include gold and cotton. Uzbekistan is now the world's second-largest cotton exporter and fifth largest producer; it has come under increasing international criticism for the use of child labor in its annual cotton harvest. Uzbekistan enjoyed a bumper cotton crop in 2010 amidst record high prices, but is gradually diversifying away from cotton toward more high-value fruits and vegetables. Following independence in September 1991, the government sought to prop up its Soviet-style command economy with subsidies and tight controls on production and prices. While aware of the need to improve the

investment climate, the government still sponsors measures that often increase, not decrease, its control over business decisions. A sharp increase in the inequality of income distribution has hurt the lower ranks of society since independence. In 2003, the government accepted Article VIII obligations under the IMF providing for full currency convertibility. However, strict currency controls and tightening of borders have lessened the effects of convertibility and have also led to some shortages that have further stifled economic activity. The Central Bank often delays or restricts convertibility, especially for consumer goods. Uzbekistan has posted GDP growth of over 8% for the past several years, driven primarily by rising world prices for its main export commodities—natural gas, cotton and gold—and some industrial growth. In 2006, Uzbekistan took steps to rejoin the Collective Security Treaty Organization (CSTO) and the Eurasian Economic Community (EurASEC), which it subsequently left in 2008, both organizations dominated by Russia. In the past Uzbekistani authorities have accused US and other foreign companies operating in Uzbekistan of violating Uzbekistani tax laws and have frozen their assets, with several new expropriations in 2010–11. At the same time, the Uzbekistani Government has actively courted several major US and international corporations, offering attractive financing and tax advantages, and has landed a significant US investment in the automotive industry, including the opening of a powertrain manufacturing facility in Tashkent in November, 2011. Uzbekistan has seen few effects from the global economic downturn, primarily due to its relative isolation from the global financial markets.

TRANSNATIONAL ISSUES

Disputes—international:

prolonged drought and cotton monoculture in Uzbekistan and Turkmenistan created water-sharing difficulties for Amu

Darya river states; field demarcation of the boundaries with Kazakhstan commenced in 2004; border delimitation of 130 km of border with Kyrgyzstan is hampered by serious disputes around enclaves and other areas

Refugees and internally displaced persons:

refugees (*country of origin*): 39,202 (Tajikistan); 1,060 (Afghanistan)

IDPs: 3,400 (forced population transfers by government from villages near Tajikistan border) (2007)

Trafficking in persons: *current situation:*

Uzbekistan is a source country for women and girls trafficked to Kazakhstan, Russia, the Middle East, and Asia for the purpose of commercial sexual exploitation; men are trafficked to Kazakhstan and Russia for purposes of forced labor in the construction, cotton, and tobacco industries; men and women are also trafficked internally for the purposes of domestic servitude, forced labor in the agricultural and construction industries, and for commercial sexual exploitation

tier rating: Tier 2 Watch List-Uzbekistan is on the Tier 2 Watch List for its negligible progress in ending forced labor, including forced child labor, in the annual cotton harvest, and did not make efforts to investigate or prosecute government officials suspected to be complicit in forced labor; the government did not conduct any awareness campaigns regarding forced labor in the annual cotton harvest or other internal trafficking, but did continue its previous awareness campaigns about the dangers of transnational trafficking (2008)

Illicit drugs: transit country for Afghan narcotics bound for Russian and, to a lesser extent, Western European markets; limited illicit cultivation of cannabis and small amounts of opium poppy for domestic consumption; poppy cultivation almost wiped out by government crop eradication program; transit point for heroin precursor chemicals bound for Afghanistan

INTRODUCTION

Background: Multiple waves of colonizers, each speaking a distinct language, migrated to the New Hebrides in the millennia preceding European exploration in the 18th century. This settlement pattern accounts for the complex linguistic diversity found on the archipelago to this day. The British and French, who settled the New Hebrides in the 19th century, agreed in 1906 to an Anglo-French Condominium, which administered the islands until independence in 1980, when the new name of Vanuatu was adopted.

ECONOMY

Economy—overview: This South Pacific island economy is based primarily on small-scale agriculture, which provides a living for about two-thirds of the population. Fishing, offshore financial services, and tourism, with nearly 197,000 visitors in 2008, are other mainstays of the economy. Mineral deposits are negligible; the country has no known petroleum deposits. A small light industry sector caters to the local market. Tax revenues come mainly from import duties. Economic development is hindered by dependence on relatively few commodity exports, vulnerability to natural disasters, and long distances from main markets and between constituent islands. In response to foreign concerns, the government has promised to tighten regulation of its offshore financial center. In mid-2002, the government stepped up efforts to boost tourism through improved air connections, resort development, and cruise ship facilities. Agriculture, especially livestock farming, is a second target for growth. Australia and New Zealand are the main suppliers of tourists and foreign aid.

VENEZUELA

INTRODUCTION

Background: Venezuela was one of three countries that emerged from the collapse of Gran Colombia in 1830 (the others being Ecuador and New Granada, which became Colombia). For most of the first half of the 20th century, Venezuela was ruled by generally benevolent military strongmen, who promoted the oil industry and allowed for some social reforms. Democratically elected governments have held sway since 1959. Hugo CHAVEZ, president since 1999, seeks to implement his "21st Century Socialism," which purports to alleviate social ills while at the same time attacking capitalist globalization and existing democratic institutions. Current concerns include: a weakening of democratic institutions, political polarization, a politicized military, drug-related violence along the Colombian border, overdependence on the petroleum industry with its price fluctuations, and irresponsible mining operations that are endangering the rain forest and indigenous peoples.

Flag description: three equal horizontal bands of yellow (top), blue, and red with the coat of arms on the hoist side of the yellow band and an arc of eight white five-pointed stars centered in the blue band; the flag retains the three equal horizontal bands and three main colors of the banner of Gran Colombia, the South American republic that broke up in 1830; yellow is interpreted as standing for the riches of the land, blue for the courage of its people, and red for the blood shed in attaining independence; the seven stars on the original flag represented the seven provinces in Venezuela that united in the war of independence; in 2006, President Hugo CHAVEZ ordered an eighth star added to the star arc—a decision that sparked much controversy—to conform with the flag proclaimed by Simon Bolivar in 1827 and to represent the province of Guayana
National symbol(s): troupial (bird)
National anthem: *name:* "Gloria al bravo pueblo" (Glory to the Brave Nation)
lyrics/music: Vicente SALIAS/Juan Jose LANDAETA
note: adopted 1881; the lyrics were written in 1810, the music some years later; both SALIAS and LANDAETA were executed in 1814 during Venezuela's struggle for independence

ECONOMY

Economy—overview: Venezuela remains highly dependent on oil revenues, which account for roughly 95% of export earnings, about 40% of federal budget revenues, and around 12% of GDP. Fueled by high oil prices, record government spending helped to boost GDP growth by 4.2% in 2011, after a sharp drop in oil prices caused an

economic contraction in 2009–10. Government spending, minimum wage hikes, and improved access to domestic credit created an increase in consumption which combined with supply problems to cause higher inflation—roughly 28% in 2011. President Hugo CHAVEZ's efforts to increase the government's control of the economy by nationalizing firms in the agribusiness, financial, construction, oil, and steel sectors have hurt the private investment environment, reduced productive capacity, and slowed non-petroleum exports. In the first half of 2010 Venezuela faced the prospect of lengthy nationwide blackouts when its main hydroelectric power plant—which provides more than 35% of the country's electricity—nearly shut down. In May 2010, CHAVEZ closed the unofficial foreign exchange market—the “parallel market”—in an effort to stem inflation and slow the currency's depreciation. In June 2010, the government created the “Transaction System for Foreign Currency Denominated Securities” to replace the “parallel” market. In December 2010, CHAVEZ eliminated the dual exchange rate system and unified the exchange rate at 4.3 bolivars per dollar. In January 2011, CHAVEZ announced the second devaluation of the bolivar within twelve months. In December 2010, the National Assembly passed a package of five organic laws designed to complete the transformation of the Venezuelan economy in line with CHAVEZ's vision of 21st century socialism. In 2011, Venezuela continued to wrestle with a housing crisis, higher inflation, an electricity crisis, and rolling food and goods shortages—all of which were fallout from the government's unorthodox economic policies. The budget deficit reached

TRANSNATIONAL ISSUES

Disputes—International: claims all of the area west of the Essequibo River in Guyana, preventing any discussion of a maritime boundary; Guyana has expressed its intention to join Barbados in asserting claims before the United Nations Convention on the Law of the Sea that Trinidad and Tobago's maritime boundary with Venezuela extends into their waters; dispute with Colombia over maritime boundary and Venezuelan administered Los Monjes islands near the Gulf of Venezuela; Colombian organized illegal narcotics and paramilitary activities penetrate Venezuela's shared border region; in 2006, an estimated 139,000 Colombians sought protection in 150 communities along the border in Venezuela; US, France, and the Netherlands recognize Venezuela's granting full effect to Aves Island, thereby claiming a Venezuelan Economic Exclusion Zone/continental shelf extending over a large portion of the eastern Caribbean Sea; Dominica, Saint Kitts and Nevis, Saint Lucia, and Saint Vincent and the Grenadines protest Venezuela's full effect claim

Trafficking in persons:

current situation: Venezuela is a source, transit, and destination country for men, women, and children trafficked for the purposes of commercial sexual exploitation and forced labor; Venezuelan women and girls are trafficked within the country for sexual exploitation, lured from the nation's interior to urban and tourist areas; to a lesser extent, Brazilian women and Colombian women are subjected to forced prostitution; some Venezuelan women are transported to Caribbean islands, particularly Aruba, Curacao, and Trinidad & Tobago, where they are subjected to forced prostitution

tier rating: Tier 3—the government investigated potential cases of suspected human

trafficking and arrested at least 12 people for trafficking crimes during the reporting period; however, there was no further publicly available information regarding those cases; Venezuela is not making significant efforts to comply with the minimum standards for the elimination of trafficking (2008)

Illicit drugs: small-scale illicit producer of opium and coca for the processing of opiates and coca derivatives; however, large quantities of cocaine, heroin, and marijuana transit the country from Colombia bound for US and Europe; significant narcotics-related money-laundering activity, especially along the border with Colombia and

on Margarita Island; active eradication program primarily targeting opium; increasing signs of drug-related activities by Colombian insurgents on border

VIETNAM

INTRODUCTION

Background: The conquest of Vietnam by France began in 1858 and was completed by 1884. It became part of French Indochina in 1887. Vietnam declared independence after World War II, but France continued to rule until its 1954 defeat by Communist forces under Ho Chi MINH. Under the Geneva Accords of 1954, Vietnam was divided into the Communist North and anti-Communist South. US economic and military aid to South Vietnam grew through the 1960s in an attempt to bolster the government, but US armed forces were withdrawn following a cease-fire agreement in 1973. Two years later, North Vietnamese forces overran the South reuniting the country under Communist rule. Despite the return of peace, for over a decade the country experienced little economic growth because of conservative leadership policies, the persecution and mass

exodus of individuals—many of them successful South Vietnamese merchants—and growing international isolation. However, since the enactment of Vietnam's "doi moi" (renovation) policy in 1986, Vietnamese authorities have committed to increased economic liberalization and enacted structural reforms needed to modernize the economy and to produce more competitive, export-driven industries. The Communist leaders, however, maintain control on political expression and have resisted outside calls to improve human rights. The country continues to experience small-scale protests from various groups—the vast majority connected to land-use issues, calls for increased political space, and the lack of equitable mechanisms for resolving disputes. Various ethnic minorities, such as the Montagnards of the Central Highlands and the Khmer Krom in the southern delta region, have also held protests.

ECONOMY

Economy—overview: Vietnam is a densely-populated developing country that in the last 30 years has had to recover from the ravages of war, the loss of financial support from the old Soviet Bloc, and the rigidities of a centrally-planned economy. While Vietnam's economy remains dominated by state-owned enterprises, which still produce about 40% of GDP, Vietnamese authorities have reaffirmed their commitment to economic liberalization and international integration. They have moved to implement the structural reforms needed to modernize the economy and to produce more competitive export-driven industries. Vietnam joined the World Trade Organization in January 2007 following more than a decade-long negotiation process. Vietnam became an official negotiating partner in the developing Trans-Pacific Partnership trade agreement in 2010. Agriculture's share of economic output has

continued to shrink from about 25% in 2000 to about 22% in 2011, while industry's share increased from 36% to 40% in the same period. Deep poverty has declined significantly, and Vietnam is working to create jobs to meet the challenge of a labor force that is growing by more than one million people every year. The global recession has hurt Vietnam's export-oriented economy, with GDP in 2009–11 growing less than the 7% per annum average achieved during the last decade. In 2011, exports increased by more than 33%, year-on-year, and the trade deficit, while reduced from 2010, remained high, prompting the government to maintain administrative trade measures to limit the trade deficit. Vietnam's managed currency, the dong, continues to face downward pressure due to a persistent trade imbalance. Since 2008, the government devalued it in excess of 20% through a series of small devaluations. Foreign donors pledged nearly \$8 billion in new development assistance for 2011. However, the government's strong growth-oriented economic policies have caused it to struggle to control one of the region's highest inflation rates, which reached as high as 23% in August 2011 and averaged 18% for the year. In February 2011, Vietnam shifted its focus away from economic growth to stabilizing its economy and tightened fiscal and monetary policies. In early 2012 Vietnam unveiled a broad "three pillar" economic reform program, proposing the restructuring of public investment, state-owned enterprises and the banking sector. Vietnam's economy continues to face challenges from low foreign exchange reserves, an undercapitalized banking sector, and high borrowing costs. The near-bankruptcy and subsequent default of the state-owned-enterprise Vinashin, a leading shipbuilder, led to a ratings downgrade of Vietnam's sovereign debt, exacerbating Vietnam's borrowing difficulties.

TRANSNATIONAL ISSUES

Disputes—International: southeast Asian states have enhanced border surveillance

to check the spread of avian flu; Cambodia and Laos protest Vietnamese squatters and armed encroachments along border; Cambodia accuses Vietnam of a wide variety of illicit cross-border activities; progress on a joint development area with Cambodia is hampered by an unresolved dispute over sovereignty of offshore islands; an estimated 300,000 Vietnamese refugees reside in China; establishment of a maritime boundary with Cambodia is hampered by unresolved dispute over the sovereignty of offshore islands; the decade-long demarcation of the China-Vietnam land boundary was completed in 2009; China occupies the Paracel Islands also claimed by Vietnam and Taiwan; Brunei claims a maritime boundary extending beyond as far as a median with Vietnam, thus asserting an implicit claim to Lousia Reef; the 2002 "Declaration on the Conduct of Parties in the South China Sea" has eased tensions but falls short of a legally binding "code of conduct" desired

by several of the disputants; Vietnam continues to expand construction of facilities in the Spratly Islands; in March 2005, the national oil companies of China, the Philippines, and Vietnam signed a joint accord to conduct marine seismic activities in the Spratly Islands; Economic Exclusion Zone negotiations with Indonesia are ongoing, and the two countries in Fall 2011 agreed to work together to reduce illegal fishing along their maritime boundary

Illicit drugs: minor producer of opium poppy; probable minor transit point for Southeast Asian heroin; government continues to face domestic opium/heroin/methamphetamine addiction problems despite longstanding crackdowns

VIRGIN ISLANDS

INTRODUCTION

Background: During the 17th century, the archipelago was divided into two territorial units, one English and the other Danish. Sugarcane, produced by slave labor, drove the islands' economy during the 18th and early 19th centuries. In 1917, the US purchased the Danish portion, which had been in economic decline since the abolition of slavery in 1848.

ECONOMY

Economy—overview: Tourism is the primary economic activity, accounting for 80% of GDP and employment. The islands hosted 2.4 million visitors in 2008. The manufacturing sector consists of petroleum refining, rum distilling, textiles, electronics, pharmaceuticals, and watch assembly. One of the world's largest petroleum refineries is at Saint Croix. The agricultural sector is small, with most food being imported. International business and financial services are small but growing components of the economy. The islands are vulnerable to substantial damage from storms. The government is working to improve fiscal discipline, to support construction projects in

the private sector, to expand tourist facilities, to reduce crime, and to protect the environment.

WAKE ISLAND

INTRODUCTION

Background: The US annexed Wake Island in 1899 for a cable station. An important air and naval base was constructed in 1940–41. In December 1941, the island was captured by the Japanese and held until the end of World War II. In subsequent years, Wake was developed as a stopover and refueling site for military and commercial aircraft transiting the Pacific. Since 1974, the island's airstrip has been used by the US military, as well as for emergency landings. Operations on the island were suspended and all personnel evacuated in 2006 with the approach of super typhoon IOKE (category 5), but resultant damage was comparatively minor. A US Air Force repair team restored full capability to the airfield and facilities, which remains a vital strategic link in the Pacific region.

WALLIS AND FUTUNA

INTRODUCTION

Background: The Futuna island group was discovered by the Dutch in 1616 and Wallis by the British in 1767, but it was the French who declared a protectorate over the islands in 1842, and took official control of them between 1886 and 1888. Notably, Wallis and Futuna was the only French colony to side with the Vichy regime during World War II, a phase that ended in May of 1942 with the arrival of 2,000 American

troops. In 1959, the inhabitants of the islands voted to become a French overseas territory and officially assumed this status in July 1961.

TRANSNATIONAL ISSUES**Disputes—International:** none**WEST BANK****INTRODUCTION**

Background: The September 1993 Israel-PLO Declaration of Principles on Interim Self-Government Arrangements provided for a transitional period of Palestinian self-rule in the West Bank and the Gaza Strip. Under a series of agreements signed between May 1994 and September 1999, Israel transferred to the Palestinian Authority (PA) security and civilian responsibility for many Palestinian-populated areas of the West Bank and Gaza Strip. Negotiations to determine the permanent status of the West Bank and Gaza Strip stalled following the outbreak of an intifada in September 2000. In April 2003, the Quartet (US, EU, UN, and Russia) presented a roadmap to a final

settlement of the conflict by 2005 based on reciprocal steps by the two parties leading to two states, Israel and a democratic Palestine. Following Palestinian leader Yasir ARAFAT's death in late 2004, Mahmud ABBAS was elected PA president in January 2005. A month later, Israel and the PA agreed to the Sharm el-Sheikh Commitments in an effort to move the peace process forward. In September 2005, Israel unilaterally withdrew all of its settlers and soldiers and dismantled its military facilities in the Gaza Strip and withdrew settlers and redeployed soldiers from four small northern West Bank settlements. Nonetheless, Israel still controls maritime, airspace, and other access to the Gaza Strip. In January 2006, the Islamic Resistance Movement,

HAMAS, won control of the Palestinian Legislative Council (PLC). HAMAS took control of the PA government in March 2006, but President ABBAS had little success negotiating with HAMAS to present a political platform acceptable to the international community so as to lift economic sanctions on Palestinians. Violent clashes between Fatah and HAMAS supporters in the Gaza Strip in 2006 and early 2007 resulted in numerous Palestinian deaths and injuries. In February 2007, ABBAS and HAMAS Political Bureau Chief Khalid MISHAL signed the Mecca Agreement in Saudi Arabia that resulted in the formation of a Palestinian National Unity Government (NUG) headed by HAMAS member Ismail HANIYA. However, fighting

continued in the Gaza Strip, and in June 2007, HAMAS militants succeeded in a violent takeover of all military and governmental institutions in the Gaza Strip. ABBAS that same month dismissed the NUG and through a series of presidential decrees formed a PA government in the West Bank led by independent Salam FAYYAD. Fatah and HAMAS in May 2011, under the auspices of Egyptian-sponsored reconciliation negotiations, agreed to reunify the Palestinian territories, but the factions have struggled to finalize details on governing and security structures. The status quo remains with HAMAS in control of the Gaza Strip and ABBAS and the Fatah-dominated PA governing the West Bank. FAYYAD and his PA government continue to implement a series of security and economic reforms to improve conditions in the West Bank. ABBAS, who on behalf of the Palestinians in September submitted a UN membership application, has said he will not resume negotiations with current Israeli Prime Minister Binyamin NETANYAHU until Israel halts all settlement activity in the West Bank and East Jerusalem.

ECONOMY

Economy—overview: The West Bank—the larger of the two areas comprising the Palestinian territories—has experienced a relatively high single-digit economic growth rate since 2008, but this rate has been sustained by inflows of donor aid rather than private sector economic activity. After suffering an almost decade-long downturn following the start of the second intifada in 2000, overall standard-of-living measures have recovered to the levels seen in the late 1990s. Despite the Palestinian Authority's (PA) largely successful implementation

of economic and security reforms and the easing of some movement and access restrictions by the Israeli Government in 2010, Israeli closure policies continue to disrupt labor and trade flows, industrial capacity, and basic commerce, eroding the productive capacity of the West Bank economy. Since mid-2007 the PA under President Mahmoud ABBAS and Prime Minister Salam FAYYAD has depended on more than \$3 billion in direct foreign donor assistance to the PA's budget. The biggest impediments to economic improvements in the West Bank remain Palestinians' lack of access to land and resources in Israeli-controlled areas, import and export restrictions, and a high-cost capital structure. Absent robust private sector growth, the PA will continue to rely heavily on donor aid for its budgetary needs.

Disputes—International: The current status of the West Bank is subject to the Israeli-Palestinian Interim Agreement—

permanent status to be determined through further negotiation; Israel continues construction of a “seam line” separation barrier along parts of the Green Line and within the West Bank; Israel withdrew from four settlements in the northern West Bank in August 2005; since 1948, about 350 peacekeepers from the UN Truce Supervision Organization (UNTSO), headquartered in Jerusalem, monitor ceasefires, supervise

armistice agreements, prevent isolated incidents from escalating, and assist other UN personnel in the region

WESTERN SAHARA**INTRODUCTION**

Background: Morocco annexed the northern two-thirds of Western Sahara (formerly Spanish Sahara) in 1976 and claimed the rest of the territory in 1979, following Mauritania's withdrawal. A guerrilla war with the Polisario Front contesting Morocco's sovereignty ended in a 1991 UN-brokered cease-fire and the nearly 1,700 mile-long defensive sand berm built by the Moroccans from 1980 to 1987 separates the opposing forces with Morocco controlling the roughly 80 percent of the territory west of the berm. A UN-organized referendum on the territory's final status has been repeatedly postponed. The UN since 2007 has sponsored intermittent talks between representatives of the Government of Morocco and the Polisario Front to negotiate the status of Western Sahara. Morocco has put forward an autonomy proposal for the territory, which would allow for some local administration while maintaining Moroccan sovereignty. The Polisario, with Algeria's support, demands a popular referendum that includes the option of independence. Ethnic tensions in Western Sahara occasionally erupt into violence requiring a Moroccan security force response.

ECONOMY

Economy—overview: Western Sahara has a small market-based economy whose main industries are fishing, phosphate mining, and pastoral nomadism. The territory's arid desert climate makes sedentary agriculture difficult, and Western Sahara imports much of its food. The Moroccan Government administers Western Sahara's economy and is a source of employment, infrastructure development, and social spending in the territory. Western Sahara's unresolved legal

status makes the exploitation of its natural resources a contentious issue between Morocco and the Polisario. Morocco and the EU in July 2006 signed a four-year agreement allowing European vessels to fish off the coast of Morocco, including the disputed waters off the coast of Western Sahara. Oil has never been found in Western Sahara in commercially significant quantities, but Morocco and the Polisario have quarreled over who has the right to authorize and benefit from oil exploration in the territory. Western Sahara's main long-term economic challenge is the development of a more diverse set of industries capable of providing greater employment and income to the territory.

TRANSNATIONAL ISSUES

Disputes—International: Many neighboring states reject Moroccan adminis-

tration of Western Sahara; several states have extended diplomatic relations to the "Sahrawi Arab Democratic Republic" represented by the Polisario Front in exile in Algeria, while others recognize Moroccan sovereignty over Western Sahara; most of the approximately 102,000 Sahrawi

refugees are sheltered in camps in Tindouf, Algeria

WORLD

INTRODUCTION

Background: Globally, the 20th century was marked by: (a) two devastating world wars; (b) the Great Depression of the 1930s; (c) the end of vast colonial empires; (d) rapid advances in science and technology, from the first airplane flight at Kitty Hawk, North Carolina (US) to the landing on the moon; (e) the Cold War between the Western alliance and the Warsaw Pact nations; (f) a sharp rise in living standards in North America, Europe, and Japan; (g) increased concerns about the environment, including loss of forests, shortages of energy and water, the decline in biological diversity, and air pollution; (h) the onset of the AIDS epidemic; and (i) the ultimate emergence of the US as the only world superpower. The planet's population continues to explode: from 1 billion in 1820, to 2 billion in 1930, 3 billion in 1960, 4 billion in 1974, 5 billion in 1987, 6 billion in 1999, and 7 billion in 2012. For the 21st century, the continued exponential growth in science and technology raises both hopes (e.g., advances in medicine) and fears (e.g., development of even more lethal weapons of war).

GEOGRAPHY

Geographic overview: The surface of the earth is approximately 70.9% water and 29.1% land. The former portion is divided into large water bodies termed oceans. The World Factbook recognizes and describes five oceans, which are in decreasing order of size: the Pacific Ocean, Atlantic Ocean, Indian Ocean, Southern Ocean, and Arctic Ocean.

The land portion is generally divided into several, large, discrete landmasses termed

continents. Depending on the convention used, the number of continents can vary from five to seven. The most common classification recognizes seven, which are (from largest to smallest): Asia, Africa, North America, South America, Antarctica, Europe, and Australia. Asia and Europe are sometimes lumped together into a Eurasian continent resulting in six continents. Alternatively, North and South America are sometimes grouped as simply the Americas, resulting in a continent total of six (or five, if the Eurasia designation is used).

North America is commonly understood to include the island of Greenland, the isles of the Caribbean, and to extend south all the way to the Isthmus of Panama. The easternmost extent of Europe is generally defined as being the Ural Mountains and the Ural River; on the southeast the Caspian Sea; and on the south the Caucasus Mountains, the Black Sea, and the Mediterranean. Portions of Azerbaijan, Georgia, Kazakhstan, Russia, and Turkey fall within both Europe and Asia, but in every instance the larger section is in Asia. These countries are considered part of both continents. Armenia and Cyprus, which lie completely in Western Asia, are geopolitically European countries.

Asia usually incorporates all the islands of the Philippines, Malaysia, and Indonesia. The islands of the Pacific are often lumped with Australia into a "land mass" termed Oceania or Australasia. Africa's northeast extremity is frequently delimited at the Isthmus of Suez, but for geopolitical purposes, the Egyptian Sinai Peninsula is often included as part of Africa.

Although the above groupings are the most common, different continental dispositions are recognized or taught in certain parts of

the world, with some arrangements more heavily based on cultural spheres rather than physical geographic considerations.

Maritime claims: a variety of situations exist, but in general, most countries make the following claims measured from the mean low-tide baseline as described in the 1982 UN Convention on the Law of the Sea: territorial sea—12 nm, contiguous zone—24 nm, and exclusive economic zone—200 nm; additional zones provide for exploitation of continental shelf resources and an exclusive fishing zone; boundary situations with neighboring states prevent many countries from extending their fishing or economic zones to a full 200 nm

Climate: a wide equatorial band of hot and humid tropical climates—bordered north and south by subtropical temperate zones—that separate two large areas of cold and dry polar climates

Terrain: the greatest ocean depth is the Mariana Trench at 10,924 m in the Pacific Ocean

Elevation extremes:

lowest point: Bentley Subglacial Trench (Antarctica) -2,555 m

note: in the oceanic realm, Challenger Deep in the Mariana Trench is the lowest point, lying -10,924 m below the surface of the Pacific Ocean

highest point: Mount Everest 8,850 m

Natural resources: the rapid depletion of nonrenewable mineral resources, the depletion of forest areas and wetlands, the extinction of animal and plant species, and the deterioration in air and water quality (especially in some countries of Eastern Europe, the former USSR, and China) pose serious long-term problems that governments and peoples are only beginning to address

Natural hazards: large areas subject to severe weather (tropical cyclones); natural disasters (earthquakes, landslides, tsunamis, volcanic eruptions)

volcanism: volcanism is a fundamental driver and consequence of plate tectonics, the physical process reshaping the Earth's lithosphere; the world is home to more than 1,500 potentially active volcanoes, with over 500 of these having erupted in historical times; an estimated 500 million people live near these volcanoes; associated dangers include lava flows, lahars (mudflows), pyroclastic flows, ash clouds, ash fall, ballistic projectiles, gas emissions, landslides, earthquakes, and tsunamis; in the 1990s, the International Association of Volcanology and Chemistry of the Earth's Interior, created a list of 16 volcanoes worthy of special study because of their great potential for destruction: Avachinsky-Koryaksky (Russia), Colima (Mexico), Etna (Italy), Galeras (Colombia), Mauna Loa (United States), Merapi (Indonesia), Nyiragongo (Democratic Republic of the Congo), Rainier (United States), Sakurajima (Japan), Santa Maria (Guatemala), Santorini (Greece), Taal (Philippines), Teide (Spain), Ulawun (Papua New Guinea), Unzen (Japan), Vesuvius (Italy)

Environment—current issues: large areas subject to overpopulation, industrial disasters, pollution (air, water, acid rain, toxic substances), loss of vegetation (overgrazing, deforestation, desertification), loss of wildlife, soil degradation, soil depletion, erosion; global warming becoming a greater concern

Geography—note: the world is now thought to be about 4.55 billion years old, just about one-third of the 13.75-billion-year age estimated for the universe

all members of the UN are parties to the statute that established the International Court of Justice (ICJ) or World Court; 55 countries have accepted jurisdiction of the ICJ with reservations and 11 countries have accepted ICJ jurisdiction without reservations; states parties to the Rome Statute of the International Criminal Court (ICCt) are those countries that have ratified or acceded to the Rome Statute, the treaty that established the Court; a total of 121 (effective 1 July 2012) countries have accepted jurisdiction of the ICCt (see Appendix B for a clarification on the differing mandates of the ICJ and ICCt)

ECONOMY

Economy—overview: In 2011, world output - and per capita income - continued to recover from the 2008–09 recession, the first global downturn since 1946. Gross World Product (GWP) grew 3.6%, a slowdown from the 5.0% rate achieved in 2010. Growth was unevenly distributed: lower income countries—those with

per capita incomes below \$30,000 per year—averaged 4.1% growth, while higher income countries—with per capita incomes above \$30,000—averaged 2.2% growth. Among large economies, China (+9.2%), Argentina (+8.0%), India (+7.8%), Nigeria (+6.9%), and Saudi Arabia (+6.5%) recorded the biggest GDP gains—although all were off the pace they set in 2010. Continuing uncertainties in financial markets slowed growth in Spain (+0.8%), Italy (+0.4%), and Greece (-6.0%), while the tsunami and Fukushima nuclear disaster hit Japan (-0.5%). Growth fell below 2% in both the US and the European Union, in part because of growing concern among consumers and investors about the size of government debt and its impact on the direction of fiscal policy. In 2011, global unemployment continued to creep upwards, reaching 9.0%—underemployment, especially in the developing world, remained much higher. Global gross fixed investment was a bright spot, jumping more than a percentage point to 24.8% of GWP, after a significant drop in 2009; direct investment across international borders climbed 7%. World trade grew 18% in 2011, but the pre-2009 pattern of surplus and deficit countries has returned. With the growth of international trade and investment, world external debt rose nearly 7%, reversing a 5% decline in 2010. Many, if not most, countries pursued expansionary monetary and fiscal policies, although at a reduced pace from 2010. The global money supply, narrowly defined, rose 9%, and broadly defined money increased roughly 8%, as central banks continued efforts to keep interest rates low. The global budget deficit was narrowed to roughly \$3 trillion—4.2% of World GDP, as governments tried to rein in spending and slow the rise of public debt.

The international financial crisis of 2008–09 has presented the world economy with a major new challenge, together with several long-standing ones. The fiscal stimulus packages put in place in 2009–11 required most countries to run budget deficits. Treasuries issued new public debt—totaling \$6.5 trillion since 2008—to pay for the additional expenditures. To keep interest rates low, many central banks monetized that debt, injecting large sums of money into the economies. When economic activity picks up, central banks will face the difficult task of containing inflation without raising interest rates so high they snuff out further growth. At the same time, governments will face the difficult task of spurring current growth and employment without saddling their economies with so much debt that they sacrifice long-term growth and financial stability.

Long-standing challenges the world faces are several. The addition of 80 million people each year to an already overcrowded globe is exacerbating the problems of underemployment, pollution, waste-disposal, epidemics, water-shortages, famine, over-fishing of oceans, deforestation, desertification, and depletion of non-renewable resources. The nation-state, as a bedrock

economic-political institution, is steadily losing control over international flows of people, goods, funds, and technology. Internally, central governments often find their control over resources slipping as separatist regional movements—typically based on ethnicity—gain momentum, e.g., in many of the successor states of the former Soviet Union, in the former Yugoslavia, in India, in Iraq, in Indonesia, and in Canada. Externally, central governments are losing decisionmaking powers to international bodies, most notably the EU. The introduction of the euro as the common currency of much of Western Europe in January 1999, while paving the way for an integrated economic powerhouse, poses economic risks because the participating nations are culturally and politically diverse and have varying levels and rates of growth of income, and hence, differing needs for monetary and fiscal policies. In Western Europe, governments face the difficult political problem of channeling resources away from welfare programs in order to increase investment and strengthen incentives to seek employment. Because of their own internal problems and priorities, the industrialized countries devote insufficient resources to deal effectively with the poorer areas of the world, which, at least from an economic point of view, are becoming further marginalized. The terrorist attacks on the US on 11 September 2001 accentuated a growing risk to global prosperity, illustrated, for example by the reallocation of resources away from investment to anti-terrorist programs. Wars in Iraq and Afghanistan added new uncertainties to global economic prospects.

Despite these challenges, the world economy also shows great promise. Technology has made possible further advances in all fields, from agriculture, to medicine, alternative energy, metallurgy, and transportation. Improved global communications have greatly reduced the costs of international trade, helping the world gain from the international division of labor, raise living standards, and reduce income disparities among nations. Much of the resilience of the world economy in the aftermath of the financial crisis has resulted from government and central bank leaders around the globe working in concert to stem the financial onslaught, knowing well the lessons of past economic failures.

TRANSNATIONAL ISSUES

Disputes—International: stretching over 250,000 km, the world's 322 international land boundaries separate 195 independent states and 71 dependencies, areas of special sovereignty, and other miscellaneous entities; ethnicity, culture, race, religion, and language have divided states into separate political entities as much as history, physical terrain, political fiat, or conquest, resulting in sometimes arbitrary and imposed boundaries; most maritime states have claimed limits that include territorial seas and exclusive economic zones; overlapping limits due to adjacent or opposite coasts create the potential for 430 bilateral maritime boundaries of which 209 have agreements that include contiguous and non-contiguous segments; boundary, borderland/resource, and territorial disputes vary in intensity from managed or dormant to violent or militarized; undemarcated, indefinite, porous, and unmanaged boundaries tend to encourage illegal cross-border activities, uncontrolled migration, and confrontation; territorial disputes may evolve from historical and/or cultural claims, or they may be brought on by resource competition; ethnic and cultural clashes continue to be responsible for much of the territorial fragmentation and internal displacement of the estimated 6.6 million people and cross-border displacements of 8.6 million refugees around the world as of early 2006; just over one million refugees were repatriated in the same period; other sources of contention include access to water and mineral (especially hydrocarbon)

resources, fisheries, and arable land; armed conflict prevails not so much between the uniformed armed forces of independent states as between stateless armed entities that detract from the sustenance and welfare of local populations, leaving the community of nations to cope with resultant refugees, hunger, disease, impoverishment, and environmental degradation

Refugees and internally displaced persons:

the United Nations High Commissioner for Refugees (UNHCR) estimated that in January 2010 there was a global population of 8.8 million registered refugees and as many as 27.5 million IDPs in more than 40 countries; the actual global population of refugees is probably closer to 10 million given the estimated 1.5 million Iraqi refugees displaced throughout the Middle East (2007)

Trafficking in persons:

current situation: approximately 800,000 people, mostly women and children, are trafficked annually across national borders, not including millions trafficked within their own countries; at least 80% of the victims are female and up to 50% are minors; 75% of all victims are trafficked into commercial sexual exploitation; almost two-thirds of the global victims are trafficked intra-regionally within East Asia and the Pacific (260,000 to 280,000 people) and Europe and Eurasia (170,000 to 210,000 people)

Tier 2 Watch List: (42 countries) Afghanistan, Angola, Azerbaijan, the Bahamas, Bahrain, Barbados, Belarus, Burma, Burundi, Chad, China, Comoros, Republic of the Congo, Cyprus, Djibouti, Ecuador, Federated States of Micronesia, The Gambia, Guinea-Bissau, Haiti, Iraq, Jamaica,

Kenya, Lebanon, Liberia, Macau, Malawi, Malaysia, Maldives, Mauritania, Namibia, Niger, Russia, Senegal, Seychelles, Sierra Leone, South Sudan, Suriname, Thailand, Turkmenistan, Uzbekistan, Venezuela

Tier 3: (17 countries) Algeria, Central African Republic, Democratic Republic of Congo, Cuba, Equatorial Guinea, Eritrea, Iran, North Korea, Kuwait, Libya, Madagascar, Papua New Guinea, Saudi Arabia, Sudan, Syria, Yemen, Zimbabwe (2012)

Illicit drugs: *cocaine:* worldwide coca leaf cultivation in 2007 amounted to 232,500 hectares; Colombia produced slightly more than two-thirds of the worldwide crop, followed by Peru and Bolivia; potential pure cocaine production decreased 7% to 865 metric tons in 2007; Colombia conducts an aggressive coca eradication campaign, but both Peruvian and Bolivian Governments are hesitant to eradicate coca in key growing areas; 551 metric tons of export-quality cocaine (85% pure) is documented to have been seized or destroyed in 2005; US consumption of export quality cocaine is estimated to have been in excess of 380 metric tons

opiates: worldwide illicit opium poppy cultivation continued to increase in 2007, with a potential opium production of 8,400 metric tons, reaching the highest levels recorded since estimates began in mid-1980s; Afghanistan is world's primary opium producer, accounting for 95% of the global supply; Southeast Asia—responsible for 9% of global opium—saw marginal increases in production; Latin America produced 1% of global opium, but most was refined into heroin destined for the US market; if all potential opium was processed into pure heroin, the potential global production would be 1,000 metric tons of heroin in 2007

YEMEN

INTRODUCTION

Background: North Yemen became independent of the Ottoman Empire in 1918. The British, who had set up a protectorate area around the southern port of Aden in the 19th century, withdrew in 1967 from what became South Yemen. Three years later, the southern government adopted a Marxist orientation. The massive exodus of hundreds of thousands of Yemenis from the south to the north contributed to two decades of hostility between the states. The two countries were formally unified as the Republic of Yemen in 1990. A southern secessionist movement in 1994 was quickly subdued. In 2000, Saudi Arabia and Yemen agreed to a delimitation of their border. Fighting in the northwest between the government and Huthi rebels, a group seeking a return to traditional Zaydi Islam, began in 2004 and has since resulted in six rounds of fighting—the last ended in early 2010 with a ceasefire that continues to hold. The southern secessionist movement was revitalized in 2008 when a popular socioeconomic protest movement initiated the prior year took on political goals including secession. Public rallies in Sana'a against President SALIH—inspired by similar demonstrations in Tunisia and Egypt—slowly built momentum starting in late January 2011 fueled by complaints over high unemployment, poor economic conditions, and corruption. By the following month, some protests had resulted in violence, and the demonstrations had spread to other major cities. By March the opposition had hardened its demands and was unifying behind calls for SALIH's immediate ouster. The Gulf Cooperation Council (GCC) in late April 2011, in an attempt to mediate the crisis in Yemen, proposed an agreement in which the president would step down in exchange for immunity from prosecution. SALIH's refusal to sign an agreement led to heavy street fighting and his injury in an explosion in June 2011. The UN Security Council passed Resolution 2014 in October 2011 calling on both sides to end the violence and complete a power transfer deal. In late November 2011, President

SALIH signed the GCC-brokered agreement to step down and to transfer some of his powers to Vice President Abd al-Rabuh Mansur HADI. Following elections in February 2012, won by HADI, SALIH formally transferred his powers.

ECONOMY

Economy—overview: Yemen is a low income country that is highly dependent on declining oil resources for revenue. Petroleum accounts for roughly 25% of GDP and 70% of government revenue. Yemen has tried to counter the effects of its declining oil resources by diversifying its economy through an economic reform program initiated in 2006 that is designed to bolster non-oil sectors of the economy and foreign investment. In October 2009, Yemen exported its first liquefied natural gas as part of this diversification effort. In January 2010, the international community established the Friends of Yemen group that aims to support Yemen's efforts toward economic and political reform, and in August 2010 the IMF approved a three-year \$370 million program to further this effort. Despite these ambitious endeavors, Yemen continues to face difficult long term challenges, including declining water resources and a high population growth rate.

ZAMBIA

INTRODUCTION

Background: The territory of Northern Rhodesia was administered by the [British] South Africa Company from 1891 until it was taken over by the UK in 1923. During the 1920s and 1930s, advances in mining spurred development and immigration. The name was changed to Zambia upon independence in 1964. In the 1980s and 1990s, declining copper prices, economic mismanagement and a prolonged drought hurt the economy. Elections in 1991 brought an end to one-party rule, but the subsequent vote in 1996 saw blatant harassment of opposition parties. The election in 2001 was marked by administrative problems with three parties filing a legal petition challenging the election of ruling party candidate Levy MWANAWASA. MWANAWASA was reelected in 2006 in an election that was deemed free and fair. Upon his abrupt death in August 2008, he was succeeded by his Vice President Rupiah BANDA, who subsequently won a special presidential by-election in October 2008. Michael SATA was elected President in September 2011.

Flag description: green field with a panel of three vertical bands of red (hoist side), black, and orange below a soaring orange eagle, on the outer edge of the flag; green stands for the country's natural resources and vegetation, red symbolizes the struggle for freedom, black the people of Zambia, and orange the country's mineral wealth; the eagle represents the people's ability to rise above the nation's problems

National symbol(s): African fish eagle

National anthem: *name:* "Lumbanyeni Zambia" (Stand and Sing of Zambia, Proud and Free)

lyrics/music: multiple/Enoch Mankayi SONTONGA

note: adopted 1964; the melody, from the popular song "God Bless Africa," is the same as that of Tanzania but with different lyrics; the melody is also incorporated into South Africa's anthem

ECONOMY

Economy—overview: Zambia's economy has experienced strong growth in recent years, with real GDP growth in 2005–11 more than 6% per year. Privatization of government-owned copper mines in the 1990s relieved the government from covering mammoth losses generated by the industry and greatly increased copper mining output and profitability to spur economic growth. Copper output has increased steadily since 2004, due to higher copper prices and foreign investment. In 2005, Zambia qualified for debt relief under the Highly Indebted Poor Country Initiative, consisting of approximately US\$6 billion in debt relief. Poverty remains a significant problem in Zambia, despite a stronger economy. Zambia's dependency on copper makes it vulnerable to depressed commodity prices, but record high copper prices and a bumper maize crop in 2010 helped Zambia rebound quickly from the world economic slowdown that began in 2008. A high birth rate, relatively high HIV/AIDS burden, and market distorting agricultural policies have meant that Zambia's economic growth has not dramatically decreased the stubbornly high poverty rates.

TRANSNATIONAL ISSUES

Disputes—International: in 2004, Zimbabwe dropped objections to plans between Botswana and Zambia to build a bridge over

the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river

Refugees and internally displaced persons:

Illicit drugs: transshipment point for moderate amounts of methaqualone, small amounts of heroin, and cocaine bound for southern Africa and possibly Europe; a poorly developed financial infrastructure coupled with a government commitment to combating money laundering make it an unattractive venue for money launderers; major consumer of cannabis

ZIMBABWE

INTRODUCTION

Background: The UK annexed Southern Rhodesia from the [British] South Africa Company in 1923. A 1961 constitution was formulated that favored whites in power. In 1965 the government unilaterally declared its independence, but the UK did not recognize the act and demanded more complete voting rights for the black African majority in the country (then called Rhodesia). UN sanctions and a guerrilla uprising finally led to free elections in 1979 and independence (as Zimbabwe) in 1980. Robert MUGABE, the nation's first prime minister, has been the country's only ruler (as president since 1987) and has dominated the country's political system since independence. His chaotic land redistribution campaign, which began in 2000, caused an exodus of

white farmers, crippled the economy, and ushered in widespread shortages of basic commodities. Ignoring international condemnation, MUGABE rigged the 2002 presidential election to ensure his reelection. In April 2005, Harare embarked on Operation Restore Order, ostensibly an urban rationalization program, which resulted in the destruction of the homes or businesses of 700,000 mostly poor supporters of the opposition. President MUGABE in June 2007 instituted price controls on all basic commodities causing panic buying and leaving store shelves empty for months.

General elections held in March 2008 contained irregularities but still amounted to a censure of the ZANU-PF-led government with the opposition winning a majority of seats in parliament. MDC opposition leader Morgan TSVANGIRAI won the most votes in the presidential polls, but not enough to win outright. In the lead up to a run-off election in late June 2008, considerable violence enacted against opposition party members led to the withdrawal of TSVANGIRAI from the ballot. Extensive evidence of violence and intimidation resulted in international condemnation of the process. Difficult negotiations over a power-sharing government, in which MUGABE remained president and TSVANGIRAI became prime minister, were finally settled in February 2009, although the leaders failed to agree upon many key outstanding governmental issues. MUGABE publicly called for early elections in 2011—two years before his term ends—but no election was held.

ECONOMY

Economy—overview: Zimbabwe's economy is growing despite continuing political uncertainty. Following a decade of contraction from 1998 to 2008, Zimbabwe's economy recorded real growth of 6% in 2011. However, the government of Zimbabwe still faces a number of difficult economic problems, including infrastructure and regulatory deficiencies, ongoing indigenization pressure, policy uncertainty, a large external debt burden, and insufficient formal employment. Zimbabwe's 1998–2002 involvement in the war in the Democratic Republic of the Congo drained hundreds of millions of dollars from the economy. The government's subsequent land reform program, characterized by chaos and violence, badly damaged the commercial farming sector, the traditional source of exports and foreign exchange and the provider of 400,000 jobs, turning Zimbabwe into a net importer of food products. Until early 2009, the Reserve Bank of Zimbabwe routinely printed money to fund the budget deficit, causing hyperinflation. Dollarization in early 2009—which allowed currencies such as the Botswana pula, the South Africa rand, and the US dollar to be used locally—ended hyperinflation and restored price stability but exposed structural weaknesses that continue to inhibit broad-based growth.

female: 152,550 (2010 est.)

Military expenditures:

3.8% of GDP (2006)

country comparison to the world: 28

TRANSNATIONAL ISSUES

Disputes—International: Botswana built electric fences and South Africa has placed military along the border to stem the flow of thousands of Zimbabweans fleeing to find work and escape political persecution; Namibia has supported, and in 2004 Zimbabwe dropped objections to, plans between Botswana and Zambia to build a bridge over the Zambezi River, thereby de facto recognizing a short, but not clearly delimited, Botswana-Zambia boundary in the river

Refugees and internally displaced

persons:

refugees (country of origin): 2,500 (Democratic Republic of Congo)

IDPs: 569,685 (MUGABE-led political violence, human rights violations, land reform, and economic collapse) (2007)

Trafficking in persons: *current situation:* Zimbabwe is a source, transit, and

destination country for men, women, and children trafficked for the purposes of forced labor and sexual exploitation; some victims of forced prostitution are subsequently transported across the border to South Africa where they suffer continued exploitation; Zimbabwean men, women, and children are subjected to forced labor in agriculture and domestic service in rural areas, as well as domestic servitude and sex

trafficking in cities and towns; children are also utilized in the commission of illegal activities, including gambling and drug smuggling

tier rating: Tier 3—the Government of Zimbabwe does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government did not report investigations, prosecutions, or con-

victions of trafficking cases and continued to rely on an international organization to provide law enforcement training, coordinate victim care and repatriation, and lead prevention efforts (2009)

Illicit drugs: transit point for cannabis and South Asian heroin, mandrax, and methamphetamines en route to South Africa

INTERNATIONAL ORGANIZATIONS AND GROUPS

advanced developing countries

another term for those less developed countries (LDCs) with particularly rapid industrial development; see newly industrializing economies (NIEs)

advanced economies

a term used by the International Monetary Fund (IMF) for the top group in its hierarchy of advanced economies, countries in transition, and developing countries; it includes the following 33 advanced economies: Australia, Austria, Belgium, Canada, Cyprus, Czech Republic, Denmark, Finland, France, Germany, Greece, Hong Kong, Iceland, Ireland, Israel, Italy, Japan, South Korea, Luxembourg, Malta, Netherlands, NZ, Norway, Portugal, Singapore, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Taiwan, UK, US; note—this group would presumably also cover the following nine smaller countries of Andorra, Bermuda, Faroe Islands, Guernsey, Holy See, Jersey, Liechtenstein, Monaco, and San Marino that are included in the more comprehensive group of “developed countries”

African Development Bank Group (AfDB)

note—regional multilateral development finance institution temporarily located in Tunis, Tunisia; the Bank Group consists of the African Development Bank, the African Development Fund, and the Nigerian Trust Fund

established—10 September 1964

aim—to promote economic development and social progress

regional members—(53) Algeria, Angola, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Cape Verde, Central African Republic, Chad, Comoros, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Djibouti, Egypt, Equatorial Guinea, Eritrea, Ethiopia, Gabon, The Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Libya, Madagascar, Malawi, Mali, Mauritania, Mauritius, Morocco, Mozambique, Namibia, Niger, Nigeria, Rwanda, Sao Tome and Principe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, Sudan, Swaziland, Tanzania, Togo, Tunisia, Uganda, Zambia, Zimbabwe

nonregional members—(24) Argentina, Austria, Belgium, Brazil, Canada, China, Denmark, Finland, France, Germany, India, Italy, Japan, South Korea, Kuwait, Netherlands, Norway, Portugal, Saudi Arabia, Spain, Sweden, Switzerland, UK, US

objective—to provide an effective framework for cooperation between tropical timber producers and consumers and to encourage the development of national policies aimed at sustainable utilization and conservation of tropical forests and their genetic resources

parties—(59) Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cambodia, Cameroon, Canada, Central African Republic, China, Colombia, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Denmark, Ecuador, Egypt, EU, Fiji, Finland, France, Gabon, Germany, Ghana, Greece, Guatemala, Guyana, Honduras, India, Indonesia, Ireland, Italy, Japan, South Korea, Liberia, Luxembourg, Malaysia, Mexico, Nepal, Netherlands, NZ, Nigeria, Norway, Panama, Papua New Guinea, Peru, Philippines, Portugal, Russia, Spain, Suriname, Sweden, Switzerland, Thailand, Togo, Trinidad and Tobago, UK, US, Vanuatu, Venezuela

International Tropical Timber Agreement, 1994

note—abbreviated as Tropical Timber 94

opened for signature—26 January 1994

entered into force—1 January 1997

objective—to ensure that by the year 2000 exports of tropical timber originate from sustainably managed sources; to establish a fund to assist tropical timber producers in obtaining the resources necessary to reach this objective

parties—(61) Australia, Austria, Belgium, Bolivia, Brazil, Burma, Cambodia, Cameroon, Canada, Central African Republic, China, Colombia, Democratic Republic of the Congo, Republic of the Congo, Cote d'Ivoire, Denmark, Ecuador, Egypt, EU, Fiji, Finland, France, Gabon, Germany, Ghana, Greece, Guatemala, Guyana, Honduras, India, Indonesia, Ireland, Italy, Japan, South Korea, Liberia, Luxembourg, Malaysia, Mexico, Nepal, Netherlands, NZ, Nigeria, Norway, Panama, Papua New Guinea, Peru, Philippines, Poland, Portugal, Spain, Suriname, Sweden, Switzerland, Thailand, Togo, Trinidad and Tobago, UK, US, Vanuatu, Venezuela

Kyoto Protocol to the United Nations Framework Convention on Climate Change

note—abbreviated as Climate Change-Kyoto Protocol

opened for signature—16 March 1998

entered into force—23 February 2005

objective—to further reduce greenhouse gas emissions by enhancing the national programs of developed countries aimed at this goal and by establishing percentage reduction targets for the developed countries

parties—(184) Albania, Algeria, Angola, Antigua and Barbuda, Argentina, Armenia, Australia, Austria, Azerbaijan, The Bahamas, Bahrain, Bangladesh, Barbados, Belarus, Belgium, Belize, Benin, Bhutan, Bolivia, Bosnia and Herzegovina, Botswana, Brazil, Bulgaria, Burkina Faso, Burma, Burundi, Cambodia, Cameroon, Cape Verde, Central African Republic, Chile, China, Colombia, Comoros, Democratic Republic of the Congo, Republic of the Congo, Cook Island, Costa Rica, Cote d'Ivoire, Croatia, Cuba, Cyprus, Czech Republic, Denmark, Djibouti, Dominica, Dominican Republic, Ecuador, Egypt, El Salvador, Equatorial Guinea, Eritrea, Estonia, Ethiopia, EU, Fiji, Finland, France, Gabon, The Gambia, Georgia, Germany, Ghana, Greece, Grenada, Guatemala, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Hungary, Iceland, India, Indonesia, Iran, Ireland, Israel, Italy, Jamaica, Japan, Jordan, Kenya, Kiribati, North Korea, South Korea, Kuwait, Kyrgyzstan, Laos, Latvia, Lebanon, Lesotho, Liberia, Libya, Liechtenstein, Lithuania, Luxembourg, Macedonia, Madagascar, Malawi, Malaysia, Maldives, Mali, Malta, Marshall Islands, Mauritania, Mauritius, Mexico, Federated States of Micronesia, Moldova, Monaco, Mongolia, Montenegro, Morocco, Mozambique, Namibia, Nauru, Nepal, Netherlands, NZ, Nicaragua, Niger, Nigeria, Niue, Norway, Oman, Pakistan, Palau, Panama, Papua New Guinea, Paraguay, Peru, Philippines, Poland, Portugal, Qatar, Romania, Russia, Rwanda, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Samoa, Sao Tome and Principe, Saudi Arabia, Senegal, Serbia, Seychelles, Sierra Leone, Singapore, Slovakia, Slovenia, Solomon Islands, South Africa, Spain, Sri Lanka, Sudan, Suriname, Swaziland, Sweden, Switzerland, Syria, Tajikistan, Tanzania, Thailand, Timor-Leste, Togo, Tonga, Trinidad and Tobago, Tunisia, Turkmenistan, Tuvalu, Uganda, Ukraine, UAE, UK, Uruguay, Uzbekistan, Vanuatu, Venezuela, Vietnam, Yemen, Zambia

countries that have signed, but not yet ratified—(2) Kazakhstan, US

CROSS-REFERENCE LIST OF COUNTRY DATA CODES

GEOPOLITICAL ENTITIES and CODES (formerly FIPS PUB 10): *Countries, Dependencies, Areas of Special Sovereignty, and Their Principal Administrative Divisions (FIPS 10)* is maintained by the Office of Targeting and Transnational Issues, National Geospatial-Intelligence Agency, and published by the National Institute of Standards and Technology (Department of Commerce). FIPS 10 codes are intended for general use throughout the US Government, especially in activities associated with the mission of the Department of State and national defense programs.

ISO 3166: *Codes for the Representation of Names of Countries (ISO 3166)* is prepared by the International Organization for Standardization. ISO 3166 includes two- and three-character alphabetic codes and three-digit numeric codes that may be needed for activities involving exchange of data with international organizations that have adopted that standard. Except for the numeric codes, ISO 3166 codes have been adopted in the US as FIPS 104-1: *American National Standard Codes for the Representation of Names of Countries, Dependencies, and Areas of Special Sovereignty for Information Interchange*.

STANAG 1059: *Letter Codes for Geographical Entities (8th edition, 2004)* is a Standardization Agreement (STANAG) established and maintained by the North Atlantic Treaty Organization (NATO/OTAN) for the purpose of providing a common set of geo-spatial identifiers for countries, territories, and possessions. The 8th edition established trigraph codes for each country based upon the ISO 3166-1 alpha-3 character sets. These codes are used throughout NATO.

Internet: The Internet country code is the two-letter digraph maintained by the International Organization for Standardization (ISO) in the *ISO 3166 Alpha-2* list and used by the Internet Assigned Numbers Authority (IANA) to establish country-coded top-level domains (ccTLDs).

APPENDIX E

CROSS-REFERENCE LIST OF HYDROGRAPHIC DATA CODES

IHO 23-4th: *Limits of Oceans and Seas*, Special Publication 23, Draft 4th Edition 1986, published by the International Hydrographic Bureau of the International Hydrographic Organization.

IHO 23-3rd: *Limits of Oceans and Seas*, Special Publication 23, 3rd Edition 1953, published by the International Hydrographic Organization.

ACIC M 49-1: *Chart of Limits of Seas and Oceans*, revised January 1958, published by the Aeronautical Chart and Information Center (ACIC), United States Air Force.

DIAM 65-18: *Geopolitical Data Elements and Related Features*, Data Standard No. 4, Defense Intelligence Agency Manual 65-18, December 1994, published by the Defense Intelligence Agency. The US Government has not yet adopted a standard for hydrographic codes similar to the Federal Information Processing Standards (FIPS) 10-4 country codes. The names and limits of the following oceans and seas are not always directly comparable because of differences in the customers, needs, and requirements of the individual organizations. Even the number of principal water bodies varies from organization to organization. *Factbook* users, for example, find the Atlantic Ocean and Pacific Ocean entries useful, but none of the following standards include those oceans in their entirety. Nor is there any provision for combining codes or overcodes to aggregate water bodies. The recently delimited Southern Ocean is not included.

APPENDIX G

WEIGHTS AND MEASURES

Note: At this time, only three countries—Burma, Liberia, and the US—have not adopted the International System of Units (SI, or metric system) as their official system of weights and measures. Although use of the metric system has been sanctioned by law in the US since 1866, it has been slow in displacing the American adaptation of the British Imperial System known as the US Customary System. The US is the only industrialized nation that does not mainly use the metric system in its commercial and standards activities, but there is increasing acceptance in science, medicine, government, and many sectors of industry.

Mathematical Notation

Mathematical Power	Name
10^{18} or 1,000,000,000,000,000,000	one quintillion
10^{15} or 1,000,000,000,000,000	one quadrillion
10^{12} or 1,000,000,000,000	one trillion
10^9 or 1,000,000,000	one billion
10^6 or 1,000,000	one million
10^3 or 1,000	one thousand
10^2 or 100	one hundred
10^1 or 10	ten
10^0 or 1	one
10^{-1} or 0.1	one-tenth
10^{-2} or 0.01	one-hundredth
10^{-3} or 0.001	one-thousandth
10^{-6} or 0.000 001	one-millionth
10^{-9} or 0.000 000 001	one-billionth
10^{-12} or 0.000 000 000 001	one-trillionth
10^{-15} or 0.000 000 000 000 001	one-quadrillionth
10^{-18} or 0.000 000 000 000 000 001	one-quintillionth

THE ESSENTIAL GUIDE TO WORLD FACTS AND FIGURES

From Afghanistan to Zimbabwe, *The CIA World Factbook 2013* offers complete and up-to-date information on the world's nations. Updated for 2013 with details on politics, populations, military expenditures, and economics, it will be helpful whether you are keeping track of events in world hotspots like Pakistan and China, or double-checking your knowledge of Bolivia and Germany.

**For each country included,
The CIA World Factbook 2013 offers:**

- Detailed maps with new geopolitical data
- Statistics on the population of each country, with details on literacy rates, HIV prevalence, and age structure
- New data on military expenditures and capabilities
- Details on important political parties
- Information for diplomatic consultation
- Facts on transportation and communication infrastructure
- Geography and natural resources
- And much more!

Included are appendixes with useful abbreviations, international environmental agreements, international organizations and groups, weight and measurement conversions, and more. Originally intended for use by U.S. government officials, this is a must-have resource for students, travelers, journalists, and businesspeople with a desire to know more about the international community in which we live and work.
